Summary of Table of Contents

1	Explanatory Notes	12
1.1	Release Notes v4	12
1.2	New in Demscore version 4	12
1.3	The Demscore Codebook	13
1.4	Methodology	13
1.5	Citations	13
1.6	Missing Data	13
1.7	Download ID	14
1.8	Unit Identifier Variables	14
1.9	Thematic Dataset	14
1.10	Output Unit Identifier Variables in the Chosen Unit	14
2	COMPLAB	15
2.1	COMPLAB MIGPOL IMISEM	15
2.1.1	Immigration Policies Permanent Residence	16
2.1.2	Immigration Social Policies	16
2.2	COMPLAB MIGPOL IMPIC 2024	19
2.2.1	Regulations Field A (Family reunification)	20
2.2.2	Regulations Field C (Asylum)	20
2.3	COMPLAB MIGPOL Antidiscrimination Dataset	21
2.3.1	Anti-Discrimination	21
2.4	COMPLAB MIGPOL Antidiscrimination Raw Data	22
2.4.1	Anti-Discrimination	23
3	H-DATA	25
3.1	H-DATA Historical Conflicts - Country-Year Level	25
3.1.1	Identifiers	25
3.1.2	War classification variables	27
3.2	H-DATA Foreign Minister Dataset	30
3.2.1	Military Background	30
3.2.2	Position	31
4	QOG	33
4.1	QoG Environmental Indicators Dataset	33
4.1.1	Emergency Events Database	33
4.1.2	Green Growth	34
4.1.3	The International Social Survey Programme. Environment Module	35
4.1.4	Sustainable Governance Indicators	36
4.1.5	World Development Indicators	37
4.1.6	World Values Survey	38
4.2	QoG EU Regional Dataset Long Data	38
4.2.1	Demographics	39
4.2.2	Health	44
4.2.3	Transport	51
4.3	QoG Standard Dataset Time-Series	52
4.3.1	Quality of Government	53
4.3.2	Conflict and Military Service	54

4.3.3	Political System	69
4.3.4	Judicial	72
4.3.5	Political Parties and Elections	77
4.3.6	Civil Society, Population and Culture	79
4.3.7	Media	81
4.3.8	Gender Equality	83
4.3.9	Health	83
4.3.10	Migration	84
5	UCDP and VIEWS	86
5.1	UCDP Country Year Dataset on Organized Violence within Country Borders version	
24.2	86
5.1.1	State-based Violence	87
5.1.2	Non-state Violence	91
5.1.3	One-sided Violence	92
5.1.4	Cumulative Fatalities	95
6	V-DEM	96
6.1	V-Dem Country-Year: V-Dem Full+Others v14	96
6.1.1	V-Dem Democracy Indices - V-Dem Mid-Level Indices: Components of the Democracy Indices	96
6.1.2	V-Dem Indicators - Elections	98
6.1.3	V-Dem Indicators - The Executive	100
6.1.4	V-Dem Indicators - The Legislature	105
6.1.5	V-Dem Indicators - Civil Liberty	106
6.1.6	V-Dem Indicators - Sovereignty and State	107
6.1.7	V-Dem Indicators - Civic and Academic Space	108
6.1.8	Historical V-Dem - Sovereignty and State	112
6.1.9	Historical V-Dem - Overlap Period Discrepancies	113
6.1.10	Other Indices Created Using V-Dem Data - Executive Bases of Power	114
6.1.11	Other Indices Created Using V-Dem Data - Civil Liberties	114
6.1.12	Other Indices Created Using V-Dem Data - Elections	116
6.1.13	Digital Society Survey - Social Cleavages	118
6.1.14	Other Democracy Indices and Indicators - Ordinal Versions of Indices	120
6.1.15	Other Democracy Indices and Indicators - Political Regimes	121
6.1.16	Other Democracy Indices and Indicators - Freedom House	121
6.1.17	Other Democracy Indices and Indicators - World Bank Governance Indicators	122
6.1.18	Other Democracy Indices and Indicators - Political Institutions and Political Events	123
6.1.19	Other Democracy Indices and Indicators - Others	123
6.1.20	Background Factors (E) - Demography	124
6.1.21	Background Factors (E) - Conflict	125
7	Bibliography	128

3.1.2.6	Intrastate War Name (intra_war_name)	28
3.1.2.7	External Participants (external_participant_intra_state)	29
3.1.2.8	External Participants Side (external_participant_intra_state_side)	29
3.1.2.9	Extra War (extra_war)	29
3.1.2.10	Count Extra War Name (count_extra_war)	29
3.1.2.11	Extra War Name (extra_war_name)	30
3.2	H-DATA Foreign Minister Dataset	30
3.2.1	Military Background	30
3.2.1.1	Military: Combat (mili_combat)	30
3.2.1.2	Military: Combat (War) (combat_war)	31
3.2.1.3	Military: Rebel (rebel)	31
3.2.2	Position	31
3.2.2.1	Manner out (manner_out)	31
4	QoG	33
4.1	QoG Environmental Indicators Dataset	33
4.1.1	Emergency Events Database	33
4.1.1.1	Number of people killed by natural disasters (emdat_ndeath)	34
4.1.2	Green Growth	34
4.1.2.1	Mortality from exposure to ambient ozone (gg_mao)	34
4.1.2.2	Mortality from exposure to lead (gg_ml)	35
4.1.2.3	Mortality from exposure to ambient PM2.5 (gg_mpm)	35
4.1.2.4	Mortality from exposure to residential radon (gg_mr)	35
4.1.3	The International Social Survey Programme. Environment Module	35
4.1.3.1	Taken part in a protest/demonstration about environmental issues (percent) (issp_22cp)	36
4.1.4	Sustainable Governance Indicators	36
4.1.4.1	Participation in global environmental regimes (sgi_ger)	36
4.1.5	World Development Indicators	37
4.1.5.1	Internally displaced persons, new displacement-disasters (number) (wdi_idpdis)	37
4.1.6	World Values Survey	38

4.1.6.1	Participation in environmental protests (percent) (wvs_pedp)	38
4.2	QoG EU Regional Dataset Long Data	38
4.2.1	Demographics	39
4.2.1.1	Reported number of cases of intentional homicide (eu_cri_inthom)	39
4.2.1.2	Reported number of cases of robbery (eu_cri_rob)	39
4.2.1.3	Number of deaths of females, all ages (eu_death_totalf)	40
4.2.1.4	Number of deaths of males, all ages (eu_death_totalm)	40
4.2.1.5	Number of deaths, total all ages (eu_death_totalt)	40
4.2.1.6	Number of deaths of females, at 1 year old (eu_death_y1f)	40
4.2.1.7	Number of deaths of males, at 1 year old (eu_death_y1m)	41
4.2.1.8	Number of deaths, total at 1 year old (eu_death_y1t)	41
4.2.1.9	Number of deaths of females, at 20 years old (eu_death_y20f)	41
4.2.1.10	Number of deaths of males, at 20 years old (eu_death_y20m)	41
4.2.1.11	Number of deaths, total at 20 years old (eu_death_y20t)	42
4.2.1.12	Number of deaths of females, at 50 years old (eu_death_y50f)	42
4.2.1.13	Number of deaths of males, at 50 years old (eu_death_y50m)	42
4.2.1.14	Number of deaths, total at 50 years old (eu_death_y50t)	42
4.2.1.15	Number of deaths of females, at 70 years old (eu_death_y70f)	43
4.2.1.16	Number of deaths of males, at 70 years old (eu_death_y70m)	43
4.2.1.17	Number of deaths, total at 70 years old (eu_death_y70t)	43
4.2.1.18	Crude rate of net migration plus statistical adjustment (eu_cnmigratrt)	43
4.2.2	Health	44
4.2.2.1	Number of deaths by circulatory system diseases, female (eu_he_a_cs_f)	44
4.2.2.2	Number of deaths by circulatory system diseases, male (eu_he_a_cs_m)	44
4.2.2.3	Number of deaths by circulatory system diseases, total (eu_he_a_cs_t)	45
4.2.2.4	Number of deaths by HIV, female (eu_he_a_hiv_f)	45
4.2.2.5	Number of deaths by HIV, male (eu_he_a_hiv_m)	45
4.2.2.6	Number of deaths by HIV, total (eu_he_a_hiv_t)	46
4.2.2.7	Number of deaths by infectious and parasitic diseases, female (eu_he_a_ipd_f)	46
4.2.2.8	Number of deaths by infectious and parasitic diseases, male (eu_he_a_ipd_m)	46
4.2.2.9	Number of deaths by infectious and parasitic diseases, total (eu_he_a_ipd_t)	47
4.2.2.10	Number of deaths by malignant neoplasms, female (eu_he_a_np_f)	47
4.2.2.11	Number of deaths by malignant neoplasms, male (eu_he_a_np_m)	47
4.2.2.12	Number of deaths by malignant neoplasms, total (eu_he_a_np_t)	48
4.2.2.13	Number of deaths by nervous system diseases, female (eu_he_a_ns_f)	48
4.2.2.14	Number of deaths by nervous system diseases, male (eu_he_a_ns_m)	48
4.2.2.15	Number of deaths by nervous system diseases, total (eu_he_a_ns_t)	49
4.2.2.16	Number of deaths by pregnancy, childbirth and puerperium (eu_he_a_pr_f)	49
4.2.2.17	Number of deaths by self-harm, female (eu_he_a_sh_f)	49
4.2.2.18	Number of deaths by self-harm, male (eu_he_a_sh_m)	50
4.2.2.19	Number of deaths by self-harm, total (eu_he_a_sh_t)	50
4.2.2.20	Number of deaths by drug dependence, female (eu_he_a_tox_f)	50
4.2.2.21	Number of deaths by drug dependence, male (eu_he_a_tox_m)	51
4.2.2.22	Number of deaths by drug dependence, total (eu_he_a_tox_t)	51
4.2.3	Transport	51

4.2.3.1	Injured victims in road accidents, per million inhabitants (eu_rac_inj)	51
4.2.3.2	Killed victims in road accidents, per million inhabitants (eu_rac_kil)	52
4.3	QoG Standard Dataset Time-Series	52
4.3.1	Quality of Government	53
4.3.1.1	Public management sub-index (aai_pubm)	53
4.3.1.2	State Fragility Index (cspf_sfi)	53
4.3.2	Conflict and Military Service	54
4.3.2.1	Member of an Alliance (atop_ally)	54
4.3.2.2	Consultancy Obligation (atop_consult)	54
4.3.2.3	Defensive Obligation (atop_defensive)	54
4.3.2.4	Neutrality Obligation (atop_neutrality)	55
4.3.2.5	Non-Aggression Obligation (atop_nonagg)	55
4.3.2.6	Number of Alliances (atop_number)	55
4.3.2.7	Offensive Obligation (atop_offensive)	55
4.3.2.8	Commitment start (atop_transyr)	56
4.3.2.9	Global Militarization Index (bicc_gmi)	56
4.3.2.10	Heavy Weapons Index (bicc_hw)	57
4.3.2.11	Military Expenditure Index (bicc_milexp)	57
4.3.2.12	Military Personnel Index (bicc_milper)	58
4.3.2.13	Conflict Intensity (bti_ci)	58
4.3.2.14	Monopoly on the Use of Force (bti_muf)	59
4.3.2.15	Number of leader transitions in the year (chisols_totalldrtrans)	59
4.3.2.16	Political Terror Scale - Amnesty International (gd_ptsa)	60
4.3.2.17	Political Terror Scale - Human Rights Watch (gd_ptsh)	60
4.3.2.18	Political Terror Scale - US State Department (gd_ptss)	61
4.3.2.19	Ongoing Conflict (gpi_conf)	61
4.3.2.20	Militarisation (gpi_mil)	62
4.3.2.21	Executive Power over Military Force (iaep_epmf)	62
4.3.2.22	Societal Violence Scale Index (svs_ind)	62
4.3.2.23	Number of extrasystemic armed conflicts (ucdp_type1)	63
4.3.2.24	Number of interstate armed conflicts (ucdp_type2)	63
4.3.2.25	Number of internal armed conflicts (ucdp_type3)	63
4.3.2.26	Number of internationalized internal armed conflicts (ucdp_type4)	64
4.3.2.27	Global Terrorism Index (voh_gti)	64
4.3.2.28	Political Stability and Absence of Violence/Terrorism, Estimate (wbgi_pve)	65
4.3.2.29	Political Stability and Absence of Violence/Terrorism, Number of Sources (wbgi_pvn)	65
4.3.2.30	Political Stability and Absence of Violence/Terrorism, Standard Error (wbgi_pvs)	65
4.3.2.31	Armed forces personnel (percent of total labor force) (wdi_afp)	65
4.3.2.32	Armed forces personnel, total (wdi_afpt)	66
4.3.2.33	Arms exports (SIPRI trend indicator values) (wdi_armexp)	66
4.3.2.34	Arms imports (SIPRI trend indicator values) (wdi_armimp)	66
4.3.2.35	Battle-related deaths (number of people) (wdi_brdeath)	67
4.3.2.36	Military expenditure (percent of GDP) (wdi_expmil)	67
4.3.2.37	Military expenditure (percent of general government expenditure) (wdi_expmilge)	68

4.3.2.38	Internally displaced persons, new displacement-disasters (number) (wdi_idpdis)	68
4.3.2.39	Internally displaced persons, new displacement-conflict and violence (number) (wdi_idpvc)	69
4.3.2.40	Internally displaced persons, total displaced by conflict-violence (number) (wdi_idpvp)	69
4.3.3	Political System	69
4.3.3.1	Dichotomous democracy measure (incl. missing for some countries) (bmr_demmis)	69
4.3.3.2	Level of Difficulty (bti_lod)	70
4.3.3.3	Regime Failure - Ending Type (gwf_failtype)	70
4.3.3.4	Regime Failure - Level of Violence (gwf_failviolent)	71
4.3.3.5	Regime Type (ht_regtype)	71
4.3.4	Judicial	72
4.3.4.1	Status of Slavery in Constitution (ccp_slave)	72
4.3.4.2	Freedom of Domestic Movement (ciri_dommov)	73
4.3.4.3	Extrajudicial Killing (ciri_kill)	74
4.3.4.4	Prevalence of Torture by Government Authorities (ciri_tort)	75
4.3.4.5	Rule of Law (fh_rol)	75
4.3.4.6	Robust Democracy: Rule of Law - Corruption Prevention (sgi_qdrlc)	76
4.3.4.7	Intentional homicides (per 100,000 people) (wdi_homicides)	76
4.3.4.8	Intentional homicides, female (per 100,000 female) (wdi_homicidesf)	76
4.3.4.9	Intentional homicides, male (per 100,000 male) (wdi_homicidesm)	77
4.3.5	Political Parties and Elections	77
4.3.5.1	Share of seats in parliament: protest (cpds_lp)	77
4.3.5.2	Share of votes: protest (cpds_vp)	77
4.3.5.3	Riots and Protests after Election (nelda_rpa)	78
4.3.5.4	Violence and Civilian Deaths before Election (nelda_vcdbe)	78
4.3.6	Civil Society, Population and Culture	79
4.3.6.1	Deaths - Female (eu_demdeathdf)	79
4.3.6.2	Deaths - Male. (eu_demdeathdm)	79
4.3.6.3	Deaths - Total (eu_demdeathdt)	79
4.3.6.4	Global Peace Index (gpi_gpi)	79
4.3.6.5	Birth rate, crude (per 1,000 people) (wdi_birth)	80
4.3.6.6	Death rate, crude (per 1,000 people) (wdi_death)	80
4.3.6.7	Completeness of death registration with cause-of-death information (percent) (wdi_deathreg)	81
4.3.7	Media	81
4.3.7.1	Repressive Actions: Broadcast Media (1993-1995) (fhp_rab3)	81
4.3.7.2	Repressive Actions: Broadcast Media (1996-2000) (fhp_rab4)	81
4.3.7.3	Repressive Actions: Print Media (1993-1995) (fhp_rap3)	81
4.3.7.4	Repressive Actions: Print Media (1996-2000) (fhp_rap4)	82
4.3.7.5	Press Freedom Index: Legal Context Component (rsf_lci)	82
4.3.8	Gender Equality	83
4.3.8.1	Global Gender Gap Health and Survival Subindex (gggi_hss)	83
4.3.8.2	Lifetime risk of maternal death (percent) (wdi_lrmd)	83
4.3.9	Health	83
4.3.9.1	Infant mortality (oecd_infmorty_g1)	83
4.3.9.2	Road fatalities (oecd_rddeath_t1)	84

4.3.9.3	Estimated road traffic death rate (100,000 population) (who_roadtrd)	84
4.3.10	Migration	84
4.3.10.1	Refugee population by country or territory of asylum (wdi_refasy)	84
4.3.10.2	Refugee population by country or territory of origin (wdi_refori)	85
5	UCDP and VIEWS	86
5.1	UCDP Country Year Dataset on Organized Violence within Country Borders version	
24.2		86
5.1.1	State-based Violence	87
5.1.1.1	Dyad Count for State-based Violence (sb_dyad_count_cy)	87
5.1.1.2	Dyad IDs for State-based Violence (sb_dyad_ids_cy)	87

1 Explanatory Notes

1.1 Release Notes v4

Demscore provides worldwide free access to harmonized data on Democracy, Environment, Migration, Social Policy, Conflict and Representation from several of the world's most prominent social science research institutes. The interdisciplinary nature of Demscore data facilitates large-scale comparative analyses. This is essential to advance adequate policy responses to complex societal challenges associated with the Sustainable Development Goals (SDGs) and beyond, facing Sweden, Europe, and the world today.

With a firm commitment to transparency and openness, Demscore v4 enables users to gain comprehensive insights into various topics across the social sciences. The joint infrastructure ensures data integrity and quality at the highest international standards and maximizes usability in the measurement of contextual data with 25.000 variables across nearly all countries in the world, from 1750 to the present.

This creates critical time- and cost saving advantages in data collection, management, distribution, and not the least for end-users in the scientific community. This collaborative effort between leading Swedish universities pushes the scale of social science data to a new level and offers unprecedented possibilities for interdisciplinary research and knowledge advancement.

These are the key features of Demscore:

1. **Customized Download:** A fully normalized, joint PostgreSQL database, sophisticated programming, and a user-friendly web-based interface for users to generate custom-designed datasets and codebooks for download.
2. **Translations and Data Merges:** Demscore currently offers more than 1000 merge options between datasets.
3. **Metadata:** Demscore takes information on and organization of metadata to new heights with the inclusion of customized codebooks, a detailed methodology document, and a comprehensive handbook.
4. **Handling of Missing Data:** Demscore pioneers in developing an innovative approach to tackle missing data. Researchers can now account for missing values with increased precision, leading to more robust and reliable analyses.
5. **Merge Scores:** Demscore introduces a unique merge mechanism. This powerful tool enables researchers to combine datasets effortlessly, uncovering connections and patterns that were previously hidden in isolated data silos.
6. **Thematic Datasets:** Demscore provides researchers with curated thematic datasets, each focused on a specific topic. These datasets bring together relevant variables from across the Demscore partners, facilitating in-depth investigations and comprehensive analyses of specific domains.
7. **Interactive Web Portal:** In addition to all the above, Demscore's web portal offers interactive visualization tools, user support and additional information on all partners and data sources.

For more information, please visit <https://www.demscore.se/> or contact contact@demscore.se.

1.2 New in Demscore version 4

A detailed description of changes and additions made for version 4 compared to version 3 can be found in the Methodology Document.

1.3 The Demscore Codebook

The autogenerated Demscore Codebook lists variable entries for those variables chosen by the user along with citation guidelines and licenses per variable.

The meta data is extracted from the codebooks per dataset stored in a table in the Demscore PostgreSQL database with one row per variable for all datasets. This table includes codebook entries, variable tags, labels, and other variable information in LaTeX format used to generate an automated codebook.

Demscore maintains a single set of standard entries for metadata across all datasets, to which all project members contribute their information. Additionally, variables within different datasets may have varying sets of additional information requirements specific to each dataset. These dataset-specific entries are also included, but they are presented as variable-specific metadata beneath the standard entries.

At the outset of the harmonization process, Demscore underwent a thorough variable name cleanup. This involved tasks such as replacing spaces or dots in variable names with underscores and converting all letters to lowercase. Notably, the original tags remain preserved and stored in the PostgreSQL table. Each variable in Demscore is accessible in both short and long forms. The short form comprises the cleaned version of the original variable tag, while the long form starts with the dataset name from which it originates, followed by the cleaned variable name.

For instance, the original name of the variable *MinisterPersonalID* from the H-DATA Foreign Minister Dataset is included as *ministerpersonalid* (short form) and *hdata_fomin_ministerpersonalid* (long form) in Demscore.

In addition, each dataset includes Demscore unit-identifier variables which are named according to the following naming scheme: Beginning with *u_*, followed by the name of the primary unit and finally the variable tag. The *year-* variable from the COMPLAB SPIN The Out-of-Work Benefits Dataset (OUTWB), which is part of the primary unit *u_complab_country_year* has the Demscore unit identifier name *u_complab_country_year_year*.

1.4 Methodology

For details on our methodology please see the Demscore Methodology document available for download on the Demscore website.

1.5 Citations

The Demscore project does not have a formal citation of its own. Hence, when using Demscore, we suggest that you cite the respective projects and datasets. We indicate how every dataset is to be cited in the autogenerated codebook you retrieve with your data download, both in the dataset description and the codebook entry for each variable. Most often it is sufficient to cite the dataset a variable originates from, but sometimes there is a variable specific citation listed in the codebook entry in addition to that. For these cases, please also add the variable specific citation to the reference list of your publication. Full references are linked in the codebook entries of the variables and listed in the codebook's bibliography. We suggest you to also cite the Demscore Methodology Document when using data retrieved through Demscore.

1.6 Missing Data

Demscore indicates different types of missingness for observations in the customized datasets:
Missing in original data = Whenever an observation in the original variable is a missing (NA, missing code such as 7777, blank cell), we preserve this missing value. When the original source has special codes for various types of missing, those are preserved.

Missing code: -11111 = Demscore code for observation is missing due to the translation/merge, i.e., missing data due to no data being included for this combination of identifiers in the end Output Unit.

Missing code: -22222 = No observation is merged/translated, but the original data contains information for these identifier combinations elsewhere. For these cases, we use a different code. The

user needs to consult the reference documents (Methodology Document Section 5.1. or the Demscore Handbook) to clarify why the translation to the identifier combinations in the end Output Unit was not possible.

Please note that an observation that is missing in its original output unit does not take the value -11111, but appears as NA/blank cell in the customized dataset.

1.7 Download ID

The download ID can be shared with other users for replication purposes. A user can type the download ID into the Demscore website and retrieve the same download selection and files as the original user. This ID is autogenerated for each download from the Demscore website and will always retrieve the same data, even if the Demscore version was updated in the meantime.

Download ID:

1.8 Unit Identifier Variables

An Output Unit is defined as an output format in which variables can be retrieved from one or more datasets through a strictly defined output grid. A unit table defining this output grid contains unit identifier columns with `u_` prefixes and the table is sorted based on these unit identifier columns and has a fixed number of rows. Unit columns are based on the columns that constitute the unit of analysis in a dataset. They are added to the original dataset and marked by a unit prefix (consisting of a `u_` and the dataset unit name) before the original variable name. Unit columns can contain slightly modified data, e.g., missing values are replaced by a default value. Sometimes we add additional columns to the unit table, for instance if a dataset includes both a `country_id` column with a numeric country code, we add the variable storing the full country name to the unit table as well for better readability.

1.9 Thematic Dataset

This thematic dataset encompasses a wide range of variables related to security and violence, addressing a broad spectrum of concerns such as armed conflicts, acts of violence, military influence, and the safety of civilian populations. The dataset includes detailed information on warfare, state violence, extrajudicial killings, and the role of the military in both protecting and threatening security. Additionally, the dataset captures personal security indicators such as the prevalence of physical violence, government capacity to prevent violence, and the impact of conflicts on civilian populations. The dataset provides a valuable resource for researchers, policymakers, and practitioners interested in studying the patterns, causes, and effects of violence and security. By offering structured and comprehensive data, this thematic dataset allows users to easily access top-quality information for social science research on security and violence, without the need to merge or source variables from different datasets independently.

2 COMPLAB

Based at Stockholm University, the **Comparative Policy Laboratory (COMPLAB)**, provides vital policy data across three areas: environmental, social, and migration policy. The **Social Policy Indicators (SPIN)** database provides the foundations for new comparative and longitudinal research on causes and consequences of welfare states. Building on T.H. Marshall’s ideas about social citizenship, SPIN makes available comparative data on social rights and duties of citizens, thereby moving research beyond analyses of welfare state expenditures. The SPIN database is instead oriented towards analyses of institutions as manifested in social policy legislation. Data are carefully collected in a coherent and consistent methodological manner to facilitate quantitative research of social policy across time and space. To date, SPIN covers 36 countries, of which several have data on core social policy programs from 1930 to 2019. More information is available on the project’s website: <https://www.su.se/comparative-policy-laboratory/data/spin-1.644259>

GRACE, Governing the Anthropocene – Environmental Policy and Outcomes in a Comparative Perspective, is a longitudinal and comparative study on environmental governance has created a dataset of national policy responses for environmental management and protection in 37 countries for the period 1970-2022. <https://www.su.se/comparative-policy-laboratory/data/grace-1.645779>

The Migration Policy Database (MIGPOL) consists of a range of indicators compiled on behalf of leading data projects in the field of comparative migration policy research. It also contains original data on the rights of irregular migrants which will soon be added to Demscore. <https://www.su.se/comparative-policy-laboratory/data/migpol-1.645783> Read more about COMPLAB here: <https://www.su.se/comparative-policy-laboratory/>

2.1 COMPLAB MIGPOL IMISEM

Dataset tag: complab_migpol_imisem

Output Unit: COMPLAB Country-Year, i.e., data is collected per country and year. That means each row in the dataset can be identified by one country in combination with a year, using the columns `country_code` (ISO 3-letter-code) and `year` or `country_nr` (ISO numeric code) and `year`. If necessary, an additional country column storing the countries’ full names is created as a unit identifier. Please note that we synchronize Complab country variable names in Demscore to `country_full_name`, `country_nr` and `country_id`.

Description: The IMISEM dataset contains 828 indicators on the migration policies of 32 polities from Europe, South East Asia and Latin America and the Caribbean. The IMISEM project adopts a comprehensive view of migration policy that includes both its emigrant/ emigration and immigrant/ immigration sides, bridging for the first time the two sides of migration policy. Thus, the dataset includes indicators that measure emigration policies (exit policies and control of outflows), immigration policies (entry policies and control of inflows), emigrant policies (rights granted, services offered and obligations imposed on non-resident citizens), immigrant policies (mainly, rights granted to non-citizen residents) and citizenship policies (mainly, access to naturalization for immigrants and retention of citizenship by emigrants). The main sources used to complete the IMISEM questionnaires are legal sources (i.e., laws, regulations). Legal sources are complemented with secondary sources (for instance, policy reports) and interviews with experts. The IMISEM Dataset is one of the main outputs of the “The very Immigrant is an Emigrant Project (IMISEM)” funded by the Leibniz Gemeinschaft and carried out at the GIGA German Institute for Global and Area Studies between 2017 and 2020. IMISEM data was collected for the years 2017 to 2019 during this time. It is coded for 2018 in DEMSCORE to align with the country-year format of other datasets.

2.2 COMPLAB MIGPOL IMPIC 2024

Dataset tag: complab_migpol_impic_2024

Output Unit: COMPLAB Country-Year, i.e., data is collected per country and year. That means each row in the dataset can be identified by one country in combination with a year, using the columns `country_code` (ISO 3-letter-code) and `year` or `country_nr` (ISO numeric code) and `year`. If necessary, an additional country column storing the countries' full names is created as a unit identifier. Please note that we synchronize Complab country variable names in Demscore to `country_full_name`, `country_nr` and `country_id`.

Description: The IMPIC Project offers sophisticated quantitative indices to assess immigration policies across time, countries, and policy fields, focusing on 33 OECD countries from 1980 to 2018. The current IMPIC datasets (version 2) cover immigration policies, which encompass government intentions and actions concerning the selection, admission, settlement, and deportation of foreign citizens within a country. IMPIC is structured by entry categories or “tracks” covering four immigration policy fields: labour migration (economic), family reunification (social), asylum/refugees (humanitarian), and co-ethnics (cultural). The dataset specifically covers legal regulations, excluding implementation details. The data is further disaggregated into two dimensions. The first dimension looks at states' regulations, or binding legal provisions that create or constrain rights for immigration, and also controls, or mechanisms that monitor whether immigration policies are followed. The group of control mechanisms includes various aspects relating to irregular migration such as requirements for airlines to control visa or sanctions for employing irregular migrants. The second dimension looks at states' regulations and controls for immigration not only at their borders (external regulations and controls), but also within their territories (internal regulations and controls). As a last differentiation, the IMPIC dataset disaggregates external and internal regulations into four sub-dimensions related to immigrant eligibility requirements, conditions, security of status and rights. The IMPIC 2024 dataset consists of the aggregated scores of all tracks covered separately in the IMPIC RawData. More information

is available on the project's website: <http://www.impic-project.eu/data/>.

2.2.1 Regulations Field A (Family reunification)

The Regulations Field A section of the IMPIC_2016 dataset contains questions on the regulations with regards to family reunification. Regulations are defined as binding legal provisions that create or constrain rights.

2.2.1.1 Autonomous residence permit - Aggregated (avgs_a09)

Long tag: complab_migpol_impic_avgs_a09

Original tag: impic_AvgS_a09

Dataset citation: Helbling et al. (2024)

Merge scores:

Non-missing observations in original unit: Sum: 1252, Percent: 9.81

Non-missing observations in chosen unit: Sum: 1200, Percent: 4

Lost observations in chosen unit: Sum: 52 Percent: 4.15

Description:

DESCRIPTION: For the years 1980 - 2018, did the sponsored spouse have the right to an autonomous residence permit when the relationship was terminated due to separation or divorce? If yes, did the sponsored spouse receive an autonomous residence permit automatically, or only under specific conditions? The information on the requirements for an autonomous residence permit was subdivided into the following subcategories.

1. Less than two years of residence in the country
2. Two or more years of residence in the country (this is counted as two conditions, since it automatically requires that the person has resided in the country for two years) 63
3. Domestic violence or danger in case of return
4. Children
5. Other

VALUES: 0 (open) - 1 (restrictive)

MISSINGS: Empty Cell

COVERAGE: 1980-2018

2.2.2 Regulations Field C (Asylum)

The Regulations Field C section of the IMPIC_2016 dataset contains questions on the regulations with regards to asylum seekers. Regulations are defined as binding legal provisions that create or constrain rights.

2.2.2.1 Status when crisis resolved - Aggregated (avgs_c10)

Long tag: complab_migpol_impic_avgs_c10

Original tag: impic_AvgS_c10

Dataset citation: Helbling et al. (2024)

Merge scores:

Non-missing observations in original unit: Sum: 1198, Percent: 9.38

Non-missing observations in chosen unit: Sum: 1158, Percent: 3.86

Lost observations in chosen unit: Sum: 40 Percent: 3.34

Description:

DESCRIPTION: For the years 1980 - 2018, could a recognized refugee lose his or her status as a refugee when the threatening situation in his or her country of origin ceased to exist?

ALUES: 0 (open) - 1 (restrictive)

MISSINGS: Empty Cell

COVERAGE: 1980-2018

2.3 COMPLAB MIGPOL Antidiscrimination Dataset

Dataset tag: complab_migpol_impic_antidisc

Output Unit: COMPLAB Country-Year, i.e., data is collected per country and year. That means each row in the dataset can be identified by one country in combination with a year, using the columns `country_code` (ISO 3-letter-code) and `year` or `country_nr` (ISO numeric code) and `year`. If necessary, an additional country column storing the countries' full names is created as a unit identifier. Please note that we synchronize Complab country variable names in Demscore to `country_full_name`, `country_nr` and `country_id`.

Description: The IMPIC Project offers sophisticated quantitative indices to assess immigration policies across time, countries, and policy fields, focusing on 33 OECD countries from 1980 to 2018. The current IMPIC datasets (version 2) cover immigration policies, which encompass government intentions and actions concerning the selection, admission, settlement, and deportation of foreign citizens within a country. IMPIC is structured by entry categories or “tracks” covering four immigration policy fields: labour migration (economic), family reunification (social), asylum/refugees (humanitarian), and co-ethnics (cultural). The IMPIC Antidiscrimination provides detailed information on antidiscrimination regulations across all 33 country cases. This dataset consists of scores that aggregate information of the IMPIC Antidiscrimination RawData file across tracks. The items cover the existence and type of anti-discrimination legislation regarding racial/ethnic, religious, and nationality discrimination. The type of legislation includes to what societal areas it applies and which specific acts it prohibits or protects, as well as enforcement mechanisms and the existence and jurisdiction of equality bodies. More information is available on the project's website: <http://www.impic-project.eu/data/>.

Dataset citation: Helbling, M., Abou-Chadi, T., Berger, V., Bjerre, L., Breyer, M., Römer, F., Zobel, M. (2024), 'IMPIC Database v2', Immigration Policies in Comparison Project.

3 H-DATA

The Historical Data Archive (H-DATA) is a hub of historical country-level data running as far back as the French revolution (1789) and offers unparalleled depth of data and temporality, enabling researchers to answer critical questions about the past but to also understand the origins of, and find historical parallels to, present-day problems. H-DATA works to collect, integrate, and curate historical data from Demscore's other modules. By adding this long-term historical dimension, H-DATA makes it possible for researchers to study the path dependency of political institutions where changes are incremental or rare thus making long time-series essential to understanding their causes and consequences. By extending data back into time, H-DATA helps deepen and further our understanding of the conditions of the complex global challenges that we face today. More information is available on the project's website: <https://www.su.se/english/research/research-projects/h-data>

3.1 H-DATA Historical Conflicts - Country-Year Level

Dataset tag: `hdata_conflict_cy`

Output Unit:

Description:

Timespan: 1816-1945

Coverage: 480 wars spanning 130 countries

The Historical Conflict Dataset (HCD) dataset merges multiple existing datasets on wars from 1816-1945 to create a comprehensive list of interstate, intrastate, and extrasystemic wars during this time period. It uses an expanded definition of statehood from the International System(s) Dataset to reduce the Eurocentric bias in defining what constitutes a state. The ambition of this dataset is not to make methodological changes to how conflict is defined or measured, but rather to reclassify war based on a more inclusive definition of statehood and to create a dataset that increases ease of access to war data, particularly for scholars working with country-level historical data between 1816 to 1945.

The data is available in two formats: country-war and country-year. In the country-war datasets has a single case for each country participant and war. The country-year format contains binary variables on whether a country was involved in the different types of conflicts and has one case per country-year.

Description:

V-Dem numeric country code

3.1.2 War classification variables

Variables in this section aim to contribute to updateing existing classifications of wars at the state level (interstate, intrastate, and extrasystemic) with a broader definition of statehood that reduces the Eurocentric bias in determining what constitutes a state and simultaneously reclassify war based on a more inclusive definition of statehood.

3.1.2.1 Interstate War (inter_war)

Long tag: hdata_conflict_cy_inter_war

Original tag: inter_war

Dataset citation: Noonan & Teorell (2023)

Merge scores:

Non-missing observations in original unit: Sum: 18776, Percent: 62.77

Non-missing observations in chosen unit: Sum: 6612, Percent: 22.06

Lost observations in chosen unit: Sum: 12164 Percent: 64.78

Description:

Indicator for interstate war participation (1 = interstate war participation during the year)

3.1.2.2 Count Inter (count_inter_war)

Long tag: hdata_conflict_cy_count_inter_war

Original tag: count_inter_war

Dataset citation: Noonan & Teorell (2023)

Merge scores:

Non-missing observations in chosen unit: Sum: 6612, Percent: 22.06

Lost observations in chosen unit: Sum: 12164 Percent: 64.78

Description:

The number of interstate wars

3.1.2.3 Interstate War Name (inter_war_name)

Long tag: hdata_conflict_cy_inter_war_name

Original tag: inter_war_name

Dataset citation: Noonan & Teorell (2023)

Merge scores:

Non-missing observations in original unit: Sum: 1001, Percent: 3.35

Non-missing observations in chosen unit: Sum: 720, Percent: 2.4

Lost observations in chosen unit: Sum: 281 Percent: 28.07

Description:

Name of the interstate war(s)

3.1.2.4 Intrastate War (intra_war)

Long tag: hdata_conflict_cy_intra_war

Original tag: intra_war

Dataset citation: Noonan & Teorell (2023)

Merge scores:

Non-missing observations in original unit: Sum: 18743, Percent: 62.66

Non-missing observations in chosen unit: Sum: 6594, Percent: 22

Lost observations in chosen unit: Sum: 12149 Percent: 64.82

Description:

Indicator intrastate war participation (1 = intrastate war participation during the year)

3.1.2.5 Count Intra (count_intra_war)

Long tag: hdata_conflict_cy_count_intra_war

Original tag: count_intra_war

Dataset citation: Noonan & Teorell (2023)

Merge scores:

Non-missing observations in original unit: Sum: 18743, Percent: 62.66

Non-missing observations in chosen unit: Sum: 6594, Percent: 22

Lost observations in chosen unit: Sum: 12149 Percent: 64.82

Description:

The number of intrastate wars

3.1.2.6 Intrastate War Name (intra_war_name)

Long tag: hdata_conflict_cy_intra_war_name

Original tag: intra_war_name

Dataset citation: Noonan & Teorell (2023)

Merge scores:

Non-missing observations in original unit: Sum: 573, Percent: 1.92

Non-missing observations in chosen unit: Sum: 532, Percent: 1.77

Lost observations in chosen unit: Sum: 41 Percent: 7.16

Description:

Name of the intrastate war(s)

3.1.2.7 External Participants (`external_participant_intra_state`)

Long tag: `hdata_conflict_cy_external_participant_intra_state`

Original tag: `external_participant_intra_state`

Dataset citation: Noonan & Teorell (2023)

Merge scores:

Non-missing observations in chosen unit: Sum: 6594, Percent: 22

Lost observations in chosen unit: Sum: 12149 Percent: 64.82

Description:

Indicator for states which participated in another state's intrastate war

3.1.2.8 External Participants Side (`external_participant_intra_state_side`)

Long tag: `hdata_conflict_cy_external_participant_intra_state_side`

Original tag: `external_participant_intra_state_side`

Dataset citation: Noonan & Teorell (2023)

Merge scores:

Non-missing observations in original unit: Sum: 133, Percent: 0.44

Non-missing observations in chosen unit: Sum: 119, Percent: 0.4

Lost observations in chosen unit: Sum: 14 Percent: 10.53

Description:

Indicator which classifies `external_participant_intra_state` as either participating in a war as (1) against the government, (2) in support of the government

3.1.2.9 Extra War (`extra_war`)

Long tag: `hdata_conflict_cy_extra_war`

Original tag: `extra_war`

Dataset citation: Noonan & Teorell (2023)

Merge scores:

Non-missing observations in original unit: Sum: 18740, Percent: 62.65

Non-missing observations in chosen unit: Sum: 6591, Percent: 21.99

Lost observations in chosen unit: Sum: 12149 Percent: 64.83

Description:

Indicator for extrasystemic war (between as state and a non-state group outside its own territory) participation (1 = extrasystemic war participation during the year)

3.1.2.10 Count Extra War Name (`count_extra_war`)

Long tag: `hdata_conflict_cy_count_extra_war`

Original tag: `count_extra_war`

Dataset citation: Noonan & Teorell (2023)

Merge scores:

Non-missing observations in original unit: Sum: 18740, Percent: 62.65

Non-missing observations in chosen unit: Sum: 6591, Percent: 21.99

Lost observations in chosen unit: Sum: 12149 Percent: 64.83

Description:

The number of extra systemic wars

3.1.2.11 Extra War Name (extra_war_name)

Long tag: hdata_conflict_cy_extra_war_name

Original tag: extra_war_name

Dataset citation: Noonan & Teorell (2023)

Merge scores:

Non-missing observations in original unit: Sum: 199, Percent: 0.67

Non-missing observations in chosen unit: Sum: 185, Percent: 0.62

Lost observations in chosen unit: Sum: 14 Percent: 7.04

Description:

Name of the extra systemic war(s)

3.2 H-DATA Foreign Minister Dataset

Dataset tag: hdata_fomin

Output Unit: H-DATA Minister-Year, i.e., data is collected per foreign minister and the date they got into office. That means each row in the dataset can be identified by one minister in combination with a date, using the columns foreignminister and date_in. The date_in column does not exist in the original dataset but is a concatenation of the columns fminyear, fminmonth and fminday. Several other columns, such as date_out, country_name, etc. are added to the unit table in order to aggregate and later translate to other Output Units.

Description: For their article "War, Performance, and the Survival of Foreign Ministers", Hanna Bäck, Jan Teorell, Alexander Von Hagen-Jamar and Alejandro Quiroz Flores created The Foreign Minister Dataset. The Foreign Minister Dataset consists of comparative historical data on foreign ministers' background and reasons for leaving office in the world's 13 former and current great powers from 1789 to the present. The data covers 1155 regular (non-acting) foreign ministers, as well as partial information on 173 acting foreign ministers, for the following 13 great powers: Austria (the Habsburg Empire/Austria-Hungary), Britain, China (Qing Empire/Republic/People's Republic of China), France, Italy, Japan, the Netherlands, Prussia/Germany, the Ottoman Empire/Turkey, Russia, Spain, Sweden and the United States.

Dataset citation: When using this dataset, please cite the following paper:

Hanna Bäck, Jan Teorell, Alexander Von Hagen-Jamar, Alejandro Quiroz Flores, War, Performance, and the Survival of Foreign Ministers, *Foreign Policy Analysis*, Volume 17, Issue 2, April 2021, oraa024, <https://doi.org/10.1093/fpa/oraa024>

License: CC-BY-SA 4.0 International
<https://creativecommons.org/licenses/by-sa/4.0/legalcode>

More detailed information on the dataset can be found at the following web page:
<https://www.su.se/english/research/research-projects/h-data/datasets-1.610144>

3.2.1 Military Background

Variables providing information on to which extent the foreign minister has a military background.

3.2.1.1 Military: Combat (mili_combat)

Long tag: hdata_fomin_mili_combat

Original tag: Mili_combat

Dataset citation: Bäck et al. (2021)

Merge scores:

Non-missing observations in original unit: Sum: 0, Percent: 0

Non-missing observations in chosen unit: Sum: 2582, Percent: 8.61

Description:

Did the FM have combat experience before (each) appointment as FM? Participating in combat is defined as deployment as part of a national military in what would generally be considered a war zone (absent evidence of non- participation), deployment/general participation in a battle, or affirmative evidence of direct combat. Note that this does not require affirmative evidence of a given person firing a weapon.

1. No
2. Yes

3.2.1.2 Military: Combat (War) (combat_war)

Long tag: hdata_fomin_combat_war

Original tag: Combat_war

Dataset citation: Bäck et al. (2021)

Merge scores:

Non-missing observations in original unit: Sum: 0, Percent: 0

Non-missing observations in chosen unit: Sum: 2612, Percent: 8.71

Description:

Free text the war that FM was in combat in, if multiple use commas. If mili_combat=1, enter 9999.

3.2.1.3 Military: Rebel (rebel)

Long tag: hdata_fomin_rebel

Original tag: Rebel

Dataset citation: Bäck et al. (2021)

Merge scores:

Non-missing observations in original unit: Sum: 0, Percent: 0

Non-missing observations in chosen unit: Sum: 2582, Percent: 8.61

Description:

Did the FM have experience of rebel organisations before (each) appointment? Rebel is defined as those that participate in actions designed to fight against the state or overturn the state. Thus, someone that participates in a coup counts as a rebel even if the coup is non-violent, because coup plotters take on the risk of violence (and the risks if they are caught) in attempting a coup. Someone is also a rebel if they are fighting against the ruling government in a territory, even if they believe that ruling government is illegitimate. Thus, the category of rebel includes both future autocratic leaders such as Mao Zedong as well as future democratic leaders such as Charles de Gaulle.

1. No
2. Yes

3.2.2 Position

These variables give information on the position of the foreign minister.

3.2.2.1 Manner out (manner_out)

Long tag: hdata_fomin_manner_out

Original tag: Manner_out

Dataset citation: Bäck et al. (2021)

Merge scores:

Non-missing observations in original unit: Sum: 0, Percent: 0

Non-missing observations in chosen unit: Sum: 2583, Percent: 8.62

Description:

How did the FM leave the post as FM? Removal from office is coded as 'regular' when the FM is removed in accordance with explicit rules or established conventions of his or her particular country. Examples include voluntary retirement, dismissal by head of government ('forced resignation') and defeat in elections. Removal from office is coded as 'irregular' when the FM was removed by domestic forces in contravention of explicit rules and established conventions. Irregular removal from office is overwhelmingly the result of the threat or use of force as exemplified in coups, (popular) revolts and assassinations (regardless of whether the motivation behind the assassination was explicitly political or not). Foreign removal includes only cases where a foreign state directly removes a foreign leader, for example through invasion or kidnapping. In particular, cases where someone is seen as orchestrating a removal of a leader through a coup carried out by domestic forces are not coded as foreign removal, but as an irregular procedure.

1. By regular procedures
2. Death by natural causes
3. Retired due to ill health
4. Suicide
5. By irregular procedures
6. By deposition by a foreign state

4 QOG

The **Quality of Government (QoG)** Institute was founded in 2004 by Professor Bo Rothstein and Professor Sören Holmberg. It is an independent research institute within the Department of Political Science at the University of Gothenburg. QoG is comprised of about 30 researchers who conduct and promote research on the causes, consequences and nature of Good Governance and the Quality of Government (QoG) - that is, trustworthy, reliable, impartial, uncorrupted and competent government institutions. QoG's award-winning datasets focus on concepts related to quality of government, transparency, and public administration. The main objective of QoG's research is to address the theoretical and empirical problem of how political institutions of high quality can be created and maintained. A second objective is to study the effects of Quality of Government on a number of policy areas, such as health, the environment, social policy, and poverty. The QoG datasets draw on a number of freely available datasources. More information on how the variables are compiled for different QoG datasets can be found in the respective QoG codebooks available on their website. More information is available on the project's website: <https://www.gu.se/en/quality-government>

4.1 QoG Environmental Indicators Dataset

Dataset tag: qog_ei

Output Unit: QoG Country-Year, i.e., data is collected per country and year. That means there is one row for each combination of country and year in the dataset. This unit is identified using the cname column and the year column.

Description: The Quality of Government Environmental Indicators Dataset (QoG-EI) is a compilation of major freely available indicators measuring environmental performance of countries over time.

Dataset citation: Povitkina, Marina, Natalia Alvarado Pachon Cem Mert Dalli. 2021. The Quality of Government Environmental Indicators Dataset, version Sep21. University of Gothenburg: The Quality of Government Institute, <https://www.gu.se/en/quality-government>

License: The QoG datasets are open and available, free of charge and without a need to register your data. You can use them for your analysis, graphs, teaching, and other academic-related and non-commercial purposes. We ask our users to cite always the original source(s) of the data and our datasets.

We do not allow other uses of these data including but not limited to redistribution, commercialization and other for-profit usage. If a user is interested in such use or has doubts about the license, they will have to refer to the original source and check with them if this is allowed and what requirements they need to fulfill.

Be mindful that the original data sources are the only owners of their data and they can adjust their license without previous warning.

More detailed information on the dataset can be found at the following web page: <https://www.gu.se/en/quality-government/qog-data/data-downloads/environmental-indicators-dataset>

4.1.1 Emergency Events Database

Dataset by: Centre for Research on the Epidemiology of Disasters EM-DAT is a global database on natural and technological disasters, containing essential core data on the occurrence and effects of more than 21,000 disasters in the world, from 1900 to present. EM-DAT is maintained by the Centre for Research on the Epidemiology of Disasters (CRED) at the School of Public Health of the Université catholique de Louvain located in Brussels, Belgium. The database is made up of

information from various sources, including UN agencies, non-governmental organizations, insurance companies, research institutes, and press agencies. Priority is given to data from UN agencies, governments, and the International Federation of Red Cross and Red Crescent Societies. This prioritization is not only a reflection of the quality or value of the data, it also reflects the fact that most reporting sources do not cover all disasters or have political limitations that could affect the figures. The entries are constantly reviewed for inconsistencies, redundancy, and incompleteness. CRED consolidates and updates data on a daily basis. A further check is made at monthly intervals, and revisions are made at the end of each calendar year. EM-DAT distinguishes between two generic categories for disasters: natural and technological. The natural disaster category is divided into 5 sub-groups - geophysical (e.g., earthquakes), meteorological (e.g., extreme temperature), hydrological (e.g., flood), climatological (e.g., drought), biological (e.g., epidemic), and extraterrestrial (e.g., asteroids). The 5 sub-groups in turn cover 15 disaster types and more than 30 sub-types. The technological disaster category is divided into 3 sub-groups - industrial, transport, and miscellaneous accidents, - which in turn cover 15 disaster types. For a disaster to be entered into the database at least one of the following criteria must be fulfilled: a) Ten (10) or more people reported killed; b) Hundred (100) or more people reported affected; c) Declaration of a state of emergency; d) Call for international assistance. Link to the original source: <https://www.emdat.be/>

4.1.1.1 Number of people killed by natural disasters (emdat_ndeath)

Long tag: qog_ei_emdat_ndeath

Original tag: emdat_ndeath

Dataset citation: Povitkina et al. (2021)

Variable citation: Guha-Sapir (2020)

Merge scores:

Non-missing observations in original unit: Sum: 5098, Percent: 33.34

Non-missing observations in chosen unit: Sum: 4787, Percent: 15.97

Lost observations in chosen unit: Sum: 311 Percent: 6.1

Description:

The number of people who lost their lives because the natural hazard happened and people whose whereabouts since the natural disaster is unknown, and who are presumed dead (official figure when available).

4.1.2 Green Growth

Dataset by: Organisation for Economic Co-operation and Development The OECD Green Growth database contains selected indicators for monitoring progress towards green growth to support policy making and inform the public at large. The database synthesises data and indicators across a wide range of domains including a range of OECD databases as well as external data sources. The database covers OECD member and accession countries, key partners (including Brazil, China, India, Indonesia and South Africa) and other selected non-OECD countries. The indicators have been selected according to well-specified criteria and embedded in a conceptual framework, which is structured around four groups to capture the main features of green growth: (1) Environmental and resource productivity: indicate whether economic growth is becoming greener with more efficient use of natural capital and to capture aspects of production which are rarely quantified in economic models and accounting frameworks; (2) The natural asset base: indicate the risks to growth from a declining natural asset base; (3) Environmental dimension of quality of life: indicate how environmental conditions affect the quality of life and wellbeing of people; (4) Economic opportunities and policy responses: indicate the effectiveness of policies in delivering green growth and describe the societal responses needed to secure business and employment opportunities. Link to the original source: <https://stats.oecd.org/>

4.1.2.1 Mortality from exposure to ambient ozone (gg_mao)

Long tag: qog_ei_gg_mao

Original tag: gg_mao

Dataset citation: Povitkina et al. (2021)

Variable citation: Organisation for Economic Co-operation and Development (OECD) (2020)

Merge scores:

Lost observations in chosen unit: Sum: 132 Percent: 6.49

Description:

The mortality from exposure to residential radon expressed in deaths per million inhabitants.

4.1.3 The International Social Survey Programme. Environment Module

Dataset by: International Social Survey Programme The International Social Survey Programme (ISSP) is an annual program of cross-national survey collaboration, covering a wide range of topics important for social science research. Since 1985 the ISSP provides international data sets, enabling

cross-cultural and cross-temporal research. "Environment" is one of the eleven ISSP topic modules. Central themes are attitudes towards environment-related issues, such as environmental protection, respondents' behavior, and respondents' preferences regarding governmental measures on environmental protection. This dataset includes two types of variables: 1) percentage of respondents choosing a particular response option, and 2) average response per country, unweighted, primarily because weights are unavailable for some countries. Correlation between weighted and unweighted means for countries that do provide weights is above .95 for most of the included variables and does not go below .89. Link to the original source: <https://www.gesis.org/en/issp/modules>

4.1.3.1 Taken part in a protest/demonstration about environmental issues (percent) (issp_22cp)

Long tag: qog_ei_issp_22cp

Original tag: issp_22cp

Dataset citation: Povitkina et al. (2021)

Variable citation: ISSP Research Group (1995, 2003, 2019)

Merge scores:

Non-missing observations in original unit: Sum: 74, Percent: 0.48

Non-missing observations in chosen unit: Sum: 71, Percent: 0.24

Lost observations in chosen unit: Sum: 3 Percent: 4.05

Description:

Percent of "yes"-replies to 22c: "In the last five years, have you taken part in a protest or demonstration about an environmental issue?"

In Environment III (2010) - question 22c.

In Environment II (2000) - question 21c.

In Environment I (1993) - question 21c.

A higher score means that more people participated in environmental protests in the 5 years prior to the survey. A lower score means that fewer people participated in environmental protests in the 5 years prior to the survey.

4.1.4 Sustainable Governance Indicators

Dataset by: Bertelsmann Stiftung The Sustainable Governance Indicators (SGI) is a platform built on a cross-national survey of governance that identifies reform needs in 41 EU and OECD countries. SGI explores how governments target sustainable development and advocate for more sustainable governance built on three pillars: 1) Policy Performance; 2) Democracy; and 3) Governance. Link to the original source: <https://www.sgi-network.org/2020/>

4.1.4.1 Participation in global environmental regimes (sgi_ger)

Long tag: qog_ei_sgi_ger

Original tag: sgi_ger

Dataset citation: Povitkina et al. (2021)

Merge scores:

Non-missing observations in original unit: Sum: 246, Percent: 1.61

Non-missing observations in chosen unit: Sum: 246, Percent: 0.82

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

The indicator measures the extent to which governments actively contribute to the design and advancement of global environmental protection regimes.

Protecting the climate and preserving natural resources worldwide depends on effective collective action carried out on a global level. Examples of active contribution include demonstrating

initiative and responsibility, acting as an agenda-setter within international frameworks, and/or achieving an alignment of purpose among conflicting interests in international negotiations.

The experts were invited to provide a paragraph addressing the following three aspects:

1. Which issues are treated as global common goods rather than domestic environmental problems (e.g., chemical pollution, biodiversity conservation, forest protection, climate protection, etc.)?

2. Which of these global issues or goals does the government address, and has it formulated and implemented action plans targeting these goals?

3. Are countries targeting the preservation of global common goods by contributing funds either through international facilities or official development assistance?

The indicator is based on the expert answers to these questions and varies from 0 to 10, where 1-2 is “The government does not contribute to international efforts to strengthen global environmental protection regimes,” and 9-10 is “The government actively contributes to international efforts to design and advance global environmental protection regimes. In most cases, it demonstrates commitment to existing regimes, contributes to their being advanced and has introduced appropriate reforms.”

4.1.5 World Development Indicators

Dataset by: The World Bank Group The primary World Bank collection of development indicators, compiled from officially-recognized international sources. This is an adaptation of an original work by The World Bank. Views and opinions expressed in the adaptation are the sole responsibility of the author or authors of the adaptation and are not endorsed by The World Bank. Link to the original source: <http://data.worldbank.org/data-catalog/world-developmentindicators>

4.1.5.1 Internally displaced persons, new displacement-disasters (number) (wdi_idpdis)

Long tag: qog_ei_wdi_idpdis

Original tag: wdi_idpdis

Dataset citation: Povitkina et al. (2021)

Variable citation: World Bank (2022)

Merge scores:

Non-missing observations in original unit: Sum: 1171, Percent: 7.66

Non-missing observations in chosen unit: Sum: 1101, Percent: 3.67

Lost observations in chosen unit: Sum: 70 Percent: 5.98

Description:

Internally displaced persons, new displacement associated with disasters (number of people). Internally displaced persons are defined according to the 1998 Guiding Principles (<http://www.internal-displacement.org/publications/1998/ocha-guiding-principles-on-internal-displacement>) as people or groups of people who have been forced or obliged to flee or to leave their homes or places of habitual residence, in particular as a result of armed conflict, or to avoid the effects of armed conflict, situations of generalized violence, violations of human rights, or natural or human-made disasters and who have not crossed an international border. “New Displacement” refers to the number of new cases or incidents of displacement recorded, rather than the number of people displaced. This is done because people may have been displaced more than once.

4.1.6 World Values Survey

Dataset by: World Values Survey The World Values Survey is a global network of social scientists studying changing values and their impact on social and political life, led by an international team of scholars, with the WVS association and secretariat headquartered in Stockholm, Sweden. The European Values Study started in 1981 when a thousand citizens in the European Member States of that time were interviewed using standardized questionnaires. Every nine years, the survey is repeated in a variable number of countries. The fourth wave in 2008 covers no less than 47 European countries/regions, from Iceland to Georgia and from Portugal to Norway. EVS is cooperating with WVS for the data collection in Europe and both datasets can be integrated. The variables are country averages calculated using the population weight provided by WVS/EVS. Link to the original source: <http://www.worldvaluessurvey.org/>

4.1.6.1 Participation in environmental protests (percent) (wvs_pedp)

Long tag: qog_ei_wvs_pedp

Original tag: wvs_pedp

Dataset citation: Povitkina et al. (2021)

Variable citation: EVS (2021, 2020), Haerpfer et al. (2021, 2020)

Merge scores:

Non-missing observations in original unit: Sum: 58, Percent: 0.38

Non-missing observations in chosen unit: Sum: 57, Percent: 0.19

Lost observations in chosen unit: Sum: 1 Percent: 1.72

Description:

Percent of "yes"-replies to the question: "During the past two years, have you participated in a demonstration for some environmental cause?". A higher score means that there are more people who have participated in environmental protests. A lower score means that there are fewer people who have participated in environmental protests.

4.2 QoG EU Regional Dataset Long Data

Dataset tag: qog_eureg_long

Output Unit: QoG NUTS Region-Year, i.e., data is collected per European NUTS region and year. This means that every row in the dataset can be identified through a combination of region and year. The unit can be expressed using the columns `region_code` and `year`. The unit can also be expressed through a combination of the columns `nuts0`, `nuts1` `nuts2` and `year`.

Description: The QoG EU Regional dataset is a dataset consisting of more than 300 variables covering three levels of European regions - Nomenclature of Territorial Units for Statistics (NUTS): NUTS0 (country), NUTS1(major socio-economic regions) and NUTS2 (basic regions for the application of regional policies).

The QoG Regional Data is presented in three different forms available in separate datasets. The variable are the same across all three dataset besides a varying suffix (`_nuts0`, `_nuts1`, `_nuts2`) indication which NUTS level is represented.

All datasets are available in time-series format. The first one (The QoG Regional Data - Long Form) is a dataset where data is presented in the long form. The list of units of analysis contains regions of all NUTS levels.

Two other datasets are presented in the wide form for multilevel analysis. In the second dataset (The QoG Regional Data - Wide Form NUTS1) includes NUTS1 level as the unit of analysis and variables represent the values for this level and corresponding lower level – NUTS0. As an example, in this dataset the data is presented only for East Sweden(Ostra Sverige SE1), as a unit of analysis and has values for lower levels of this region - Sweden (SE).

In the third dataset (The QoG Regional Data - Wide Form NUTS2) the unit of analysis is NUTS2 level regions and variables provide values as for every unit of analysis, as well as for corresponding lower NUTS levels: NUTS1 and NUTS0. One example of unit of analysis in this dataset is

Stockholm (SE11) and data for every variable will be for Stockholm, as well as for lower level regions - East Sweden (Ostra Sverige SE1) and Sweden (SE).

4.2.1 Demographics

This category includes variables describing the demographic characteristics of a population, such as its size, life-expectancy, fertility rates and death rates.

4.2.1.1 Reported number of cases of intentional homicide (eu_cri_inthom)

Long tag: qog_eureg_long_eu_cri_inthom

Original tag: eu_cri_inthom

Dataset citation: Charron et al. (2020)

Variable citation: European Commission (2023)

Merge scores:

Non-missing observations in original unit: Sum: 0, Percent: 0

Non-missing observations in chosen unit: Sum: 95, Percent: 0.32

Description:

Reported number of cases of intentional homicide. It is defined as intentional killing of a person, including murder, manslaughter, euthanasia and infanticide. Causing death by dangerous driving is excluded, as are abortion and help with suicide. Attempted (uncompleted) homicide is also excluded. The counting unit for homicide is normally the victim (rather than the case).

4.2.1.2 Reported number of cases of robbery (eu_cri_rob)

Long tag: qog_eureg_long_eu_cri_rob

Original tag: eu_cri_rob

Dataset citation: Charron et al. (2020)

Variable citation: European Commission (2023)

Merge scores:

Non-missing observations in original unit: Sum: 0, Percent: 0

Non-missing observations in chosen unit: Sum: 94, Percent: 0.31

Description:

Reported number of cases of robbery. Robbery is a sub-set of violent crime (see above). It is defined as stealing from a person with force or threat of force, including muggings (bag-snatching) and theft with violence. Pick-pocketing, extortion and blackmailing are generally not included.

4.2.1.3 Number of deaths of females, all ages (eu_death_totalf)

Long tag: qog_eureg_long_eu_death_totalf

Original tag: eu_death_totalf

Dataset citation: Charron et al. (2020)

Merge scores:

Non-missing observations in original unit: Sum: 0, Percent: 0

Non-missing observations in chosen unit: Sum: 0, Percent: 0

Lost observations in chosen unit: Sum: 0 Percent:

Description:

Crude rate of net migration plus statistical adjustment. Net migration including statistical adjustments the ratio of the net migration including statistical adjustment during the year to the average population in that year. The value is expressed per 1000 inhabitants. The crude rate of net migration is equal to the difference between the crude rate of population change and the crude rate of natural change (that is, net migration is considered as the part of population change not attributable to births and deaths). It is calculated in this way because immigration or emigration flows are either not available or the figures are not reliable.

4.2.2 Health

This category includes indicators describing the health of a population in a given country. These include reports about the prevalence of infectious diseases, and indicators such as birth rate, death rate, life expectancy. It also provides information on the capacity of the health care system, such as the number of hospital beds available.

4.2.2.1 Number of deaths by circulatory system diseases, female (eu_he_a_cs_f)

Long tag: qog_eureg_long_eu_he_a_cs_f

Non-missing observations in original unit: Sum: 0, Percent: 0

Non-missing observations in chosen unit: Sum: 774, Percent: 2.58

Description:

Injured victims in road accidents, per million inhabitants. It includes any person who as result of an injury accident was not killed immediately or not dying within 30 days, but sustained an injury, normally needing medical treatment, excluding attempted suicides. Persons with lesser wounds, such as minor cuts and bruises are not normally recorded as injured. An injured person is excluded if the competent authority declares the cause of the injury to be attempted suicide by that person, i.e. a deliberate act to injure oneself resulting in injury, but not in death.

Non-missing observations in original unit: Sum: 0, Percent: 0

Non-missing observations in chosen unit: Sum: 782, Percent: 2.61

Description:

Killed victims in road accidents, per million inhabitants. It includes any person killed immediately or dying within 30 days as a result of an injury accident, excluding suicides. A killed person is excluded if the competent authority declares the cause of death to be suicide, i.e. a deliberate act to injure oneself resulting in death. For countries that do not apply the threshold of 30 days, conversion coefficients are estimated so that comparisons on the basis of the 30 day-definition can be made.

4.3 QoG Standard Dataset Time-Series

Dataset tag: qog_std_ts

Output Unit: QoG Country-Year, i.e., data is collected per country and year. That means there is one row for each combination of country and year in the dataset. This unit is identified using the cname column and the year column.

Description: The QoG Standard dataset is our largest dataset. It consists of approximately 2100 variables from more than 100 data sources related to Quality of Government. In the QoG Standard TS dataset, data from 1946 to 2023 is included and the unit of analysis is country-year (e.g., Sweden-1946, Sweden-1947, etc.).

Dataset citation: Teorell, Jan, Aksel Sundström, Sören Holmberg, Bo Rothstein, Natalia Alvarado Pachon, Cem Mert Dalli, Rafael Lopez Valverde Paula Nilsson. 2024. The Quality of Government Standard Dataset, version Jan24. University of Gothenburg: The Quality of Government Institute, <https://www.gu.se/en/quality-government> doi:10.18157/qogstdjan24

Link to original codebook

License: The QoG datasets are open and available, free of charge and without a need to register your data. You can use them for your analysis, graphs, teaching, and other academic-related and non-commercial purposes. We ask our users to cite always the original source(s) of the data and our datasets.

We do not allow other uses of these data including but not limited to redistribution, commercialization and other for-profit usage. If a user is interested in such use or has doubts about

the license, they will have to refer to the original source and check with them if this is allowed and what requirements they need to fulfill.

Be mindful that the original data sources are the only owners of their data and they can adjust their license without previous warning.

More detailed information on the dataset can be found at the following web page:
<https://www.gu.se/en/quality-government/qog-data/data-downloads/standard-dataset>

4.3.1 Quality of Government

This category includes variables that are the core features of QoG (impartiality, bureaucratic quality and corruption) as well as measures that are broader (rule of law and transparency).

4.3.1.1 Public management sub-index (aii_pubm)

Long tag: qog_std_ts_aii_pubm

Original tag: aii_pubm

Dataset citation: Teorell et al. (2024)

Variable citation: Global Integrity and African Institute for Development Policy (2023)

Merge scores:

Non-missing observations in original unit: Sum: 540, Percent: 3.53

Non-missing observations in chosen unit: Sum: 520, Percent: 1.73

Lost observations in chosen unit: Sum: 20 Percent: 3.7

Description:

Public Management. This sub-index from 0 to 100 is composed of:

35. In law, civil servants are required to report cases of alleged corruption.
36. In law, civil servants who report cases of corruption are protected from recrimination or other negative consequences.
37. In law, there are formal rules to prevent conflicts of interest, nepotism, cronyism, and patronage in all branches of government.
38. In practice, civil servants' work is not compromised by political interference.
39. In practice, civil servants are appointed and evaluated according to professional criteria.
40. In law, there are restrictions for civil servants entering the private sector after leaving the government.

4.3.1.2 State Fragility Index (cspf_sfi)

Long tag: qog_std_ts_cspf_sfi

Original tag: cspf_sfi

Dataset citation: Teorell et al. (2024)

Variable citation: Marshall & Elzinga-Marshall (2017)

Merge scores:

Non-missing observations in original unit: Sum: 3949, Percent: 25.83

Non-missing observations in chosen unit: Sum: 3825, Percent: 12.76

Lost observations in chosen unit: Sum: 124 Percent: 3.14

Description:

A country's fragility is closely associated with its state capacity to manage conflict; make and

implement public policy; and deliver essential services and its systemic resilience in maintaining system coherence, cohesion, and quality of life; responding effectively to challenges and crises, and sustaining progressive development. State Fragility = Effectiveness Score + Legitimacy Score (25 points possible).

4.3.2 Conflict and Military Service

This category includes variables concerning armed conflict, including civil war and terrorism, government revenue and spending related to violent conflict (military expenditure, arms imports, military personnel).

4.3.2.1 Member of an Alliance (atop_ally)

Long tag: qog_std_ts_atop_ally

Original tag: atop_ally

Dataset citation: Teorell et al. (2024)

Variable citation: Leeds et al. (2002)

Merge scores:

Non-missing observations in original unit: Sum: 9406, Percent: 61.51

Non-missing observations in chosen unit: Sum: 8388, Percent: 27.99

Lost observations in chosen unit: Sum: 1018 Percent: 10.82

Description:

Member of an Alliance

- 0. Not a member of an alliance
- 1. Member of an alliance

4.3.2.2 Consultancy Obligation (atop_consult)

Long tag: qog_std_ts_atop_consult

Original tag: atop_consult

Dataset citation: Teorell et al. (2024)

Variable citation: Leeds et al. (2002)

Merge scores:

Non-missing observations in original unit: Sum: 9406, Percent: 61.51

Non-missing observations in chosen unit: Sum: 8388, Percent: 27.99

Lost observations in chosen unit: Sum: 1018 Percent: 10.82

Description:

Consultancy Obligation

- 0. Has no Consultancy obligations
- 1. Has Consultancy obligations

4.3.2.3 Defensive Obligation (atop_defensive)

Long tag: qog_std_ts_atop_defensive

Original tag: atop_defensive

Dataset citation: Teorell et al. (2024)

Variable citation: Leeds et al. (2002)

Merge scores:

Non-missing observations in original unit: Sum: 9406, Percent: 61.51

Non-missing observations in chosen unit: Sum: 8388, Percent: 27.99

Lost observations in chosen unit: Sum: 1018 Percent: 10.82

Description:

Offensive Obligation

0. Has no offensive obligations

1. Has offensive obligations

4.3.2.8 Commitment start (atop_transyr)

Long tag: qog_std_ts_atop_transyr

Original tag: atop_transyr

Dataset citation: Teorell et al. (2024)

Variable citation: Leeds et al. (2002)

Merge scores:

Non-missing observations in original unit: Sum: 9406, Percent: 61.51

Non-missing observations in chosen unit: Sum: 8388, Percent: 27.99

Lost observations in chosen unit: Sum: 1018 Percent: 10.82

Description:

Transition Year. 1 if any commitment starts or ends in the given year, indicating that some commitment is not in effect for the full year.

4.3.2.9 Global Militarization Index (bicc_gmi)

Long tag: qog_std_ts_bicc_gmi

Original tag: bicc_gmi

Dataset citation: Teorell et al. (2024)

Variable citation: Bayer, Markus and Rohleder, Paul (2022)

Merge scores:

Non-missing observations in original unit: Sum: 4783, Percent: 31.28

Non-missing observations in chosen unit: Sum: 4651, Percent: 15.52

Lost observations in chosen unit: Sum: 132 Percent: 2.76

Description:

The Global Militarization Index is divided into three overarching categories: expenditure, personnel and heavy weapons. (See variables `bicc_milexp`, `bicc_milper`, and `bicc_hw`).

In order to increase the compatibility between different indicators and preventing extreme values from crating distortions when normalizing data, in a first step every indicator was represented in a logarithm with the factor 10. Second, all data was normalized using the formula $x=(y-\min)/(\max-\min)$, with min and max representing, respectively, the lowest and the highest value of the logarithm. In a third step, every indicator was weighted in accordance to a subjective factor, reflecting the relative importance attributed to it by BICC researchers. In order to calculate the final score, the weighted indicators were added together and then normalized one last time on a scale ranging from 0 to 1,000. For better comparison of individual years, all years were finally normalized.

Weighting Factors used:

Military expenditures as percentage of GDP - 5

Military expenditures in relation to health spending - 3

Military and paramilitary personnel in relation to population - 4

Military reserves in relation to population - 2

Military and paramilitary personnel in relation to physicians - 2

Heavy weapons in relation to population - 4

4.3.2.10 Heavy Weapons Index (*bicc_hw*)

Long tag: qog_std_ts_bicc_hw

Original tag: bicc_hw

Dataset citation: Teorell et al. (2024)

Variable citation: Bayer, Markus and Rohleder, Paul (2022)

Merge scores:

Non-missing observations in original unit: Sum: 4783, Percent: 31.28

Non-missing observations in chosen unit: Sum: 4651, Percent: 15.52

Lost observations in chosen unit: Sum: 132 Percent: 2.76

Description:

The GMI takes into consideration the number of an armed forces' heavy weapons in relation to the total population. Heavy weapons are defined here as any piece of military equipment which fits into either one of four categories: armored vehicles (armored personnel carriers, light tanks, main battle tanks), artillery (multiple rocket launchers, self-propelled artillery, towed artillery) above 100mm caliber, combat aircraft (attack helicopters, fixed-wing fighter aircraft), and major fighting ships (submarines, major surface combatants above corvette size).

Data on weapons holdings was collected by BICC from different sources, mainly the Military Balance from ISS. Data on small arms and light weapons (SALW) is not only extremely difficult to obtain but also unreliable and was thus not included in the GMI.

4.3.2.11 Military Expenditure Index (*bicc_milexp*)

Long tag: qog_std_ts_bicc_milexp

Original tag: bicc_milexp

Dataset citation: Teorell et al. (2024)

Variable citation: Bayer, Markus and Rohleder, Paul (2022)

Merge scores:

Non-missing observations in original unit: Sum: 4783, Percent: 31.28

Non-missing observations in chosen unit: Sum: 4651, Percent: 15.52

Lost observations in chosen unit: Sum: 132 Percent: 2.76

Description:

Military spending in relation to GDP and health spending are the most important indicators for determining the level of militarization. Financial resources which are made available via the military budget by a government are an important factor which affects capacities and size of a state's armed forces. The other indicator the GMI uses is the comparison between the total military budget and government spending on health services.

Figures for military expenditure are compiled from the data base of the Stockholm Peace Research Institute SIPRI. Even though SIPRI may currently be regarded as the most reliable

source, data on military expenditure has to be treated with extreme caution. For many countries, especially in the developing world and autocratic states, the figures are but rough estimates. In cases where SIPRI does not provide any up-to-date information, we adopted the latest available figures provided they were no older than three years.

Data on gross domestic product was taken from the International Monetary Fund. Data on health expenditure used have been extracted from the data base of the World Health Organization.

4.3.2.12 Military Personnel Index (*bicc_milper*)

Long tag: qog_std_ts_bicc_milper

Original tag: bicc_milper

Dataset citation: Teorell et al. (2024)

Variable citation: Bayer, Markus and Rohleder, Paul (2022)

Merge scores:

Non-missing observations in original unit: Sum: 4783, Percent: 31.28

Non-missing observations in chosen unit: Sum: 4651, Percent: 15.52

Lost observations in chosen unit: Sum: 132 Percent: 2.76

Description:

The level of militarization is also represented by the relation of military personnel to the total population and physicians. The first and most important indicator in this category is the active (para)military personnel to the total population. Paramilitary personnel were included here, since in many countries the regular military alone does not adequately reflect the total size of the armed forces.

The main criterion for coding an organizational entity as either military or paramilitary is that the forces in question are under the direct control of the government in addition to being armed, uniformed and garrisoned.

For a comprehensive presentation of the available personnel and an adequate representation of the relative level of militarization, a second indicator in this category takes into account the percentage of reserve forces in the total population. This factor is relevant for some countries, such as Switzerland that have a comparably small standing army but a more substantial amount of available reserves within society. The third indicator compares the total amount of military and paramilitary forces with the number of physicians in a country in order to express the relation between military and non-military expertise in a society.

All data on military personnel was compiled from the Military Balance, the yearbook published by the Institute for Strategic and International Studies (IISS). Population size figures were taken from the Vital Statistics Report of the United Nations; data on the number of physicians from the World Health Organization.

4.3.2.13 Conflict Intensity (*bti_ci*)

Long tag: qog_std_ts_bti_ci

Original tag: bti_ci

Dataset citation: Teorell et al. (2024)

Variable citation: Donner et al. (2022)

Merge scores:

Non-missing observations in original unit: Sum: 1153, Percent: 7.54

Non-missing observations in chosen unit: Sum: 1113, Percent: 3.71

Lost observations in chosen unit: Sum: 40 Percent: 3.47

Description:

How serious are social, ethnic, and religious conflicts? From 1 to 10.

1. There are no violent incidents based on social, ethnic, or religious differences.
4. There are only a few violent incidents. Radical political actors have limited success in mobilizing along existing cleavages. Society and the political elite, however, are divided along social, ethnic, or religious lines.
7. There are violent incidents. Mobilized groups and protest movements dominate politics. Society and the political elite are deeply split into social classes, ethnic or religious communities.
10. There is a civil war or a widespread violent conflict based on social, ethnic, or religious differences.

4.3.2.14 Monopoly on the Use of Force (bti_muf)

Long tag: qog_std_ts_bti_muf

Original tag: bti_muf

Dataset citation: Teorell et al. (2024)

Variable citation: Donner et al. (2022)

Merge scores:

Non-missing observations in original unit: Sum: 1153, Percent: 7.54

Non-missing observations in chosen unit: Sum: 1113, Percent: 3.71

Lost observations in chosen unit: Sum: 40 Percent: 3.47

Description:

To what extent does the state's monopoly on the use of force cover the entire territory of the country? From 1 to 10.

1. There is no state monopoly on the use of force.
4. The state's monopoly on the use of force is established only in key parts of the country. Large areas of the country are controlled by guerrillas, paramilitaries or clans.
7. The state's monopoly on the use of force is established nationwide in principle, but it is challenged by guerrillas, mafias or clans in territorial enclaves.
10. There is no competition with the state's monopoly on the use of force throughout the entire territory.

4.3.2.15 Number of leader transitions in the year (chisols_totalldrtrans)

Long tag: qog_std_ts_chisols_totalldrtrans

Original tag: chisols_totalldrtrans

Dataset citation: Teorell et al. (2024)

Variable citation: Mattes et al. (2016)

Merge scores:

Non-missing observations in original unit: Sum: 9511, Percent: 62.2

Non-missing observations in chosen unit: Sum: 9039, Percent: 30.16

Lost observations in chosen unit: Sum: 472 Percent: 4.96

Description:

This variable codes the number of leader transitions in the year of reference. The authors rely on existing data by Goemans, Gleditsch, and Chiozza (2009) to determine leaders and leadership changes. This database (Archigos v. 4.1 for the 5th version of this dataset) identifies the effective primary ruler and the dates the leader was in power for each independent state, as coded by Gleditsch and Ward (1999), between 1875 and 2014.

The authors code the leader transition as occurring on the day the new leader assumes power. Thus, if one leader departs from office in December and the new leader takes power in January, the leader who left office in December will continue to be listed as the first leader in January until the transition occurs.

4.3.2.16 Political Terror Scale - Amnesty International (gd_ptsa)

Long tag: qog_std_ts_gd_ptsa

Original tag: gd_ptsa

Dataset citation: Teorell et al. (2024)

Variable citation: Gibney et al. (2020)

Merge scores:

Non-missing observations in original unit: Sum: 6025, Percent: 39.4

Non-missing observations in chosen unit: Sum: 5698, Percent: 19.01

Lost observations in chosen unit: Sum: 327 Percent: 5.43

Description:

Political Terror Scale Levels from the yearly country reports of Amnesty International:

1. Countries under a secure rule of law, people are not imprisoned for their view, and torture is rare or exceptional. Political murders are extremely rare.
2. There is a limited amount of imprisonment for nonviolent political activity. However, few persons are affected, torture and beatings are exceptional. Political murder is rare.
3. There is extensive political imprisonment, or a recent history of such imprisonment. Execution or other political murders and brutality may be common. Unlimited detention, with or without a trial, for political views is accepted.
4. Civil and political rights violations have expanded to large numbers of the population. Murders, disappearances, and torture are a common part of life. In spite of its generality, on this level terror affects those who interest themselves in politics or ideas.
5. Terror has expanded to the whole population. The leaders of these societies place no limits on the means or thoroughness with which they pursue personal or ideological goals.

4.3.2.17 Political Terror Scale - Human Rights Watch (gd_ptsh)

Long tag: qog_std_ts_gd_ptsh

Original tag: gd_ptsh

Dataset citation: Teorell et al. (2024)

Variable citation: Gibney et al. (2020)

Merge scores:

Non-missing observations in original unit: Sum: 826, Percent: 5.4

Non-missing observations in chosen unit: Sum: 802, Percent: 2.68

Lost observations in chosen unit: Sum: 24 Percent: 2.91

Description:

Political Terror Scale Levels from the Human Rights Watch's World Reports:

1. Countries under a secure rule of law, people are not imprisoned for their view, and torture is rare or exceptional. Political murders are extremely rare.
2. There is a limited amount of imprisonment for nonviolent political activity. However, few persons are affected, torture and beatings are exceptional. Political murder is rare.
3. There is extensive political imprisonment, or a recent history of such imprisonment. Execution or other political murders and brutality may be common. Unlimited detention, with or without a trial, for political views is accepted.
4. Civil and political rights violations have expanded to large numbers of the population. Murders, disappearances, and torture are a common part of life. In spite of its generality, on this level terror affects those who interest themselves in politics or ideas.
5. Terror has expanded to the whole population. The leaders of these societies place no limits on the means or thoroughness with which they pursue personal or ideological goals.

4.3.2.18 Political Terror Scale - US State Department (gd_ptss)

Long tag: qog_std_ts_gd_ptss

Original tag: gd_ptss

Dataset citation: Teorell et al. (2024)

Variable citation: Gibney et al. (2020)

Merge scores:

Non-missing observations in original unit: Sum: 7987, Percent: 52.23

Non-missing observations in chosen unit: Sum: 7087, Percent: 23.64

Lost observations in chosen unit: Sum: 900 Percent: 11.27

Description:

Political Terror Scale Levels from the the U.S. State Department Country Reports on Human Rights Practices:

1. Countries under a secure rule of law, people are not imprisoned for their view, and torture is rare or exceptional. Political murders are extremely rare.
2. There is a limited amount of imprisonment for nonviolent political activity. However, few persons are affected, torture and beatings are exceptional. Political murder is rare.
3. There is extensive political imprisonment, or a recent history of such imprisonment. Execution or other political murders and brutality may be common. Unlimited detention, with or without a trial, for political views is accepted.
4. Civil and political rights violations have expanded to large numbers of the population. Murders, disappearances, and torture are a common part of life. In spite of its generality, on this level terror affects those who interest themselves in politics or ideas.
5. Terror has expanded to the whole population. The leaders of these societies place no limits on the means or thoroughness with which they pursue personal or ideological goals.

4.3.2.19 Ongoing Conflict (gpi_conf)

Long tag: qog_std_ts_gpi_conf

Original tag: gpi_conf

Dataset citation: Teorell et al. (2024)

Variable citation: Nohlen et al. (1999, 2002), Nohlen (2005), Nohlen & Stöver (2010), (IPU), Chronicle of Parliamentary Elections (IPU), Election Guide

Merge scores:

Non-missing observations in original unit: Sum: 2540, Percent: 16.61

Non-missing observations in chosen unit: Sum: 2472, Percent: 8.25

Lost observations in chosen unit: Sum: 68 Percent: 2.68

Description:

Ongoing Domestic and International Conflict (scaled 1 to 5, 5 refers to higher intensity of conflict) is one of the three subdomains of the GPI. It investigates the extent to which countries are involved in internal and external conflicts, as well as their role and duration of involvement in conflicts.

4.3.2.20 Militarisation (gpi_mil)

Long tag: qog_std_ts_gpi_mil

Original tag: gpi_mil

Dataset citation: Teorell et al. (2024)

Variable citation: Nohlen et al. (1999, 2002), Nohlen (2005), Nohlen & Stöver (2010), (IPU), Chronicle of Parliamentary Elections (IPU), Election Guide

Merge scores:

Non-missing observations in original unit: Sum: 2540, Percent: 16.61

Non-missing observations in chosen unit: Sum: 2472, Percent: 8.25

Lost observations in chosen unit: Sum: 68 Percent: 2.68

Description:

Militarisation (scaled 1 to 5, 5 being more militarised) is one of the three subdomains of the GPI. It reflects the link between a country's level of military build-up and access to weapons and its level of peacefulness, both domestically and internationally.

4.3.2.21 Executive Power over Military Force (iaep_epmf)

Long tag: qog_std_ts_iaep_epmf

Original tag: iaep_epmf

Dataset citation: Teorell et al. (2024)

Variable citation: Wig et al. (2015)

Merge scores:

Non-missing observations in original unit: Sum: 6397, Percent: 41.84

Non-missing observations in chosen unit: Sum: 6089, Percent: 20.31

Lost observations in chosen unit: Sum: 308 Percent: 4.81

Description:

Does an executive have the power to use military force abroad without legislative approval?

0. No

1. Yes

Source: IAEP (Wig et al., 2015)

4.3.2.22 Societal Violence Scale Index (svs_ind)

Long tag: qog_std_ts_svs_ind

Original tag: sv_s_ind

Dataset citation: Teorell et al. (2024)

Variable citation: Gibney et al. (2021)

Merge scores:

Non-missing observations in original unit: Sum: 728, Percent: 4.76

Non-missing observations in chosen unit: Sum: 637, Percent: 2.13

Lost observations in chosen unit: Sum: 91 Percent: 12.5

Description:

The Societal Violence Scale is coded on a 5-point scale where:

1 - Societal violence is limited in scope and severity, with relatively few victims and few perpetrators.

2 - Societal violence is a problem, affecting a significant number of victims, albeit across few victim categories and of a less severe nature.

3 - Societal violence is widespread and serious in nature. It affects a significant number of people across several victim categories.

4 - Societal violence is pervasive in scope, severe in nature, assumes a variety of forms and affects a large proportion of the population typically across several victim categories and perpetrators.

5 - Societal violence is ubiquitous in scope, egregious in nature and assumes a variety of forms. It affects a large proportion of the population, commonly crossing numerous victim groups and perpetrators.

4.3.2.23 Number of extrasystemic armed conflicts (ucdp_type1)

Long tag: qog_std_ts_ucdp_type1

Original tag: ucdp_type1

Dataset citation: Teorell et al. (2024)

Variable citation: Davies et al. (2023), Gleditsch et al. (2002), Pettersson (2023)

Merge scores:

Non-missing observations in original unit: Sum: 73, Percent: 0.48

Non-missing observations in chosen unit: Sum: 73, Percent: 0.24

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

Number of extrasystemic armed conflicts per country in a given year. Extrasystemic armed conflict occurs between a state and a non-state group outside its own territory. (In the COW project, extrasystemic war is subdivided into colonial war and imperial war, but this distinction is not used here.) These conflicts are by definition territorial, since the government side is fighting to retain control of a territory outside the state system.

4.3.2.24 Number of interstate armed conflicts (ucdp_type2)

Long tag: qog_std_ts_ucdp_type2

Original tag: ucdp_type2

Dataset citation: Teorell et al. (2024)

Variable citation: Davies et al. (2023), Gleditsch et al. (2002), Pettersson (2023)

Merge scores:

Non-missing observations in original unit: Sum: 426, Percent: 2.79

Non-missing observations in chosen unit: Sum: 412, Percent: 1.37

Lost observations in chosen unit: Sum: 14 Percent: 3.29

Description:

Number of interstate armed conflicts per country in a given year. An interstate armed conflict occurs between two or more states.

4.3.2.25 Number of internal armed conflicts (ucdp_type3)

Long tag: qog_std_ts_ucdp_type3

Original tag: ucdp_type3

Dataset citation: Teorell et al. (2024)

Variable citation: Davies et al. (2023), Gleditsch et al. (2002), Pettersson (2023)

Merge scores:

Non-missing observations in original unit: Sum: 1363, Percent: 8.91

Non-missing observations in chosen unit: Sum: 1293, Percent: 4.31

Lost observations in chosen unit: Sum: 70 Percent: 5.14

Description:

Number of internal armed conflicts per country in a given year. Internal armed conflict occurs between the government of a state and one or more internal opposition group(s) without intervention from other states.

4.3.2.26 Number of internationalized internal armed conflicts (ucdp_type4)

Long tag: qog_std_ts_ucdp_type4

Original tag: ucdp_type4

Dataset citation: Teorell et al. (2024)

Variable citation: Davies et al. (2023), Gleditsch et al. (2002), Pettersson (2023)

Merge scores:

Non-missing observations in original unit: Sum: 1848, Percent: 12.09

Non-missing observations in chosen unit: Sum: 1780, Percent: 5.94

Lost observations in chosen unit: Sum: 68 Percent: 3.68

Description:

Number of internationalized internal armed conflicts per country in a given year. An internationalized internal armed conflict occurs between the government of a state and one or more internal opposition group(s) with intervention from other states (secondary parties) on one or both sides.

4.3.2.27 Global Terrorism Index (voh_gti)

Long tag: qog_std_ts_voh_gti

Original tag: voh_gti

Dataset citation: Teorell et al. (2024)

Variable citation: Institute for Economics and Peace (2022)

Merge scores:

Non-missing observations in original unit: Sum: 1771, Percent: 11.58

Non-missing observations in chosen unit: Sum: 1727, Percent: 5.76

Lost observations in chosen unit: Sum: 44 Percent: 2.48

Description:

The Global Terrorism Index ranks 163 countries based on four indicators weighted over five years. A country's annual Global Terrorism Index score is based on a unique scoring system to account for the relative impact of incidents in the year.

The four factors counted in each country's yearly score are:

- (1) total number of terrorist incidents in a given year
- (2) total number of fatalities caused by terrorists in a given year
- (3) total number of injuries caused by terrorists in a given year

(4) total number of hostages caused by terrorists in a given year

Each of the factors is weighted between zero and three, and a five year weighted average is applied in a bid to reflect the latent psychological effect of terrorist acts over time.

4.3.2.28 Political Stability and Absence of Violence/Terrorism, Estimate (wbgi_pve)

Long tag: qog_std_ts_wbgi_pve

Original tag: wbgi_pve

Dataset citation: Teorell et al. (2024)

Variable citation: Kaufmann & Kraay (n.d.)

Merge scores:

Non-missing observations in original unit: Sum: 4587, Percent: 30

Non-missing observations in chosen unit: Sum: 4038, Percent: 13.47

Lost observations in chosen unit: Sum: 549 Percent: 11.97

Description:

Political Stability and Absence of Violence- Estimate: 'Political Stability and Absence of Violence/Terrorism' measures perceptions of the likelihood of political instability and/or politically-motivated violence, including terrorism.

4.3.2.29 Political Stability and Absence of Violence/Terrorism, Number of Sources (wbgi_pvn)

Long tag: qog_std_ts_wbgi_pvn

Original tag: wbgi_pvn

Dataset citation: Teorell et al. (2024)

Variable citation: Kaufmann & Kraay (n.d.)

Merge scores:

Non-missing observations in original unit: Sum: 4587, Percent: 30

Non-missing observations in chosen unit: Sum: 4038, Percent: 13.47

Lost observations in chosen unit: Sum: 549 Percent: 11.97

Description:

Political Stability and Absence of Violence - Number of Sources.

4.3.2.30 Political Stability and Absence of Violence/Terrorism, Standard Error (wbgi_pvs)

Long tag: qog_std_ts_wbgi_pvs

Description:

Armed forces personnel are active duty military personnel, including paramilitary forces if the training, organization, equipment, and control suggest they may be used to support or replace regular military forces.

4.3.2.33 Arms exports (SIPRI trend indicator values) (wdi_armexp)

Long tag: qog_std_ts_wdi_armexp

Original tag: wdi_armexp

Dataset citation: Teorell et al. (2024)

Variable citation: World Bank (2022)

Merge scores:

Non-missing observations in original unit: Sum: 15252, Percent: 99.74

Non-missing observations in chosen unit: Sum: 12060, Percent: 40.24

Lost observations in chosen unit: Sum: 3192 Percent: 20.93

Description:

Exports - Arms transfers cover the supply of military weapons through sales, aid, gifts, and those made through manufacturing licenses. Data cover major conventional weapons such as aircraft, armored vehicles, artillery, radar systems, missiles, and ships designed for military use. Excluded are transfers of other military equipment such as small arms and light weapons, trucks, small artillery, ammunition, support equipment, technology transfers, and other services.

4.3.2.34 Arms imports (SIPRI trend indicator values) (wdi_armimp)

Long tag: qog_std_ts_wdi_armimp

Original tag: wdi_armimp

Dataset citation: Teorell et al. (2024)

Variable citation: World Bank (2022)

Merge scores:

Non-missing observations in original unit: Sum: 15252, Percent: 99.74

Non-missing observations in chosen unit: Sum: 12060, Percent: 40.24

Lost observations in chosen unit: Sum: 3192 Percent: 20.93

Description:

Imports - Arms transfers cover the supply of military weapons through sales, aid, gifts, and those made through manufacturing licenses. Data cover major conventional weapons such as aircraft, armored vehicles, artillery, radar systems, missiles, and ships designed for military use. Excluded are transfers of other military equipment such as small arms and light weapons, trucks, small artillery, ammunition, support equipment, technology transfers, and other services.

4.3.2.35 Battle-related deaths (number of people) (wdi_brdeath)

Long tag: qog_std_ts_wdi_brdeath

Original tag: wdi_brdeath

Dataset citation: Teorell et al. (2024)

Variable citation: World Bank (2022)

Merge scores:

Non-missing observations in original unit: Sum: 1119, Percent: 7.32

Non-missing observations in chosen unit: Sum: 1061, Percent: 3.54

Lost observations in chosen unit: Sum: 58 Percent: 5.18

Description:

Battle-related deaths are deaths in battle-related conflicts between warring parties in the conflict dyad (two conflict units that are parties to a conflict). Typically, battle-related deaths occur in warfare involving the armed forces of the warring parties. This includes traditional battlefield fighting, guerrilla activities, and all kinds of bombardments of military units, cities, and villages, etc. The targets are usually the military itself and its installations or state institutions and state representatives, but there is often substantial collateral damage in the form of civilians being killed in crossfire, in indiscriminate bombings, etc. All deaths--military as well as civilian--incurred in such situations, are counted as battle-related deaths.

4.3.2.36 Military expenditure (percent of GDP) (wdi_expmil)

Long tag: qog_std_ts_wdi_expmil

Original tag: wdi_expmil

Dataset citation: Teorell et al. (2024)

Variable citation: World Bank (2022)

Merge scores:

Non-missing observations in original unit: Sum: 7527, Percent: 49.23

Non-missing observations in chosen unit: Sum: 7308, Percent: 24.38

Lost observations in chosen unit: Sum: 219 Percent: 2.91

Description:

Military expenditure (percent of GDP). Military expenditures data from SIPRI are derived from the NATO definition, which includes all current and capital expenditures on the armed forces, including peacekeeping forces; defense ministries and other government agencies engaged in defense projects; paramilitary forces, if these are judged to be trained and equipped for military operations; and military space activities. Such expenditures include military and civil personnel, including retirement pensions of military personnel and social services for personnel; operation and maintenance; procurement; military research and development; and military aid (in the military expenditures of the donor country). Excluded are civil defense and current expenditures for previous military activities, such as for veterans' benefits, demobilization, conversion, and destruction of weapons. This definition cannot be applied for all countries, however, since that would require much more detailed information than is available about what is included in military budgets and off-budget military expenditure items. (For example, military budgets might or might not cover civil defense, reserves and auxiliary forces, police and paramilitary forces, dual-purpose forces such as military and civilian police, military grants

in kind, pensions for military personnel, and social security contributions paid by one part of government to another).

4.3.2.37 Military expenditure (percent of general government expenditure) (wdi_expmilge)

Long tag: qog_std_ts_wdi_expmilge

Original tag: wdi_expmilge

Dataset citation: Teorell et al. (2024)

Variable citation: World Bank (2022)

Merge scores:

Non-missing observations in original unit: Sum: 4270, Percent: 27.92

Non-missing observations in chosen unit: Sum: 4168, Percent: 13.91

Lost observations in chosen unit: Sum: 102 Percent: 2.39

Description:

Military expenditure (percent of central government expenditure). Military expenditures data from SIPRI are derived from the NATO definition, which includes all current and capital expenditures on the armed forces, including peacekeeping forces; defense ministries and other government agencies engaged in defense projects; paramilitary forces, if these are judged to be trained and equipped for military operations; and military space activities. Such expenditures include military and civil personnel, including retirement pensions of military personnel and social services for personnel; operation and maintenance; procurement; military research and development; and military aid (in the military expenditures of the donor country). Excluded are civil defense and current expenditures for previous military activities, such as for veterans' benefits, demobilization, conversion, and destruction of weapons. This definition cannot be applied for all countries, however, since that would require much more detailed information than is available about what is included in military budgets and off-budget military expenditure items. (For example, military budgets might or might not cover civil defense, reserves and auxiliary forces, police and paramilitary forces, dual-purpose forces such as military and civilian police, military grants in kind, pensions for military personnel, and social security contributions paid by one part of government to another.)

4.3.2.38 Internally displaced persons, new displacement-disasters (number) (wdi_idpdis)

Long tag: qog_std_ts_wdi_idpdis

Original tag: wdi_idpdis

Dataset citation: Teorell et al. (2024)

Variable citation: World Bank (2022)

Merge scores:

Non-missing observations in original unit: Sum: 1570, Percent: 10.27

Non-missing observations in chosen unit: Sum: 1482, Percent: 4.94

Lost observations in chosen unit: Sum: 88 Percent: 5.61

Description:

Internally displaced persons, new displacement associated with disasters (number of people). Internally displaced persons are defined according to the 1998 Guiding Principles (<http://www.internal-displacement.org/publications/1998/ocha-guiding-principles-on-internal-displacement>) as people or groups of people who have been forced or obliged to flee or to leave their homes or places of habitual residence, in particular as a result of armed conflict, or to avoid the effects of armed conflict, situations of generalized violence, violations of human rights, or natural or human-made disasters and who have not crossed an international border. 'New Displacement' refers to the number of new cases or incidents of displacement recorded, rather than the number of people displaced. This is done because people may have been displaced more than once.

4.3.2.39 Internally displaced persons, new displacement-conflict and violence (number) (wdi_idpvc)

Long tag: qog_std_ts_wdi_idpvc

Original tag: wdi_idpvc

Dataset citation: Teorell et al. (2024)

Variable citation: World Bank (2022)

Merge scores:

Non-missing observations in original unit: Sum: 455, Percent: 2.98

Non-missing observations in chosen unit: Sum: 415, Percent: 1.38

Lost observations in chosen unit: Sum: 40 Percent: 8.79

Description:

Internally displaced persons, new displacement associated with conflict and violence (number of cases). Internally displaced persons are defined according to the 1998 Guiding Principles (<http://www.internal-displacement.org/publications/1998/ocha-guiding-principles-on-internal-displacement>) as people or groups of people who have been forced or obliged to flee or to leave their homes or places of habitual residence, in particular as a result of armed conflict, or to avoid the effects of armed conflict, situations of generalized violence, violations of human rights, or natural or human-made disasters and who have not crossed an international border. 'New Displacement' refers to the number of new cases or incidents of displacement recorded, rather than the number of people displaced. This is done because people may have been displaced more than once.

4.3.2.40 Internally displaced persons, total displaced by conflict-violence (number) (wdi_idpvp)

Long tag: qog_std_ts_wdi_idpvp

Original tag: wdi_idpvp

Dataset citation: Teorell et al. (2024)

Variable citation: World Bank (2022)

Merge scores:

Non-missing observations in original unit: Sum: 718, Percent: 4.7

Non-missing observations in chosen unit: Sum: 673, Percent: 2.25

Lost observations in chosen unit: Sum: 45 Percent: 6.27

Description:

Internally displaced persons, new displacement associated with conflict and violence (number of people). Internally displaced persons are defined according to the 1998 Guiding Principles (<http://www.internal-displacement.org/publications/1998/ocha-guiding-principles-on-internal-displacement>) as people or groups of people who have been forced or obliged to flee or to leave their homes or places of habitual residence, in particular as a result of armed conflict, or to avoid the effects of armed conflict, situations of generalized violence, violations of human rights, or natural or human-made disasters and who have not crossed an international border. 'People displaced' refers to the number of people living in displacement as of the end of each year.

4.3.3 Political System

This category includes variables describing the rules of the political system (presidential or parliamentary system), the chief executive (years in office), regime type, stability (age of present regime), and checks and balances as well as aspects of federalism.

4.3.3.1 Dichotomous democracy measure (incl. missing for some countries) (bmr_demmis)

Long tag: qog_std_ts_bmr_demmis

Original tag: bmr_demmis

Dataset citation: Teorell et al. (2024)

Variable citation: Boix et al. (2022a)

Merge scores:

Non-missing observations in original unit: Sum: 11336, Percent: 74.14

Non-missing observations in chosen unit: Sum: 10038, Percent: 33.49

Lost observations in chosen unit: Sum: 1298 Percent: 11.45

Description:

This is the same measure as democracy (`bmr_dem`), except it records an NA for countries occupied during an international war (e.g., the Netherlands 1940-44) or experiencing state collapse during a civil war (e.g., Lebanon 1976-89). The democracy variable instead fills in these years as continuations of the same regime type.

4.3.3.2 Level of Difficulty (`bti_lod`)

Long tag: `qog_std_ts_bti_lod`

Original tag: `bti_lod`

Dataset citation: Teorell et al. (2024)

Variable citation: Donner et al. (2022)

Merge scores:

Non-missing observations in original unit: Sum: 1153, Percent: 7.54

Non-missing observations in chosen unit: Sum: 1113, Percent: 3.71

Lost observations in chosen unit: Sum: 40 Percent: 3.47

Description:

Level of Difficulty in Management: it groups the scores of the structural constraints, the civil society traditions and the conflict intensity of a society. From 1 to 10. Higher scores indicate more constraints on management.

4.3.3.3 Regime Failure - Ending Type (`gwf_failtype`)

Long tag: `qog_std_ts_gwf_failtype`

Original tag: `gwf_failtype`

Dataset citation: Teorell et al. (2024)

Variable citation: Nohlen et al. (1999, 2002), Nohlen (2005), Nohlen & Stöver (2010), (IPU), Chronicle of Parliamentary Elections (IPU), Election Guide

Merge scores:

Non-missing observations in original unit: Sum: 4554, Percent: 29.78

Non-missing observations in chosen unit: Sum: 4162, Percent: 13.89

Lost observations in chosen unit: Sum: 392 Percent: 8.61

Description:

Categorical variable marking how the autocratic regime ends:

0. Regime still in power on December 31, 2010
1. Regime insiders change rules of regime
2. Incumbent loses elections
3. No incumbent runs in competitive election won by opponent
4. Popular uprising
5. Military coup

6. Insurgents, revolutionaries, or combatants fighting a civil war
7. Foreign imposition or invasion
8. A new autocratic leader is selected, changes rules, and remains in power
9. State ceases to exist, ends or government fails to control most of the country's territory

4.3.3.4 Regime Failure - Level of Violence (*gwf_failviolent*)

Long tag: qog_std_ts_gwf_failviolent

Original tag: gwf_failviolent

Dataset citation: Teorell et al. (2024)

Variable citation: Nohlen et al. (1999, 2002), Nohlen (2005), Nohlen & Stöver (2010), (IPU), Chronicle of Parliamentary Elections (IPU), Election Guide

Merge scores:

Non-missing observations in original unit: Sum: 4554, Percent: 29.78

Non-missing observations in chosen unit: Sum: 4162, Percent: 13.89

Lost observations in chosen unit: Sum: 392 Percent: 8.61

Description:

Categorical variable marking the level of violence during the autocratic regime failure event:

- 0: Regime still in power on December 31, 2010
1. No deaths
2. 1-25 deaths
3. 26-1000 deaths
4. gt;1000

4.3.3.5 Regime Type (*ht_regtype*)

Long tag: qog_std_ts_ht_regtype

Original tag: ht_regtype

Dataset citation: Teorell et al. (2024)

Variable citation: Teorell & Wahman (2018)

Merge scores:

Non-missing observations in original unit: Sum: 7390, Percent: 48.33

Non-missing observations in chosen unit: Sum: 6618, Percent: 22.08

Lost observations in chosen unit: Sum: 772 Percent: 10.45

Description:

This typology of authoritarian regimes is based on a distinction between three modes of political power maintenance (probably the three most widely used throughout history): hereditary succession (lineage), corresponding to monarchies; the actual or threatened use of military force, corresponding to military regimes; and popular elections, designating electoral regimes. Among the latter we distinguish among no-party regimes (where all parties are prohibited), one-party regimes (where all but one party is prohibited), and limited multiparty regimes (where multiple parties are allowed but the system still does not pass as democratic); a subtype of these regimes where no parties are present, although not being prohibited, are coded as "partyless" regimes. A subtype of military regimes are coded as "rebel regimes", where a rebel movement has taken power by military means. We also code hybrids (or amalgams) combining elements from more than one regime type, as well as several minor types of regimes: "theocracies", "transitional" regimes, "civil war", foreign "occupation", and a residual "other" category. Using the mean of the Freedom House and Polity scales (*fh_ipolity2*), the line between democracies and autocracies is drawn at 7.5. This threshold value was chosen by estimating the mean cutoff point separating democracy from autocracy in five well-known categorical

measures of democracy: those of Przeworski et al. (2000), Mainwaring et al. (2001), and Reich (2002), together with Freedom House's and Polity's own categorical thresholds for democracy.

1. Limited Multiparty
2. Partyless
3. No-Party
4. Military
5. Military No-Party
6. Military Multiparty
7. Military One-party
8. One-Party
9. Other
16. One-Party Monarchy
17. Monarchy
18. Rebel Regime
19. Civil War
20. Occupation
21. Theocracy
22. Transitional Regime
23. No-Party Monarchy
24. Multiparty Monarchy
25. Multiparty-Occupied
100. Democracy

4.3.4 Judicial

This category includes judicial indicators, generally covering legal rights granted by a state to its citizens and their compliance, as well as measures of crimes and the overall state of the judicial system.

4.3.4.1 Status of Slavery in Constitution (ccp_slave)

Long tag: qog_std_ts_ccp_slave

Original tag: ccp_slave

Dataset citation: Teorell et al. (2024)

Variable citation: Elkins & Ginsburg (2021)

Merge scores:

Non-missing observations in original unit: Sum: 10066, Percent: 65.83

Non-missing observations in chosen unit: Sum: 8840, Percent: 29.49

Lost observations in chosen unit: Sum: 1226 Percent: 12.18

Description:

Does the constitution prohibit slavery, servitude, or forced labor?

1. Universally prohibited
2. Prohibited except in the case of war
3. Prohibited with other exception(s)
90. Left explicitly to non-constitutional law
96. Other
98. Not specified

4.3.4.2 Freedom of Domestic Movement (ciri_dommov)

Long tag: qog_std_ts_ciri_dommov

Original tag: ciri_dommov

Dataset citation: Teorell et al. (2024)

Variable citation: Mark et al. (2023), Cingranelli et al. (2014)

Merge scores:

Non-missing observations in original unit: Sum: 7388, Percent: 48.32

Non-missing observations in chosen unit: Sum: 6431, Percent: 21.46

Lost observations in chosen unit: Sum: 957 Percent: 12.95

Description:

The freedom to travel within one's country is a right. There are governments that do not allow citizens to travel within their own country of birth or that restrict the movement of certain groups for reasons based on political views or activities, religious beliefs, ethnicity, marital status, and gender. For example, some countries strictly curtail the freedom of movement of oppositional political leaders, ethnic minorities, religious leaders, human rights activists or monitors, and journalists. This may take many forms, including government-imposed internal exile and/or intentional bureaucratic/administrative delays to freedom of movement after a prison term has ended. Some countries strictly monitor all or nearly all citizens' internal movements, and citizens are required to notify local officials of their whereabouts or must get their permission to move. In some countries, citizens must carry national identity cards, travel or work permits, or internal passports for any movement outside their immediate village, neighborhood, or province. Some countries use issuance of these cards to restrict movement within the country. Some governments use forced internal resettlement to relocate large numbers of citizens without their consent. Some governments also impose curfew laws and military checkpoints on domestic travel during times of military or civil conflict.

Scoring Scheme:

Domestic travel is:

- (0) Severely Restricted

(1) Somewhat Restricted

(2) Unrestricted

4.3.4.3 Extrajudicial Killing (ciri_kill)

Long tag: qog_std_ts_ciri_kill

Original tag: ciri_kill

Dataset citation: Teorell et al. (2024)

Variable citation: Mark et al. (2023), Cingranelli et al. (2014)

Merge scores:

Non-missing observations in original unit: Sum: 6882, Percent: 45.01

Non-missing observations in chosen unit: Sum: 6207, Percent: 20.71

Lost observations in chosen unit: Sum: 675 Percent: 9.81

Description:

Extrajudicial killings are killings by government officials without due process of law. They include

murders by private groups if instigated by a government. These killings may result from the deliberate, illegal, and excessive use of lethal force by the police, security forces, or other agents of the state whether against criminal suspects, detainees, prisoners, or others. Deaths resulting from torture

should be counted, as these deaths occurred while the prisoners were in the custody of the government

or its agents. Deaths from military hazing also count.

In most cases, the USSD reports indicate cases of political killings by explicitly referring to these killings as “political.” A victim of a politically motivated killing is someone who was killed by a government or its agents as a result of his or her involvement in political activities or for supporting (implicitly or explicitly) the political actions of opposition movements against the existing government.

While they may be the result of different motives, both extrajudicial killings and political killings are

to be treated identically for the purposes of scoring.

NOTE: Beginning in 2001, the USSD replaced “Political and Other Extrajudicial Killings” with

“Arbitrary or Unlawful Deprivation of Life” as the title of this section in their Human Rights Reports

(released March 2002).

Scoring Scheme:

Political or Extrajudicial Killings are:

(0) Practiced frequently

(1) Practiced occasionally

(2) Have not occurred / unreported

(Original variable name: Political and other extrajudicial killings/arbitrary or unlawful deprivation of life)

4.3.4.4 Prevalence of Torture by Government Authorities (ciri_tort)

Long tag: qog_std_ts_ciri_tort

Original tag: ciri_tort

Dataset citation: Teorell et al. (2024)

Variable citation: Mark et al. (2023), Cingranelli et al. (2014)

Merge scores:

Non-missing observations in original unit: Sum: 6888, Percent: 45.05

Non-missing observations in chosen unit: Sum: 6213, Percent: 20.73

Lost observations in chosen unit: Sum: 675 Percent: 9.8

Description:

Torture refers to the purposeful inflicting of extreme pain—whether mental or physical—by government

officials, or by private individuals at the instigation of government officials. This includes the use of physical and other force by police and prison guards – including rape and beatings – as well as deaths

in custody due to tangible negligence by government officials. Torture can be anything from simple beatings to other practices such as waterboarding, rape, or administering shock or electrocution as a

means of getting information or a forced confession. Torture also takes into account intentional mental abuse of those in custody. Military hazing also counts as torture.

Scoring Scheme:

Torture is:

(0) Practiced frequently

(1) Practiced occasionally

(2) Not practiced / Unreported

4.3.4.5 Rule of Law (fh_rol)

Long tag: qog_std_ts_fh_rol

Original tag: fh_rol

Dataset citation: Teorell et al. (2024)

Variable citation: Freedom House (2022)

Merge scores:

Non-missing observations in original unit: Sum: 3485, Percent: 22.79

Non-missing observations in chosen unit: Sum: 3045, Percent: 10.16

Lost observations in chosen unit: Sum: 440 Percent: 12.63

Description:

Rule of Law - The variable measures the independence of the judiciary; the extent to which rule of law prevails in civil and criminal matters; the existence of direct civil control over the police; the protection from political terror, unjustified imprisonment, exile and torture; absence of war and insurgencies; and the extent to which laws, policies and practices guarantee equal

treatment of various segments of the population. Countries are graded between 0 (worst) and 16 (best).

4.3.4.6 Robust Democracy: Rule of Law - Corruption Prevention (sgi_qdrlc)

Long tag: qog_std_ts_sgi_qdrlc

Original tag: sgi_qdrlc

Dataset citation: Teorell et al. (2024)

Variable citation: Schiller & Hellmann (2022)

Merge scores:

Non-missing observations in original unit: Sum: 328, Percent: 2.15

Non-missing observations in chosen unit: Sum: 328, Percent: 1.09

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

Robust Democracy: Rule of Law - Corruption Prevention. To what extent are public officeholders prevented from abusing their position for private interests? This question addresses how the state and society prevent public servants and politicians from accepting bribes by applying mechanisms to guarantee the integrity of officeholders: auditing of state spending; regulation of party financing; citizen and media access to information; accountability of officeholders (asset declarations, conflict of interest rules, codes of conduct); transparent public procurement systems; effective prosecution of corruption. (1, 2): Public officeholders can exploit their offices for private gain as they see fit without fear of legal consequences or adverse publicity. (3, 4, 5): Some integrity mechanisms function, but do not effectively prevent public officeholders from abusing their positions. (6, 7, 8): Most integrity mechanisms function effectively and provide disincentives for public officeholders willing to abuse their positions. (9, 10): Legal, political and public integrity mechanisms effectively prevent public officeholders from abusing their positions.

4.3.4.7 Intentional homicides (per 100,000 people) (wdi_homicides)

Long tag: qog_std_ts_wdi_homicides

Original tag: wdi_homicides

Dataset citation: Teorell et al. (2024)

Variable citation: World Bank (2022)

Merge scores:

Non-missing observations in original unit: Sum: 3563, Percent: 23.3

Non-missing observations in chosen unit: Sum: 3232, Percent: 10.78

Lost observations in chosen unit: Sum: 331 Percent: 9.29

Description:

Intentional homicides are estimates of unlawful homicides purposely inflicted as a result of domestic disputes, interpersonal violence, violent conflicts over land resources, intergang violence over turf or control, and predatory violence and killing by armed groups. Intentional homicide does not include all intentional killing; the difference is usually in the organization of the killing. Individuals or small groups usually commit homicide, whereas killing in armed conflict is usually committed by fairly cohesive groups of up to several hundred members and is thus usually excluded.

4.3.4.8 Intentional homicides, female (per 100,000 female) (wdi_homicidesf)

Long tag: qog_std_ts_wdi_homicidesf

Original tag: wdi_homicidesf

Dataset citation: Teorell et al. (2024)

Merge scores:

Non-missing observations in original unit: Sum: 2331, Percent: 15.24

Non-missing observations in chosen unit: Sum: 2137, Percent: 7.13

Lost observations in chosen unit: Sum: 194 Percent: 8.32

Description:

Intentional homicides, female (per 100,000 female). Intentional homicides, female are estimates of unlawful female homicides purposely inflicted as a result of domestic disputes, interpersonal violence, violent conflicts over land resources, intergang violence over turf or control, and predatory violence and killing by armed groups. Intentional homicide does not include all intentional killing; the difference is usually in the organization of the killing. Individuals or small groups usually commit homicide, whereas killing in armed conflict is usually committed by fairly cohesive groups of up to several hundred members and is thus usually excluded.

4.3.4.9 Intentional homicides, male (per 100,000 male) (wdi_homicidesm)

Long tag: qog_std_ts_wdi_homicidesm

Original tag: wdi_homicidesm

Dataset citation: Teorell et al. (2024)

Variable citation: World Bank (2022)

Merge scores:

Non-missing observations in original unit: Sum: 2330, Percent: 15.24

Non-missing observations in chosen unit: Sum: 2134, Percent: 7.12

Lost observations in chosen unit: Sum: 196 Percent: 8.41

Description:

Intentional homicides, male (per 100,000 male). Intentional homicides, male are estimates of unlawful male homicides purposely inflicted as a result of domestic disputes, interpersonal violence, violent conflicts over land resources, intergang violence over turf or control, and predatory violence and killing by armed groups. Intentional homicide does not include all intentional killing; the difference is usually in the organization of the killing. Individuals or small groups usually commit homicide, whereas killing in armed conflict is usually committed by fairly cohesive groups of up to several hundred members and is thus usually excluded.

4.3.5 Political Parties and Elections

This category includes variables describing various aspects of the legislature and political parties in the legislature (number of seats) as well as variables related to the election for the executive and variables on the outcomes of elections.

4.3.5.1 Share of seats in parliament: protest (cpds_lp)

Long tag: qog_std_ts_cpds_lp

Original tag: cpds_lp

Dataset citation: Teorell et al. (2024)

Variable citation: Armingeon et al. (2023a,b)

Merge scores:

Non-missing observations in original unit: Sum: 1816, Percent: 11.88

Non-missing observations in chosen unit: Sum: 1816, Percent: 6.06

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

Share of seats in parliament for the political parties classified as protest.

4.3.5.2 Share of votes: protest (cpds_vp)

Long tag: qog_std_ts_cpds_vp

Original tag: cpds_vp

Dataset citation: Teorell et al. (2024)

Variable citation: Armingeon et al. (2023a,b)

Merge scores:

Non-missing observations in original unit: Sum: 1816, Percent: 11.88

Non-missing observations in chosen unit: Sum: 1816, Percent: 6.06

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

Share of votes of the political parties classified as protest.

4.3.5.3 Riots and Protests after Election (nelda_rpae)

Long tag: qog_std_ts_nelda_rpae

Original tag: nelda_rpae

Dataset citation: Teorell et al. (2024)

Variable citation: Hyde & Marinov (2012, 2021)

Merge scores:

Non-missing observations in original unit: Sum: 3003, Percent: 19.64

Non-missing observations in chosen unit: Sum: 2656, Percent: 8.86

Lost observations in chosen unit: Sum: 347 Percent: 11.56

Description:

If there are protests and riots after elections, a 'Yes' is coded. The riots and protests should at least somewhat be related to the handling or outcome of the election.

Values:

0. No

1. Yes

3. Unclear

4.3.5.4 Violence and Civilian Deaths before Election (nelda_vcdbe)

Long tag: qog_std_ts_nelda_vcdbe

Original tag: nelda_vcdbe

Dataset citation: Teorell et al. (2024)

Variable citation: Hyde & Marinov (2012, 2021)

Merge scores:

Non-missing observations in original unit: Sum: 2992, Percent: 19.57

Non-missing observations in chosen unit: Sum: 2653, Percent: 8.85

Lost observations in chosen unit: Sum: 339 Percent: 11.33

Description:

If there was any significant violence relating to the elections that resulted in civilian deaths, a 'Yes' is coded. These deaths should be at least plausibly related to the election, though sometimes it is difficult to be certain. Deaths related to civil war that are not intended to influence the election, and are not caused by the election, should not be counted.

Values:

0. No

1. Yes

3. Unclear

4.3.6 Civil Society, Population and Culture

This category includes variables that relate to social capital, personal beliefs, size and distribution of the population as well as ethnic and linguistic fractionalization.

4.3.6.1 Deaths - Female (eu_demdeathdf)

Long tag: qog_std_ts_eu_demdeathdf

Original tag: eu_demdeathdf

Dataset citation: Teorell et al. (2024)

Variable citation: European Commission (2023)

Merge scores:

Non-missing observations in original unit: Sum: 1910, Percent: 12.49

Non-missing observations in chosen unit: Sum: 1836, Percent: 6.13

Lost observations in chosen unit: Sum: 74 Percent: 3.87

Description:

Deaths - females

4.3.6.2 Deaths - Male. (eu_demdeathdm)

Long tag: qog_std_ts_eu_demdeathdm

Original tag: eu_demdeathdm

Dataset citation: Teorell et al. (2024)

Variable citation: European Commission (2023)

Merge scores:

Non-missing observations in original unit: Sum: 1910, Percent: 12.49

Non-missing observations in chosen unit: Sum: 1836, Percent: 6.13

Lost observations in chosen unit: Sum: 74 Percent: 3.87

Description:

Deaths - Male.

4.3.6.3 Deaths - Total (eu_demdeathdt)

Long tag: qog_std_ts_eu_demdeathdt

Original tag: eu_demdeathdt

Dataset citation: Teorell et al. (2024)

Variable citation: European Commission (2023)

Merge scores:

Non-missing observations in original unit: Sum: 2029, Percent: 13.27

Non-missing observations in chosen unit: Sum: 1955, Percent: 6.52

Lost observations in chosen unit: Sum: 74 Percent: 3.65

Description:

Deaths - Total

4.3.6.4 Global Peace Index (gpi_gpi)

Long tag: qog_std_ts_gpi_gpi

Original tag: gpi_gpi

Dataset citation: Teorell et al. (2024)

Variable citation: Nohlen et al. (1999, 2002), Nohlen (2005), Nohlen & Stöver (2010), (IPU), Chronicle of Parliamentary Elections (IPU), Election Guide

Merge scores:

Non-missing observations in original unit: Sum: 2540, Percent: 16.61

Non-missing observations in chosen unit: Sum: 2472, Percent: 8.25

Lost observations in chosen unit: Sum: 68 Percent: 2.68

Description:

The GPI (scaled from 1 to 5, 5 being least peaceful) measures a country's level of Negative Peace using three domains of peacefulness. The first domain, Ongoing Domestic and International Conflict, investigates the extent to which countries are involved in internal and external conflicts, as well as their role and duration of involvement in conflicts.

The second domain evaluates the level of harmony or discord within a nation; ten indicators broadly assess what might be described as Societal Safety and Security. The assertion is that low crime rates, minimal terrorist activity and violent demonstrations, harmonious relations with neighbouring countries, a stable political scene and a small proportion of the population being internally displaced or made refugees can be equated with peacefulness.

Seven further indicators are related to a country's Militarisation-reflecting the link between a country's level of military build-up and access to weapons and its level of peacefulness, both domestically and internationally. Comparable data on military expenditure as a percentage of GDP and the number of armed service officers per head are gauged, as are financial contributions to UN peacekeeping missions.

4.3.6.5 Birth rate, crude (per 1,000 people) (wdi_birth)

Long tag: qog_std_ts_wdi_birth

Original tag: wdi_birth

Dataset citation: Teorell et al. (2024)

Variable citation: World Bank (2022)

Merge scores:

Non-missing observations in original unit: Sum: 10162, Percent: 66.46

Non-missing observations in chosen unit: Sum: 9123, Percent: 30.44

Lost observations in chosen unit: Sum: 1039 Percent: 10.22

Description:

Crude birth rate indicates the number of live births occurring during the year, per 1,000 population estimated at midyear. Subtracting the crude death rate from the crude birth rate provides the rate of natural increase, which is equal to the rate of population change in the absence of migration.

4.3.6.6 Death rate, crude (per 1,000 people) (wdi_death)

Long tag: qog_std_ts_wdi_death

Original tag: wdi_death

Dataset citation: Teorell et al. (2024)

Variable citation: World Bank (2022)

Merge scores:

Non-missing observations in original unit: Sum: 10144, Percent: 66.34

Non-missing observations in chosen unit: Sum: 9123, Percent: 30.44

Lost observations in chosen unit: Sum: 1021 Percent: 10.07

Description:

Crude death rate indicates the number of deaths occurring during the year, per 1,000 population estimated at midyear. Subtracting the crude death rate from the crude birth rate provides the rate of natural increase, which is equal to the rate of population change in the absence of migration.

4.3.6.7 Completeness of death registration with cause-of-death information (percent) (wdi_deathreg)

Long tag: qog_std_ts_wdi_deathreg

Original tag: wdi_deathreg

Dataset citation: Teorell et al. (2024)

Variable citation: World Bank (2022)

Merge scores:

Non-missing observations in original unit: Sum: 599, Percent: 3.92

Non-missing observations in chosen unit: Sum: 539, Percent: 1.8

Lost observations in chosen unit: Sum: 60 Percent: 10.02

Description:

Completeness of death registration is the estimated percentage of deaths that are registered with their cause of death information in the vital registration system of a country.

4.3.7 Media

This category includes indicators on the freedom of the media in a given country (freedom of the press, regulation of the media) as well as the public access and confidence in the media.

4.3.7.1 Repressive Actions: Broadcast Media (1993-1995) (fhp_rab3)

Long tag: qog_std_ts_fhp_rab3

Original tag: fhp_rab3

Dataset citation: Teorell et al. (2024)

Variable citation: Freedom House (2017)

Merge scores:

Non-missing observations in original unit: Sum: 550, Percent: 3.6

Non-missing observations in chosen unit: Sum: 490, Percent: 1.63

Lost observations in chosen unit: Sum: 60 Percent: 10.91

Description:

Repressive Actions: Broadcast Media (1993-1995). This variable reflects actual press-freedom violations (killing of journalists, physical violence against journalists or facilities, censorship, self-censorship, harassment, expulsions, etc). The scale of the variable is 0-40. 0 indicates more freedom.

4.3.7.2 Repressive Actions: Broadcast Media (1996-2000) (fhp_rab4)

Long tag: qog_std_ts_fhp_rab4

Original tag: fhp_rab4

Dataset citation: Teorell et al. (2024)

Variable citation: Freedom House (2017)

Merge scores:

Non-missing observations in original unit: Sum: 925, Percent: 6.05

Non-missing observations in chosen unit: Sum: 825, Percent: 2.75

Lost observations in chosen unit: Sum: 100 Percent: 10.81

Description:

Repressive Actions: Broadcast Media (1996-2000). This variable reflects actual press-freedom violations (killing of journalists, physical violence against journalists or facilities, censorship, self-censorship, harassment, expulsions, etc). The scale of the variable is 0-10. 0 indicates more freedom.

4.3.7.3 Repressive Actions: Print Media (1993-1995) (fhp_rap3)

Long tag: qog_std_ts_fhp_rap3

Original tag: fhp_rap3

Dataset citation: Teorell et al. (2024)

Variable citation: Freedom House (2017)

Merge scores:

Non-missing observations in original unit: Sum: 550, Percent: 3.6

Non-missing observations in chosen unit: Sum: 490, Percent: 1.63

Lost observations in chosen unit: Sum: 60 Percent: 10.91

Description:

Repressive Actions: Print Media (1993-1995). This variable reflects actual press-freedom violations (killing of journalists, physical violence against journalists or facilities, censorship, self-censorship, harassment, expulsions, etc). The scale of the variable is 0-40. 0 indicates more freedom.

4.3.7.4 Repressive Actions: Print Media (1996-2000) (fhp_rap4)

Long tag: qog_std_ts_fhp_rap4

Original tag: fhp_rap4

Dataset citation: Teorell et al. (2024)

Variable citation: Freedom House (2017)

Merge scores:

Non-missing observations in original unit: Sum: 925, Percent: 6.05

Non-missing observations in chosen unit: Sum: 825, Percent: 2.75

Lost observations in chosen unit: Sum: 100 Percent: 10.81

Description:

Repressive Actions: Print Media (1996-2000). This variable reflects actual press-freedom violations (killing of journalists, physical violence against journalists or facilities, censorship, self-censorship, harassment, expulsions, etc). The scale of the variable is 0-10. 0 indicates more freedom.

4.3.7.5 Press Freedom Index: Legal Context Component (rsf_lci)

Long tag: qog_std_ts_rsf_lci

Original tag: rsf_lci

Dataset citation: Teorell et al. (2024)

Variable citation: Reporters sans frontières (2023)

Merge scores:

Non-missing observations in original unit: Sum: 345, Percent: 2.26

Non-missing observations in chosen unit: Sum: 327, Percent: 1.09

Lost observations in chosen unit: Sum: 18 Percent: 5.22

Description:

Legal context component of Press Freedom Index. Questions asked for the legal context component concern the legislative and regulatory environment for journalists, in particular:

- the degree to which journalists and media are free to work without censorship or judicial sanctions, or excessive restrictions on their freedom of expression;
- the ability to access information without discrimination between journalists, and the ability to protect sources;
- the presence or absence of impunity for those responsible for acts of violence against journalists.

A subsidiary score ranging from 0 to 100 is calculated for each indicator. All of the subsidiary scores contribute equally to the global score. And within each indicator, all the questions and subquestions have equal weight.

4.3.8 Gender Equality

This category includes variables related to the differences of access and opportunities between women and men by country, such as access to education, overall employment and employment by specific sectors, and indexes that shine a light on the general differences in treatment between men and women.

4.3.8.1 Global Gender Gap Health and Survival Subindex (gggi_hss)

Long tag: qog_std_ts_gggi_hss

Original tag: gggi_hss

Dataset citation: Teorell et al. (2024)

Variable citation: World Economic Forum (2021)

Merge scores:

Non-missing observations in original unit: Sum: 2356, Percent: 15.41

Non-missing observations in chosen unit: Sum: 2304, Percent: 7.69

Lost observations in chosen unit: Sum: 52 Percent: 2.21

Description:

Health and Survival (0 to 1, where 1 indicates no gap). This subindex provides an overview of the differences between women's and men's health through the use of two indicators. The first is the sex ratio at birth, which aims specifically to capture the phenomenon of "missing women", prevalent in many countries with a strong son preference. Second, we use the gap between women's and men's healthy life expectancy. This measure provides an estimate of the number of years that women and men can expect to live in good health by taking into account the years lost to violence, disease, malnutrition and other relevant factors.

4.3.8.2 Lifetime risk of maternal death (percent) (wdi_lrmd)

Long tag: qog_std_ts_wdi_lrmd

Original tag: wdi_lrmd

Dataset citation: Teorell et al. (2024)

Variable citation: World Bank (2022)

Merge scores:

Non-missing observations in original unit: Sum: 3818, Percent: 24.97

Non-missing observations in chosen unit: Sum: 3533, Percent: 11.79

Lost observations in chosen unit: Sum: 285 Percent: 7.46

Description:

Life time risk of maternal death is the probability that a 15-year-old female will die eventually from a maternal cause assuming that current levels of fertility and mortality (including maternal mortality) do not change in the future, taking into account competing causes of death.

4.3.9 Health

This category includes indicators describing the health of a population in a given country. These include reports about self-perceived health (state of health), policies and provided infrastructure concerning health (expenditure, number of hospitals), the prevalence of diseases (HIV, tuberculosis), and indicators such as birth rate, death rate and life expectancy.

4.3.9.1 Infant mortality (oecd_infmorty_g1)

Long tag: qog_std_ts_oecd_infmorty_g1

Original tag: oecd_infmorty_g1

Dataset citation: Teorell et al. (2024)

Variable citation: Organisation for Economic Co-operation and Development (2023)

Merge scores:

Non-missing observations in original unit: Sum: 2028, Percent: 13.26

Non-missing observations in chosen unit: Sum: 1924, Percent: 6.42

Lost observations in chosen unit: Sum: 104 Percent: 5.13

Description:

Infant mortality, deaths per 1 000 live births

4.3.9.2 Road fatalities (oecd_rddeath_t1)

Long tag: qog_std_ts_oecd_rddeath_t1

Original tag: oecd_rddeath_t1

Dataset citation: Teorell et al. (2024)

Variable citation: Organisation for Economic Co-operation and Development (2023)

Merge scores:

Non-missing observations in original unit: Sum: 445, Percent: 2.91

Non-missing observations in chosen unit: Sum: 445, Percent: 1.48

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

Road fatalities. Deaths, Per 1 000 000 inhabitants, 1994 - 2016 Source: ITF Transport Statistics: Road accidents

4.3.9.3 Estimated road traffic death rate (100,000 population) (who_roadtrd)

Long tag: qog_std_ts_who_roadtrd

Original tag: who_roadtrd

Dataset citation: Teorell et al. (2024)

Variable citation: World Health Organization (2023)

Merge scores:

Non-missing observations in original unit: Sum: 3635, Percent: 23.77

Non-missing observations in chosen unit: Sum: 3363, Percent: 11.22

Lost observations in chosen unit: Sum: 272 Percent: 7.48

Description:

Estimated road traffic death rate (per 100 000 population)

4.3.10 Migration

This category includes indicators related to migratory phenomena such as immigration rates, level of education, brain drain, and refugee population.

4.3.10.1 Refugee population by country or territory of asylum (wdi_refasy)

Long tag: qog_std_ts_wdi_refasy

Original tag: wdi_refasy

Dataset citation: Teorell et al. (2024)

Variable citation: World Bank (2022)

Merge scores:

Non-missing observations in original unit: Sum: 6685, Percent: 43.72

Non-missing observations in chosen unit: Sum: 6399, Percent: 21.35

Lost observations in chosen unit: Sum: 286 Percent: 4.28

Description:

Refugees are people who are recognized as refugees under the 1951 Convention Relating to the Status of Refugees or its 1967 Protocol, the 1969 Organization of African Unity Convention Governing the Specific Aspects of Refugee Problems in Africa, people recognized as refugees in accordance with the UNHCR statute, people granted refugee-like humanitarian status, and people provided temporary protection. Asylum seekers--people who have applied for asylum or refugee status and who have not yet received a decision or who are registered as asylum seekers--are excluded. Palestinian refugees are people (and their descendants) whose residence was Palestine between June 1946 and May 1948 and who lost their homes and means of livelihood as a result of the 1948 Arab-Israeli conflict. Country of asylum is the country where an asylum claim was filed and granted.

4.3.10.2 Refugee population by country or territory of origin (wdi_refori)

Long tag: qog_std_ts_wdi_refori

Original tag: wdi_refori

Dataset citation: Teorell et al. (2024)

Variable citation: World Bank (2022)

Merge scores:

Non-missing observations in original unit: Sum: 6325, Percent: 41.36

Non-missing observations in chosen unit: Sum: 5903, Percent: 19.69

Lost observations in chosen unit: Sum: 422 Percent: 6.67

Description:

Refugees are people who are recognized as refugees under the 1951 Convention Relating to the Status of Refugees or its 1967 Protocol, the 1969 Organization of African Unity Convention Governing the Specific Aspects of Refugee Problems in Africa, people recognized as refugees in accordance with the UNHCR statute, people granted refugee-like humanitarian status, and people provided temporary protection. Asylum seekers--people who have applied for asylum or refugee status and who have not yet received a decision or who are registered as asylum seekers--are excluded. Palestinian refugees are people (and their descendants) whose residence was Palestine between June 1946 and May 1948 and who lost their homes and means of livelihood as a result of the 1948 Arab-Israeli conflict. Country of origin generally refers to the nationality or country of citizenship of a claimant.

5 UCDP and VIEWS

The Uppsala Conflict Data Program (UCDP) is the world’s main provider of data on organized violence and the oldest ongoing data collection project for civil war, with a history of almost 40 years. Its definition of armed conflict has become the global standard of how conflicts are systematically defined and studied. UCDP produces high-quality data, which are systematically collected, have global coverage, are comparable across cases and countries, and have long time series which are updated annually. Furthermore, the program is a unique source of information for practitioners and policymakers. UCDP also operates and continuously updates its online database (UCDP Conflict Encyclopedia) on armed conflicts and organised violence, in which information on several aspects of armed conflict such as conflict dynamics and conflict resolution is available. This interactive database offers a web-based system for visualising, handling and downloading data, including ready-made datasets on organized violence and peacemaking, all free of charge. Data on armed conflicts have been published yearly in the *Journal of Peace Research* since 1993, in the *Human Security Reports* since 2005, in the *SIPRI Yearbook* since 1988, and in the report series *States in Armed Conflict* (1987-2012). In addition, UCDP researchers regularly publish research on organized violence, its causes, escalation, spread, prevention and resolution, in top scientific journals and books. More information is available on the project’s website: <https://ucdp.uu.se/>

The Violence Impacts Early-Warning System (VIEWS) is a an academic research consortium jointly led by Uppsala University and Peace Research Institute Oslo. It unites a diverse range of research initiatives dedicated to exploring novel methodologies for forecasting violent conflict as well as the its impacts on society and human development. The consortium offers an award-winning prediction system that systematically monitors hundreds of structural drivers and complex conflict dynamics, and generates monthly predictions of impending conflict for each country and sub-national location within its scope up to three years into the future. The VIEWS data provided via the Demscore database is currently limited to forecasts for impending state-based conflict. They are provided as point predictions for the logged and non-logged number of fatalities in a given month and location , as well as dichotomous predictions for the probability that given fatality thresholds will be reached or exceeded in each month and place. . In the near future, they will be accompanied by corresponding predictions for armed conflict between non-state actors, as well as for violence against civilians. As the conflict impacts projects progress, the forecasting system will also be expanded with models that predict the impact of armed conflict on human development. For more information, please visit the consortium website: <https://viewsforecasting.org/>

5.1 UCDP Country Year Dataset on Organized Violence within Country Borders version 24.2

Dataset tag: ucdp_orgv_cy

Output Unit: UCDP Organized Violence Country-Year, i.e., data is collected per country (territory) and year in which organized violence occurred. This means that each row in the dataset can be identified through a combination of the variables `country_cy` (or `country_id_cy`) and `year_cy`.

Description: This dataset collects data on organized violence within country borders, accounting for different types of violence and separating between interstate and intrastate conflicts. Please note that a country in this dataset refers to the territory on which violence has occurred.

Dataset citation:

Lost observations in chosen unit: Sum: 521 Percent: 7.96

Description:

The number of state-based dyads engaging in organized violence within the borders of a country in a given year.

5.1.1.2 Dyad IDs for State-based Violence (sb_dyad_ids_cy)

Long tag: ucdp_orgv_cy_sb_dyad_ids_cy

Original tag: sb_dyad_ids_cy

Dataset citation: Davies et al. (2023), Sundberg & Melander (2013)

Merge scores:

Non-missing observations in original unit: Sum: 6544, Percent: 100

Non-missing observations in chosen unit: Sum: 6023, Percent: 20.09

Lost observations in chosen unit: Sum: 521 Percent: 7.96

Description:

The IDs of state-based dyads engaging in organized violence within the borders of a country in a given year. NO_DYAD is coded when there was no relevant record in UCDP GED.

5.1.1.3 Dyad Names for State-based Violence (sb_dyad_names_cy)

Long tag: ucdp_orgv_cy_sb_dyad_names_cy

Original tag: sb_dyad_names_cy

Dataset citation: Davies et al. (2023), Sundberg & Melander (2013)

Merge scores:

Non-missing observations in original unit: Sum: 6544, Percent: 100

Non-missing observations in chosen unit: Sum: 6023, Percent: 20.09

Lost observations in chosen unit: Sum: 521 Percent: 7.96

Description:

The names of state-based dyads engaging in organized violence within the borders of a country in a given year. NO_DYAD is coded when there was no relevant record in UCDP GED.

5.1.1.4 Total Fatalities (Best/High/Low Estimates) in State-based Violence (sb_total_deaths_best_cy)

Long tag: ucdp_orgv_cy_sb_total_deaths_best_cy

Original tag: sb_total_deaths_best_cy

Dataset citation: Davies et al. (2023), Sundberg & Melander (2013)

Merge scores:

Non-missing observations in original unit: Sum: 6544, Percent: 100

Non-missing observations in chosen unit: Sum: 6023, Percent: 20.09

Lost observations in chosen unit: Sum: 521 Percent: 7.96

Description:

The best/high/low estimates for the total number of fatalities in state-based violence within the borders of a country in a given year.

5.1.1.5 Existence of Intrastate State-based Violence (sb_intrastate_exist_cy)

Long tag: ucdp_orgv_cy_sb_intrastate_exist_cy

Original tag: sb_intrastate_exist_cy

Dataset citation: Davies et al. (2023), Sundberg & Melander (2013)

Merge scores:

Non-missing observations in original unit: Sum: 6544, Percent: 100

Non-missing observations in chosen unit: Sum: 6023, Percent: 20.09

Lost observations in chosen unit: Sum: 521 Percent: 7.96

Description:

The existence of intrastate state-based violence within the borders of a country in a given year. It is 1 if intrastate state-based violence occurs.

5.1.1.6 Dyad Count for Intrastate State-based Violence (sb_intrastate_dyad_count_cy)

Long tag: ucdp_orgv_cy_sb_intrastate_dyad_count_cy

Original tag: sb_intrastate_dyad_count_cy

Dataset citation: Davies et al. (2023), Sundberg & Melander (2013)

Merge scores:

Non-missing observations in original unit: Sum: 6544, Percent: 100

Non-missing observations in chosen unit: Sum: 6023, Percent: 20.09

Lost observations in chosen unit: Sum: 521 Percent: 7.96

Description:

The number of intrastate state-based dyads engaging in organized violence within the borders of a country in a given year.

5.1.1.7 Dyad Names for Intrastate State-based Violence (sb_intrastate_dyad_names_cy)

Long tag: ucdp_orgv_cy_sb_intrastate_dyad_names_cy

Original tag: sb_intrastate_dyad_names_cy

Dataset citation: Davies et al. (2023), Sundberg & Melander (2013)

Merge scores:

Non-missing observations in original unit: Sum: 6544, Percent: 100

Non-missing observations in chosen unit: Sum: 6023, Percent: 20.09

Lost observations in chosen unit: Sum: 521 Percent: 7.96

Description:

The names of intrastate state-based dyads engaging in organized violence within the borders of a country in a given year. NO_DYAD is coded when there was no relevant record in UCDP GED.

5.1.1.8 State-based Intrastate Main government Involvement (sb_intrastate_main_govt_inv_incomp_cy)

Long tag: ucdp_orgv_cy_sb_intrastate_main_govt_inv_incomp_cy

Original tag: sb_intrastate_main_govt_inv_incomp_cy

Dataset citation: Davies et al. (2023), Sundberg & Melander (2013)

Merge scores:

Non-missing observations in original unit: Sum: 6544, Percent: 100

Non-missing observations in chosen unit: Sum: 6023, Percent: 20.09

Lost observations in chosen unit: Sum: 521 Percent: 7.96

Description:

The involvement of the main government in forming the incompatibility of at least one intrastate state-based violence within the borders of a country in a given year. It is 1 if the main government is among the parties forming the incompatibility of at least one intrastate state-based violence.

5.1.1.9 Total Fatalities (Best/High/Low Estimates) in Intrastate State-based Violence (sb_intrastate_deaths_best_cy)

Long tag: ucdp_orgv_cy_sb_intrastate_deaths_best_cy

Original tag: sb_intrastate_deaths_best_cy

Dataset citation: Davies et al. (2023), Sundberg & Melander (2013)

Merge scores:

Non-missing observations in original unit: Sum: 6544, Percent: 100

Non-missing observations in chosen unit: Sum: 6023, Percent: 20.09

Lost observations in chosen unit: Sum: 521 Percent: 7.96

Description:

The best/high/low estimates for the total number of fatalities in intrastate state-based violence within the borders of a country in a given year.

5.1.1.10 Existence of Interstate State-based Violence (sb_interstate_exist_cy)

Long tag: ucdp_orgv_cy_sb_interstate_exist_cy

Original tag: sb_interstate_exist_cy

Dataset citation: Davies et al. (2023), Sundberg & Melander (2013)

Merge scores:

Non-missing observations in original unit: Sum: 6544, Percent: 100

Non-missing observations in chosen unit: Sum: 6023, Percent: 20.09

Lost observations in chosen unit: Sum: 521 Percent: 7.96

Description:

The existence of interstate state-based violence within the borders of a country in a given year. It is 1 if interstate statebased violence occurs.

5.1.1.11 Dyad Count for Interstate State-based Violence (sb_interstate_dyad_count_cy)

Long tag: ucdp_orgv_cy_sb_interstate_dyad_count_cy

Original tag: sb_interstate_dyad_count_cy

Dataset citation: Davies et al. (2023), Sundberg & Melander (2013)

Merge scores:

Non-missing observations in chosen unit: Sum: 6023, Percent: 20.09

Lost observations in chosen unit: Sum: 521 Percent: 7.96

Description:

The number of interstate state-based dyads engaging in organized violence within the borders of a country in a given year.

5.1.1.12 Dyad IDs for Intrastate State-based Violence (`sb_intrastate_dyad_ids_cy`)

Long tag: `ucdp_orgv_cy_sb_intrastate_dyad_ids_cy`

Original tag: `sb_intrastate_dyad_ids_cy`

Dataset citation: Davies et al. (2023), Sundberg & Melander (2013)

Merge scores:

Non-missing observations in original unit: Sum: 6544, Percent: 100

Non-missing observations in chosen unit: Sum: 6023, Percent: 20.09

Lost observations in chosen unit: Sum: 521 Percent: 7.96

Description:

The IDs of intrastate state-based dyads engaging in organized violence within the borders of a country in a given year. `NO_DYAD` is coded when there was no relevant record in UCDP GED.

5.1.1.13 Dyad Names for Interstate State-based Violence (`sb_interstate_dyad_names_cy`)

Long tag: `ucdp_orgv_cy_sb_interstate_dyad_names_cy`

Original tag: `sb_interstate_dyad_names_cy`

Dataset citation: Davies et al. (2023), Sundberg & Melander (2013)

Merge scores:

Non-missing observations in original unit: Sum: 6544, Percent: 100

Non-missing observations in chosen unit: Sum: 6023, Percent: 20.09

Lost observations in chosen unit: Sum: 521 Percent: 7.96

Description:

The names of interstate state-based dyads engaging in organized violence within the borders of a country in a given year. `NO_DYAD` is coded when there was no relevant record in UCDP GED.

5.1.1.14 State-based Interstate Main government Involvement (`sb_interstate_main_govt_inv_incomp_cy`)

Long tag: `ucdp_orgv_cy_sb_interstate_main_govt_inv_incomp_cy`

Original tag: `sb_interstate_main_govt_inv_incomp_cy`

Dataset citation: Davies et al. (2023), Sundberg & Melander (2013)

Merge scores:

Non-missing observations in original unit: Sum: 6544, Percent: 100

Non-missing observations in chosen unit: Sum: 6023, Percent: 20.09

Lost observations in chosen unit: Sum: 521 Percent: 7.96

Description:

The involvement of the main government in forming the incompatibility of at least one interstate state-based violence within the borders of a country in a given year. It is 1 if the main government is among the parties forming the incompatibility of at least one interstate state-based violence.

5.1.1.15 Total Fatalities (Best/High/Low Estimates) in Interstate State-based Violence (`sb_interstate_deaths_best_cy`)

Long tag: `ucdp_orgv_cy_sb_interstate_deaths_best_cy`

Original tag: `sb_interstate_deaths_best_cy`

Dataset citation: Davies et al. (2023), Sundberg & Melander (2013)

*Merge scores:**Non-missing observations in original unit:* Sum: 6544, Percent: 100*Non-missing observations in chosen unit:* Sum: 6023, Percent: 20.09*Lost observations in chosen unit:* Sum: 521 Percent: 7.96*Description:*

Lost observations in chosen unit: Sum: 521 Percent: 7.96

Description:

The best/high/low estimates for fatalities of the parties in non-state violence within the borders of a country in a given year.

5.1.2.5 Existence of Non-state Violence (ns_exist_cy)

Long tag: ucdp_orgv_cy_ns_exist_cy

Original tag: ns_exist_cy

Dataset citation: Davies et al. (2023), Sundberg & Melander (2013)

Merge scores:

Non-missing observations in original unit: Sum: 6544, Percent: 100

Non-missing observations in chosen unit: Sum: 6023, Percent: 20.09

Lost observations in chosen unit: Sum: 521 Percent: 7.96

Description:

The existence of non-state violence within the borders of a country in a given year. It is 1 if non-state violence occurs.

5.1.3 One-sided Violence

This section provides fatality figures for onesided violence.

5.1.3.1 Main Government Involved (os_main_govt_inv_cy)

Long tag: ucdp_orgv_cy_os_main_govt_inv_cy

Original tag: os_main_govt_inv_cy

Dataset citation: Davies et al. (2023), Sundberg & Melander (2013)

Merge scores:

Non-missing observations in original unit: Sum: 6544, Percent: 100

Non-missing observations in chosen unit: Sum: 6023, Percent: 20.09

Lost observations in chosen unit: Sum: 521 Percent: 7.96

Description:

The involvement of the main government in one-sided violence within the borders of a country in a given year. It is 1 if the main government is involved in one-sided violence.

5.1.3.2 One-sided Main Government Killings Best/High/Low Estimate (os_main_govt_killings_best_cy)

Long tag: ucdp_orgv_cy_os_main_govt_killings_best_cy

Original tag: os_main_govt_killing_best_cy

Dataset citation: Davies et al. (2023), Sundberg & Melander (2013)

Merge scores:

Non-missing observations in original unit: Sum: 6544, Percent: 100

Non-missing observations in chosen unit: Sum: 6023, Percent: 20.09

Lost observations in chosen unit: Sum: 521 Percent: 7.96

Description:

The best/high/low estimate for the total number of fatalities in one-sided violence by the main government within the borders of a country in a given year.

5.1.3.3 Involvement of Any Government in One-sided Violence (os_any_govt_inv_cy)

Long tag: ucdp_orgv_cy_os_any_govt_inv_cy

Original tag: os_any_govt_inv_cy

Dataset citation: Davies et al. (2023), Sundberg & Melander (2013)

Merge scores:

Non-missing observations in original unit: Sum: 6544, Percent: 100

Non-missing observations in chosen unit: Sum: 6023, Percent: 20.09

Lost observations in chosen unit: Sum: 521 Percent: 7.96

Description:

The involvement of any government actor in one-sided violence within the borders of a country in a given year. It is 1 if a government actor is involved in one-sided violence.

5.1.3.4 Total Fatalities (Best/High/Low Estimates) Caused by Any Government in One-sided Violence (os_any_govt_killings_best_cy)

Long tag: ucdp_orgv_cy_os_any_govt_killings_best_cy

Original tag: os_any_govt_killing_best_cy

Dataset citation: Davies et al. (2023), Sundberg & Melander (2013)

Merge scores:

Non-missing observations in original unit: Sum: 6544, Percent: 100

Non-missing observations in chosen unit: Sum: 6023, Percent: 20.09

Lost observations in chosen unit: Sum: 521 Percent: 7.96

Description:

The best/high/low estimates for the total number of fatalities in one-sided violence by the any government actors within the borders of a country in a given year. The figure includes

one-sided violence by the government of the country -if applicable.

5.1.3.5 Involvement of Non-state Actors in One-sided Violence (os_nsgroup_inv_cy)

Long tag: ucdp_orgv_cy_os_nsgroup_inv_cy

Original tag: os_nsgroup_inv_cy

Dataset citation: Davies et al. (2023), Sundberg & Melander (2013)

Merge scores:

Non-missing observations in original unit: Sum: 6544, Percent: 100

Non-missing observations in chosen unit: Sum: 6023, Percent: 20.09

Lost observations in chosen unit: Sum: 521 Percent: 7.96

Description:

The involvement of any non-state group in one-sided violence within the borders of a country in a given year. It is 1 if a non-state group is involved in one-sided violence.

5.1.3.6 Total Fatalities (Best/High/Low Estimates) Caused by Non-state Actors in One-sided Violence (os_nsgroup_killings_best_cy)

Long tag: ucdp_orgv_cy_os_nsgroup_killings_best_cy

Original tag: os_nsgroup_killings_best_cy

Dataset citation: Davies et al. (2023), Sundberg & Melander (2013)

Merge scores:

Non-missing observations in original unit: Sum: 6544, Percent: 100

Non-missing observations in chosen unit: Sum: 6023, Percent: 20.09

Lost observations in chosen unit: Sum: 521 Percent: 7.96

Description:

The best/high/low estimates for the total number of fatalities in one-sided violence by non-state groups within the borders of a country in a given year.

5.1.3.7 Total Fatalities (Best/High/Low Estimates) in One-sided Violence (os_total_deaths_best_cy)

Long tag: ucdp_orgv_cy_os_total_deaths_best_cy

Original tag: os_total_deaths_best_cy

Dataset citation: Davies et al. (2023), Sundberg & Melander (2013)

Merge scores:

Non-missing observations in original unit: Sum: 6544, Percent: 100

Non-missing observations in chosen unit: Sum: 6023, Percent: 20.09

Lost observations in chosen unit: Sum: 521 Percent: 7.96

Description:

The best/high/low estimates for the total number of fatalities in one-sided violence within the borders of a country in a given year.

5.1.3.8 Existence of One-sided Violence (os_exist_cy)

Long tag: ucdp_orgv_cy_os_exist_cy

Original tag: os_exist_cy

Dataset citation: Davies et al. (2023), Sundberg & Melander (2013)

Merge scores:

Non-missing observations in original unit: Sum: 6544, Percent: 100

Non-missing observations in chosen unit: Sum: 6023, Percent: 20.09

Lost observations in chosen unit: Sum: 521 Percent: 7.96

Description:

The existence of one-sided violence within the borders of a country in a given year. It is 1 if one-sided violence occurs.

5.1.4 Cumulative Fatalities

Cumulative Fatality figures per type of violence in a country-year.

5.1.4.1 Cumulative Fatalities (Best/High/Low Estimates) in Organized Violence (Includes State-based, Non-State, and One-sided Violence)
(cumulative_total_deaths_in_orgvio_best_cy)

Long tag: ucdp_orgv_cy_cumulative_total_deaths_in_orgvio_best_cy

Original tag: cumulative_total_deaths_in_orgvio_best_cy

Dataset citation: Davies et al. (2023), Sundberg & Melander (2013)

Merge scores:

Non-missing observations in original unit: Sum: 6544, Percent: 100

Non-missing observations in chosen unit: Sum: 6023, Percent: 20.09

Lost observations in chosen unit: Sum: 521 Percent: 7.96

Description:

The best/high/low estimates for fatalities in organized violence within the borders of a country in a given year. It covers fatality estimates from all three types of violence: state-based, non-state, one-sided

6 V-DEM

Based at the University of Gothenburg, the **Varieties of Democracy (V-Dem)** Research Project takes a comprehensive approach to understanding democratization. This approach encompasses multiple core principles: electoral, liberal, majoritarian, consensual, participatory, deliberative, and egalitarian. Each Principle is represented by a separate index, and each is regarded as a separate outcome in the proposed study. In this manner V-Dem reconceptualizes democracy from a single outcome to a set of outcomes. In addition, V-Dem breaks down each core principle into its constituent components, each to be measured separately. Components include features such as free and fair elections, civil liberties, judicial independence, executive constraints, gender equality, media freedom, and civil society. Finally, each component is disaggregated into specific indicators. This fundamentally different approach to democratization is made possible by the V-Dem Database, which measures 450+ indicators annually from 1789 to the present for all countries of the world. The V-Dem approach stands out, first, as a large global collaboration among scholars with diverse areas of expertise; second, as the first project attempting to explain different varieties of democracy; and third, thanks to the highly disaggregated V-Dem data, the first project to explore causal mechanisms linking different aspects of democracy together. With five Principal Investigators, 19 Project Managers with special responsibility for issue areas covered in the V-Dem dataset, around 23 Regional Managers, 134 Country Coordinators and more than 4000 Country Experts, the V-Dem project is one of the world's largest social science data collection projects on democracy. More information is available on the project's website: <https://www.v-dem.net/>

6.1 V-Dem Country-Year: V-Dem Full+Others v14

Dataset tag: `vdem_cy`

Output Unit: V-Dem Country-Year, i.e., data is collected per country and year. That means each row in the dataset can be identified by one country in combination with a year, using the columns `country_name` and `year`. The unit can also be expressed through a combination of the columns `country_id` or `country_text_id` and `year`.

Description: All 500 V-Dem indicators and 245 indices + 57 other indicators from other data sources. For R users, we recommend to install our `vdemdata` R package which includes the most recent V-Dem dataset and some useful functions to explore the data.

6.1.1 V-Dem Democracy Indices - V-Dem Mid-Level Indices: Components of the Democracy Indices

This section includes the V-Dem mid-level indices, subcomponents of the V-Dem Democracy Indices. Please see Appendix A of the V-Dem codebook

(<https://www.v-dem.net/static/website/img/refs/codebookv12.pdf>) for an overview of all indices, component-indices, and lower-level indices.

6.1.1.1 Clean elections index (v2xel_frefair)

Long tag: vdem_cy_v2xel_frefair

Original tag: v2xel_frefair

Dataset citation: Coppedge et al. (2024), Pemstein et al. (2024)

Variable citation: Pemstein et al. (2023), v2elembaut v2elembcap v2elrgstry v2elvotbuy v2elirreg v2elintim v2elpeace v2elfrfair v2x_elecreg

Merge scores:

Non-missing observations in original unit: Sum: 27612, Percent: 99.56

Non-missing observations in chosen unit: Sum: 27612, Percent: 92.12

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Staffan Lindberg, Jan Teorell

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent are elections free and fair?

CLARIFICATION: Free and fair connotes an absence of registration fraud, systematic irregularities, government intimidation of the opposition, vote buying, and election violence.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2elembaut v2elembcap v2elrgstry v2elvotbuy v2elirreg v2elintim v2elpeace v2elfrfair v2x_elecreg

DATA RELEASE: 1-14.

AGGREGATION: The index is formed by taking the point estimates from a Bayesian factor analysis model of the indicators for EMB autonomy (v2elembaut), EMB capacity (v2elembcap), election voter registry (v2elrgstry), election vote buying (v2elvotbuy), election other voting irregularities (v2elirreg), election government intimidation (v2elintim), non-state electoral violence (v2elpeace), and election free and fair (v2elfrfair). Since the bulk of these indicators are only observed in election years, the index scores have then been repeated within election regime periods as defined by v2x_elecreg. If a country is recorded as an electoral regime (v2x_elecreg) at the beginning of the time series until the first election that we record, then the scores for this election are backfilled towards the beginning of the time series.

CLEANING: Set to 0 when v2x_elecreg is 0.

YEARS: 1789-2023

CONVERGENCE: Model parameters with convergence issues: intercept.

6.1.2 V-Dem Indicators - Elections

Instructions to the coders (as shown in the surveys) Elections: Among national elections we distinguish elections to: (i) the lower or unicameral chamber of the legislature (including constituent or constitutional assemblies), (ii) the upper chamber of the legislature, and (iii) the presidency. For present purposes an executive who is elected by a legislature is considered a *prime minister*, not a president. In order to be considered a *president*, an executive must, under ordinary circumstances, be chosen directly by the electorate (perhaps mediated by an electoral college).

Non-election specific coding: The following questions are not election-specific and should be coded for every year from 1900 (or when applicable) to the present.

Election specific questions: The following questions pertain to specific national elections. The date of each election is pre-coded. In cases where more than one election is held on the same day(s), the questions in this section are for all elections taking place on that date. If you have coded for V-Dem in the past, your previous scores will be displayed in the survey. You are welcome to revise previously submitted scores in all surveys. For this section, we kindly ask you make sure that you have coded all election years.

Election specific questions – Historical clarification: The following questions pertain to specific national elections. National elections include elections to the presidency (if applicable) and legislature (lower and upper house, whatever applies), whether direct or indirect, as well as constituent assembly elections. It does not include other elections, *e.g.*, subnational elections, plebiscites, initiatives, referendums, or by-elections. The date of each election is pre-coded. In cases where more than one election is held on the same day(s), the questions in this section are for all elections taking place on that date."

Subnational elections and offices: This section of the survey asks a small number of questions about *subnational* elections and offices. You will be instructed to identify two subnational levels, referred to as "regional government" and "local government". Questions in this section should be answered for every year, rather than for specific elections.

Lower chamber election: The following questions pertain to specific lower chamber or unicameral legislative elections. The dates of these elections have been pre-coded.

Executive and legislative versions of Election specific variables

- In order to subset election specific variables for executive elections only (previously *_ex) – keep only those observations where v2xel_elecpres is 1.
- In order to subset election specific variables for legislative elections only (previously *_leg) –

keep only those observations where v2xel_elecparl is 1.

6.1.2.1 Election government intimidation (v2elintim)

Long tag: vdem_cy_v2elintim

Original tag: v2elintim

Dataset citation: Coppedge et al. (2024), Pemstein et al. (2024)

Merge scores:

Non-missing observations in original unit: Sum: 15662, Percent: 56.47

Non-missing observations in chosen unit: Sum: 15662, Percent: 52.25

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this national election, were opposition candidates/parties/campaign workers subjected to repression, intimidation, violence, or harassment by the government, the ruling party, or their agents?

CLARIFICATION: Other types of clearly distinguishable civil violence, even if politically motivated, during the election period should *not* be factored in when scoring this indicator (it is dealt with separately).

RESPONSES:

0: Yes. The repression and intimidation by the government or its agents was so strong that the entire period was quiet.

1: Yes, frequent: There was systematic, frequent and violent harassment and intimidation of the opposition by the government or its agents during the election period.

2: Yes, some. There was periodic, not systematic, but possibly centrally coordinated — harassment and intimidation of the opposition by the government or its agents.

3: Restrained. There were sporadic instances of violent harassment and intimidation by the government or its agents, in at least one part of the country, and directed at only one or two local branches of opposition groups.

4: None. There was no harassment or intimidation of opposition by the government or its agents, during the election campaign period and polling day.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-14.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates (v2eltype).

CITATION: Pemstein *et al.* (2024, *V-Dem Working Paper Series* 2024:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2023

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr
 QUESTION: In this national election, was the campaign period, election day, and post-election process free from other types not by the government, the ruling party, or their agents) of violence related to the conduct of the election and the campaigns (but not conducted by the government and its agents)?

RESPONSES:

0: No. There was widespread violence between civilians occurring throughout the election period, or in an intense period of more than a week and in large swaths of the country. It resulted in a large number of deaths or displaced refugees.

1: Not really. There were significant levels of violence but not throughout the election period or beyond limited parts of the country. A few people may have died as a result, and some people may have been forced to move temporarily.

2: Somewhat. There were some outbursts of limited violence for a day or two, and only in a small part of the country. The number of injured and otherwise affected was relatively small.

3: Almost. There were only a few instances of isolated violent acts, involving only a few people; no one died and very few were injured.

4: Peaceful. No election-related violence between civilians occurred.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-14.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CONVERGENCE: Model parameters with convergence issues: universal thresholds.

6.1.3 V-Dem Indicators - The Executive

Instructions to the coders (as shown in the surveys)

Executive:

In this section, we distinguish between the head of state (HOS) and the head of government (HOG). The *head of state* is an individual or collective body that serves as the chief public representative of the country. Sometimes this is a largely ceremonial role, *e.g.* a monarch who reigns but does not rule, or a president whose powers are strictly circumscribed. The *head of government* is the chief officer(s) of the executive branch of government, typically presiding over a cabinet. In a parliamentary system, this is usually the prime minister. In a presidential system, this is usually the president, who then serves as both, head of state and head of government. In a typical semi-presidential system, the president serves as head of state and the prime minister serves as head of government.

These definitions are grounded in the *functions* that each office performs, as described above. Titles can be confusing. Do not assume, for example, that simply because an individual holds the title of "president" s/he is serving as the chief public representative of the country. Likewise, it may be that the *effective* head of state/head of government is someone other than the *official* head of state/head of government. In this instance, the following questions apply to the person who effectively wields this power. In some socialist systems, for example, the official head of state was a person within the state bureaucracy, but in practice the chief public representative of the country was the chairman of the communist party. It is the latter who is the "effective" head of state, and hence should be the focus of your answers. The same applies if the head of state/head of government is so old, sick or perhaps mentally disabled that s/he cannot perform his/her functions, which are instead performed by someone else. It is the latter person who is the effective head of state/head of government.

If you are considering a semi sovereign territory, such as a colony, an annexed territory or a member of the British Commonwealth, please answer the following questions with respect to the head of state and (if separate) the head of government who is located in the territory in question. Thus, in a typical British colony the governor-general—not the King/Queen of England—would be understood as the head of state. Likewise, in a British colony the local prime minister in the colony—not the prime minister in London—would be understood as the head of government.

In order to mitigate potential misunderstandings, the identities of the head of state and head of government for each country have been pre-coded for as many years as possible. Thus, when conducting your coding make sure to pay close attention to the names of these individuals, which you can see by clicking on the year grid for a particular year in the first question of this section, "HOS name." This is your key to what we mean by "head of state" or "head of government."

Note also that when the two functions are fused in the same office, we ask you to code only the head of state section of the survey. Any precoded years contain an orange triangle. This means that either the score or text and/or specific date have already been entered, so we are asking you only to add your confidence in the precoded rating; we do not want you to change the rating, as we need all the Country Experts to answer the subsequent questions for the same executives. If you feel strongly that the precoded information is wrong, please rate your confidence in the preloaded information and then consult your V-Dem contact. You will have to rate confidence in all the available years in order to proceed to the next question.

In order to avoid spending time on short-lived executives, we have included only executives who held office for at least 100 days.

6.1.3.1 HOS appointment in practice (v2expathhs)

Long tag: vdem_cy_v2expathhs

Original tag: v2expathhs

Dataset citation: Coppedge et al. (2024), Pemstein et al. (2024)

Variable citation: (IPU), V-Dem country coordinators, www.constituteproject.org

Merge scores:

Non-missing observations in original unit: Sum: 27433, Percent: 98.91

Non-missing observations in chosen unit: Sum: 27433, Percent: 91.53

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Jan Teorell

QUESTION: How did the head of state reach office?

CLARIFICATION: If several bodies were involved in the appointment process, select the one that exerted the most critical impact on the decision. However, in the next question we ask separately about whether the approval of the legislature was necessary. Response category 7 should only be selected if the head of state is directly elected, not if he or she was appointed by the legislature after an election. We count as direct elections (category 7) also those indirect elections carried out by an electoral college, whose only purpose is to elect the president. In cases where an elected president dies, resigns, or is legally removed from office, and a line of succession is defined by the constitution, we code a vice president ascending to the presidency according to how they assumed the vice presidency. *E.g.*, coded under category 7 when elected on the same ticket as the outgoing president, or 6 if they were appointed by the legislature.

RESPONSES:

0: Through the threat of or application of force, such as a coup or rebellion.

1: Appointed by a foreign power.

2: Appointed by the ruling party (in a one-party system).

3: Appointed by a royal council.

4: Through hereditary succession.

5: Appointed by the military.

6: Appointed by the legislature.

7: Directly through a popular election (regardless of the extension of the suffrage).

8: Other.

ORDERING: If you select 0 or 8, proceed to the next question [v2exothhs]. If you select 1-5, skip to question "HOS selection by legislature in practice [v2exaphos]". If you selected 6-7, skip to question [v2excomhs].

SCALE: Nominal (v2expathhs), or a series of dichotomous scales.

SOURCE(S): V-Dem country coordinators; Constitute Project; IPU Parline.

NOTES: Converted from B to A coding. v2expathhs is coded according to appointment dates of the Head of State. The same is true for coups or rebellions where the date when the HOS was appointed through a coup, or the first day in office after the coup, is coded.

DATA RELEASE: 1-14.

COUNTRY-YEAR AGGREGATION: Maximum

DATE SPECIFIC: Coded on HOS appointment dates and December 31 (v2exnamhos).

Description:

VARIABLE TYPE: A*

PROJECT MANAGER(S): Carl Henrik Knutsen, Tore Wig, Vilde Lunnan Djuve

QUESTION: Could you specify the type of process that you consider the most important in leading to the end of the regime?

CLARIFICATION: The information on this question has been pre-coded for as many years as possible. Any pre-coded years contain an orange triangle. This means that what is considered the most important process that eventually ended the relevant regime has already been entered. We are asking you only to add your confidence in the pre-coded information. This means that the information has already been entered, so we are asking you only to add your confidence in the pre-coded rating; we do not want you to change the rating, as we need all the Country Experts to answer the subsequent questions for the same regime.

RESPONSES:

0: A military coup d'état.

1: A coup d'état conducted by other groups than the military.

2: A self-coup (autogolpe) conducted by the sitting leader.

3: Assassination of the sitting leader (but not related to a coup d'état)

4: Natural death of the sitting leader

5: Loss in civil war.

6: Loss in inter-state war.

7: Foreign intervention (other than loss in inter-state war)

8: Popular uprising.

9: Substantial political liberalization/democratization with some form of guidance by sitting regime leaders

10: Other type of directed and intentional transformational process of the regime under the guidance of sitting regime leaders (excluding political liberalization/democratization)

11: Substantial political liberalization/democratization without guidance by sitting regime leaders, occurring from some other process (such as an unexpected election loss for the sitting regime) than those specified by categories 1–10

12: Other process than those specified by categories 1–11.

13: The regime still exists

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Carl Henrik Knutsen, Tore Wig, Vilde Lunnan Djuve

QUESTION: Is there an identifiable political regime?

CLARIFICATION: This question is used to identify so-called interregnum periods, where no political regime is in control over the entity. Different types of political situations can lead to periods of time under which there is no identifiable political regime, one example being a civil war in which none of the parties have clear control over political bodies and processes in the country. However, the interregnum coding is employed conservatively, meaning that partial control over political bodies and processes in fairly large parts of the country (which is often the case also during civil wars) is sufficient for a 0 score.

Please note that the expert coded (C) questions on support and opposition groups in the regime survey are only coded when v2regint=1.

RESPONSES:

0: No.

1: Yes.

SCALE: Dichotomous

6.1.4 V-Dem Indicators - The Legislature

Instructions to the coders (as shown in the surveys)

The Legislature:

The following questions pertain to the legislature, an assembly of deputies or representatives with powers to consider, pass, amend, or repeal laws. If there is no legislature in the country you are coding for some period of years, do not code any questions for those years. If you are considering a semi-sovereign territory such as a colony please answer this question with respect to the legislature that is seated within the territory in question (such as the local legislative assembly in a British colony, not the Parliament in London). A popular election need not involve universal suffrage; indeed, suffrage may be highly restricted. A "direct election" can include seats reserved for special groups (*e.g.*, ethnic groups or women) so long as these members are chosen by popular election.

Frequently, it is important to distinguish between formal rules (as stipulated by statute, legislative rules, the constitution, or common law precedent) and actual practice (what happens on the ground). In order to clarify the *de jure/de facto* distinction, we employ the terms "by law..." and "in practice..." Please pay close attention to these cues. Note that sometimes we ask different coders to code different aspects of a question. So, you might get a question about the *de facto* state of affairs, but another source might provide the answer to the *de jure* state of affairs.

6.1.4.1 Legislature declares war by law (v2lgwarlaw)

Long tag: vdem_cy_v2lgwarlaw

Original tag: v2lgwarlaw

Dataset citation: Coppedge et al. (2024), Pemstein et al. (2024)

Variable citation: Elkins et al. (2014), National constitutions, V-Dem country coordinators

Merge scores:

PROJECT MANAGER(S): Steven Fish, Matthew Kroenig

QUESTION: By law, is the approval of the lower (or unicameral) chamber of the legislature necessary to declare war?

RESPONSES:

0: No.

1: Yes.

SCALE: Dichotomous.

SOURCE(S): CCP (Elkins *et al.* 2012), v488; Constitute Project; V-Dem country coordinators.

NOTES: Converted from (B) to (A) coding. V-Dem Country Coordinators answers were used for country-years where data was missing in CCP (Elkins *et al.* 2012).

DATA RELEASE: 6-14.

COUNTRY-YEAR AGGREGATION: Last

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2023

6.1.5 V-Dem Indicators - Civil Liberty

Instructions to the coders (as shown in the surveys)

Civil Liberty: The following questions are focused on actual practices (*de facto*) rather than formal legal or constitutional rights (*de jure*). Note that if there is significant variation in the respect for a particular civil liberty across the territory, the score should reflect the "average situation" across the territorial scope of the country unit (for each period) as defined in the coder instructions.

6.1.5.1 Freedom from torture (v2cltort)

Long tag: vdem_cy_v2cltort

Original tag: v2cltort

Dataset citation: Coppedge et al. (2024), Pemstein et al. (2024)

Merge scores:

Non-missing observations in original unit: Sum: 27619, Percent: 99.59

Non-missing observations in chosen unit: Sum: 27619, Percent: 92.15

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is there freedom from torture?

CLARIFICATION: Torture refers to the purposeful inflicting of extreme pain, whether mental or physical, with an aim to extract information or intimidate victims, who are in a state of incarceration. Here, we are concerned with torture practiced by state officials or other agents of the state (*e.g.*, police, security forces, prison guards, and paramilitary groups).

RESPONSES:

0: Not respected by public authorities. Torture is practiced systematically and is incited and approved by the leaders of government.

1: Weakly respected by public authorities. Torture is practiced frequently but is often not incited or approved by top leaders of government. At the same time, leaders of government are not actively working to prevent it.

2: Somewhat. Torture is practiced occasionally but is typically not approved by top leaders of government.

3: Mostly respected by public authorities. Torture is practiced in a few isolated cases but is not incited or approved by top government leaders.

4: Fully respected by public authorities. Torture is non-existent.

SCALE: Ordinal, converted to interval by the measurement model.

6.1.6 V-Dem Indicators - Sovereignty and State

Instructions to the coders (as shown in the surveys)

Sovereignty: This section addresses a number of issues concerning the sovereignty of the state. A state is political organization that organizes compulsory domination over a fixed territory on a continual basis. With respect to state sovereignty, we are interested in measuring two distinct areas of sovereignty. The first is an attribute of states within the context of the international system. Here, we are interested in the state's autonomy from other actors in the system. The second component of sovereignty concerns the relationship of the state to the population and territory over which it claims to rule. Here, we want to gauge the extent of recognition of the preeminent authority of the state over its claimed territory and population.

Sovereignty – Historical clarification: This section addresses a number of issues concerning the state. A state is a political organization that organizes compulsory domination over a fixed territory on a continual basis. The questions concern two general themes: state sovereignty and state administration.

With respect to state sovereignty, we are interested in measuring two distinct areas of sovereignty. The first is an attribute of states within the context of the international system. Here, we are interested in the state's autonomy from and recognition by other actors in the system. The second component of sovereignty concerns the relationship of the state to the population and territory over which it claims to rule. Here, we want to gauge the extent of recognition of the preeminent authority of the state over its claimed territory and population.

A second attribute of states is the state administration: the set of institutions that administer and implement governmental decisions. Here we are mainly interested in the professionalization, or lack thereof, of the state administrative staff – in this context termed the state administrators.

The State: “This section addresses a number of issues concerning the state. A state is a political organization that organizes compulsory domination over a fixed territory on a continual basis. The questions concern two general themes: state sovereignty and state administration.

With respect to state sovereignty, we are interested in measuring two distinct areas of sovereignty. The first is an attribute of states within the context of the international system. Here, we are interested in the state's autonomy from and recognition by other actors in the system. The second component of sovereignty concerns the relationship of the state to the population and territory over which it claims to rule. Here, we want to gauge the extent of recognition of the preeminent authority of the state over its claimed territory and population.

A second attribute of states is the state administration: the set of institutions that administer and implement governmental decisions. Here we are mainly interested in the professionalization, or lack thereof, of the state administrative staff—in this context termed the state administrators.”

6.1.6.1 Domestic Autonomy (v2svdomaut)

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is the state autonomous from the control of other states with respect to the conduct of domestic policy?

CLARIFICATION: The question of domestic autonomy does not include restrictions emanating from treaties (*e.g.*, NATO), international organizations (*e.g.*, the WTO), or confederations (*e.g.*, the European Union) if these agreements are freely negotiated by the

state and if the state is free to exit from that treaty, organization, or confederation. Nor does it include restrictions on policymaking emanating from international market forces and trans-national corporations.

RESPONSES:

0: Non-autonomous. National level authority is exercised by an external power, either by law or in practice. The most common examples of this are direct colonial rule and military occupation (*e.g.* quadripartite occupation of Germany in 1945). It also includes situations in which domestic actors provide *de jure* cover for *de facto* control by a foreign power (*e.g.* Vichy France). However, control of some part of the territory of a state by an enemy during war is not considered control by external actors if the sovereign government remains on scene and continues to wage conventional war (*e.g.*, the USSR during WW II).

1: Semi-autonomous. An external political actor directly constrains the ability of domestic actors to rule, decides who can or cannot rule through formal rules or informal understandings, or precludes certain policies through explicit treaty provisions or well-understood rules of the game from which the subject state cannot withdraw. Examples include Soviet "satellite" states in Eastern Europe, and situations where colonial powers grant limited powers of national self-government to their possessions (*e.g.*, protectorates and limited home government).

2: Autonomous. Domestic political actors exercise political authority free of the direct control of external political actors.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-14.

6.1.7 V-Dem Indicators - Civic and Academic Space

Instructions to the coders (as shown in the surveys)

Civic and Academic Space:

In this survey, we ask you to assess several issues concerning the space for and state of civil society and academia. First, we ask about some general issues such as polarization and peaceful assembly. Then, we probe into mobilization for mass events and associations. Finally, we ask you to consider questions related to academia.

6.1.7.1 Political violence (v2caviol)

Long tag: vdem_cy_v2caviol

Original tag: v2caviol

Merge scores:

Non-missing observations in original unit: Sum: 18996, Percent: 68.49

Non-missing observations in chosen unit: Sum: 18996, Percent: 63.38

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Katrin Kinzelbach

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How often have non-state actors used political violence against persons this year?

CLARIFICATION: We understand political violence as the use of physical force to achieve political objectives by non-state actors. The restriction to political objectives excludes profit-driven crime-related violence, for instance. By non-state actors we refer to individuals or entities that are not formally part of the state. Thus, politically oriented militias and

youth groups count as non-state actors even though they might potentially be informally affiliated with the ruling party or the state. Political violence against persons excludes psychological and symbolic violence (e.g. destruction of objects).

RESPONSES:

0: Not at all. Non-state actors did not use political violence.

1: Rare. Non-state actors rarely used political violence.

2: Occasionally. Non-state actors occasionally used political violence.

3: Frequently. Non-state actors frequently used political violence.

4: Often. Non-state actors often used political violence.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-14.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

QUESTION: Was a national state of emergency in place at any point this year?

CLARIFICATION: A state of emergency is a formal legal act that enables state actors and institutions to change their roles during times of international or domestic crisis. Our definition of state of emergency includes the application of martial law. If there was more than one state of emergency, code the one that was in place for the longer time. Select one option.

RESPONSES:

0: The legal framework does not allow for a declaration of a national state of emergency. (0=No, 1=Yes) [v2casoe_0]

1: There was no state of emergency in place at any point this year, even though provisions for a declaration of a national state of emergency exist. (0=No, 1=Yes) [v2casoe_1]

2: A national state of emergency was in place due to a natural disaster. (0=No, 1=Yes) [v2casoe_2]

3: A national state of emergency was in place due to a terrorist attack. (0=No, 1=Yes) [v2casoe_3]

4: A national state of emergency was in place due to an armed conflict/war, domestically or internationally. (0=No, 1=Yes) [v2casoe_4]

5: A national state of emergency was in place due to mass protest/popular uprising. (0=No, 1=Yes) [v2casoe_5]

6: A national state of emergency was in place for reasons other than those listed above. (0=No, 1=Yes) [v2casoe_6]

SCALE: Series of dichotomous scales.

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Katrin Kinzelbach, Ilyas Saliba, Janika Spannagel

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent are campuses free from politically motivated surveillance or security infringements?

CLARIFICATION: “Campus” refers to all university buildings as well as digital research and teaching platforms. Campus integrity means the preservation of an open learning and research environment marked by an absence of an externally induced climate of insecurity or intimidation on campus. Examples of infringements of campus integrity are politically motivated on-campus or digital surveillance, presence by intelligence or security forces, presence of student militias, or violent attacks by third parties, if specifically targeting

universities to repress academic life on campus. Note that we are only interested in politically motivated infringements and targeted attacks on campus integrity, not in non-political security concerns or proportionate security measures taken on campus to address these.

RESPONSES:

0: Completely restricted. Campus integrity is fundamentally undermined by extensive surveillance and severe intimidation, including violence or closures.

1: Severely restricted. Campus integrity is to a large extent undermined by surveillance and intimidation, at times including violence or closures.

2: Moderately restricted. Campus integrity is challenged by some significant cases of surveillance or intimidation.

3: Mostly free. Campus integrity is to a large extent respected, with only minor cases of surveillance or intimidation.

4: Fully free. Campus integrity is comprehensively respected; there are no cases of surveillance or intimidation.

SCALE: Ordinal, converted to interval by the measurement model.

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent do scholars and university students publicly criticize government policies?

CLARIFICATION: This question is only about the extent scholars and students actually criticize government policies – irrespective of how free they are to do so and whether they are met with repression or not. We ask you simply to consider to what extent scholars and students are noticeable as government critics in the public discourse.

Public criticism of government policies can be conveyed for example through the publication of op-eds or social media posts on current affairs, the signing of open letters or petitions, the taking part in or organization of public protests, or the holding of critical lectures to students or the public.

RESPONSES:

0: Not at all. Scholars and university students do not publicly express criticism of government policies.

1: To a small extent. Scholars and university students publicly express minor criticism of government policies.

2: To a moderate extent. Scholars and university students publicly express moderate criticism of government policies.

3: To a large extent. Scholars and university students publicly express substantive criticism of government policies.

4: To a major extent. Scholars and university students publicly express fundamental criticism

of government policies.

6.1.8 Historical V-Dem - Sovereignty and State

This part of the codebook contains variables pertaining to the Historical V-Dem data collection. A maximum of 91 countries are included in the sample (see the country table), but some variables (in particular C type variables) cover fewer countries, as coding is still ongoing. For more information on the Historical V-Dem project, please refer to the Organization and Management document (<https://www.v-dem.net/static/website/img/refs/orgmanv111.pdf>) or the Historical V-Dem page: <https://www.v-dem.net/hdata.html>. The vast majority of questions coded by Historical V-Dem are V-Dem indicators previously coded back to 1900, and these indicators are found in other sections of the codebook with merged time series extending all the way from 1789 to the present.

The *Historical V-Dem - Sovereignty and State*- section includes new A, A* and C type indicators that have (at least so far) only been coded for Historical V-Dem, with the modal time series spanning the years 1789-1920 (although time series coverage is different for some variables). This section also includes v3elcomvot, which is coded as a type C variable in Historical V-Dem, while v2elcomvot is coded as a type A variable in Contemporary V-Dem.

For instructions given to the coders (as shown in the surveys), please see introductions to the corresponding theme in the corresponding V-Dem Indicators section.

6.1.8.1 State steering capacity (v3ststeecap)

Long tag: vdem_cy_v3ststeecap

Original tag: v3ststeecap

Dataset citation: Coppedge *et al.* (2024), Pemstein *et al.* (2024)

Merge scores:

Non-missing observations in original unit: Sum: 9653, Percent: 34.81

Non-missing observations in chosen unit: Sum: 9653, Percent: 32.21

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Can the state oversee and regulate the economy?

CLARIFICATION: This refers to the state's ability to keep track of economic activities in its territory and potentially influence them by shaping the incentives and constraints that private firms face to do business; *e.g.*, through licensing, granting exploitation rights, taxing, imposing market barriers, building infrastructure, offering subsidies, adjudicating conflicts, or enforcing regulations.

RESPONSES:

0: Most economic activities happen outside the reach of the state

1: The state steers some economic activities

2: The state steers a substantial share – but less than half – of the national economy

3: The state steers about half or more than half, of the national economy

4: The state steers all or almost all economic activities

SCALE: Ordinal.

DATA RELEASE: 8-14.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see

V-Dem Methodology).

CITATION: Pemstein *et al.* (2024, *V-Dem Working Paper Series* 2024:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2010

6.1.9 Historical V-Dem - Overlap Period Discrepancies

This part of the codebook contains variables pertaining to the Historical V-Dem data collection. A maximum of 91 countries are included in the sample (see the country table), but some variables (in particular C type variables) cover fewer countries, as coding is still ongoing. For more information on the Historical V-Dem project, please refer to the Organization and Management document (<https://www.v-dem.net/static/website/img/refs/orgmanv111.pdf>) or the Historical V-Dem page: <https://www.v-dem.net/hdata.html>. The vast majority of questions coded by Historical V-Dem are V-Dem indicators previously coded back to 1900, and these indicators are found in other sections of the codebook with merged time series extending all the way from 1789 to the present.

This section includes A and A* variables where there is a discrepancy in the coding of some observations between the Historical and Contemporary V-Dem coding for the overlap period (typically 1900-1920). The v2-versions of these variables, reported elsewhere in the codebook, report the Contemporary V-Dem scores in cases of discrepancies in the overlap period.

Remaining inconsistencies in the Historical and Contemporary V-Dem coding, that are not due to substantive differences in the indicators, will be sorted out for version 10 of the dataset.

6.1.9.1 HOS appointment in practice (v3expathhs)

Long tag: vdem_cy_v3expathhs

Original tag: v3expathhs

Variable citation: Various country-specific sources

Merge scores:

Non-missing observations in original unit: Sum: 8117, Percent: 29.27

Non-missing observations in chosen unit: Sum: 8117, Percent: 27.08

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Jan Teorell

QUESTION: How did the head of state reach office?

CLARIFICATION: If several bodies were involved in the appointment process, select the one that exerted the most critical impact on the decision. However, in the next question we ask separately about whether the approval of the legislature was necessary. Response category 7 should only be selected if the head of state is directly elected, not if he or she was appointed by the legislature after an election.

RESPONSES:

0: Through the threat of or application of force, such as a coup or rebellion.

1: Appointed by a foreign power.

2: Appointed by the ruling party (in a one-party system).

3: Appointed by a royal council.

4: Through hereditary succession.

5: Appointed by the military.

6: Appointed by the legislature.

7: Directly through a popular election (regardless of the extension of the suffrage).

8: Other.

SCALE: Nominal

SOURCE(S): Various country-specific sources

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

QUESTION: To what extent is the power base of the chief executive determined by the military?

CLARIFICATION: Representing one of five regime dimensions, each of which may be more or less present in any given case, this index taps into the extent to which the appointment and dismissal of the chief executive is based on the threat or actual use of military force.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2expathhs v2expathhg v2exremhsp_ord v2exrmhsol_2 v2exrmhsol_3 v2exrmhsol_4 v2exhoshog v2ex_hosw v2exremhog v2exrmhgnp_2 v2exrmhgnp_3 v2exrmhgnp_4 v2ex_elechos v2ex_elechog v2ex_hogw

DATA RELEASE: 9-14.

AGGREGATION: The index is based on whether the “chief executive” was (a) appointed through a coup, rebellion or by the military, and (b) can be dismissed by the military. Both condition (a) and (b) are coded as present (1) or not (0); we then average across the two. In nominally dual systems, where the head of state (HOS) and the head of government (HOG) are not the same individual, we determine who is the “chief executive” by comparing HOS and HOG powers over the appointment and dismissal of cabinet ministers. We aggregate across the two executives by taking the average weighted by their relative powers over cabinet formation and dismissal.

PROJECT MANAGER(S): Staffan I. Lindberg, Jan Teorell

QUESTION: At this time, are regularly scheduled national elections on course, as stipulated by election law or well-established precedent?

CLARIFICATION: Coded 0 until an executive or legislative election is held, defined by v2xel_elecparl and v2xel_elecparl, then set to 1 until any of the following two events occur (if they occur): (a) that the election was "aborted", meaning that those elected did not resume power, as defined by v2x_hosabort and v2x_legabort; or (b) an "electoral interruption", meaning that either the legislature was shut down, as defined by v2xlg_leginter, or there was an executive coup, as defined by v2x_hosinter; in the case of (a) or (b), v2x_elecreg is set to 0 until there is another election. The operational indicator of an "aborted" executive election (v2x_hosabort) is that v2expathhs did not turn 7 within 12 months after the election, for a legislative election (v2x_legabort) that v2lgbicam did not turn positive within 12 months after the election. An interruption of the electoral regime occurring through the HOS, e.g. a coup d'etat, is indicated by v2x_hosinter as a change in v2xel_elecparl, meaning v2expathhs turned from 7 to something else, with the exception of 6, approval by the legislature (in case the legislature remained in place). An interruption of the electoral regime occurring through the legislature is defined by v2xlg_leginter based on v2lgbicam turning 0. We note that the coding of v2x_elecreg does not merely follow mechanically from the scores on these other variables, as the coding of v2x_elecreg has also been cross-checked and validated by research assistants. An executive and a legislative electoral regime cannot be separated since they form an integral part, where an aborted legislature is interpreted as a signal that also the executive is not standing for election any longer, and vice versa.

RESPONSES:

0: No.

1: Yes.

SCALE: Dichotomous.

VARIABLE TYPE: A

PROJECT MANAGER(S): Staffan I. Lindberg, Jan Teorell

QUESTION: At this time, are regularly scheduled national elections on the executive on course, as stipulated by election law or well-established precedent?

CLARIFICATION: Although we advice against it, since the executive and legislative electoral regime should be considered an integral part, for completeness we also provide this separate measure of executive electoral regimes. Coded 0 until an executive election is held, defined by v2x_elecpres, then set to 1 until any of the following two events occur (if they occur): (a) that the election was "aborted", meaning that those elected did not resume power, as defined by v2x_hosabort; or (b) an "electoral interruption", meaning that there was an executive coup, as defined by v2x_hosinter; in the case of (a) or (b), v2xex_elecreg is set to 0 until there is another election.

6.1.13 Digital Society Survey - Social Cleavages

The Digital Society Survey, designed by the Digital Society Project, contains questions pertaining to the political environment of the internet and social media. The data collected through expert-coded surveys provides information on topics related to coordinated information operations, digital media freedom, online media polarization, social cleavages as well as state internet regulation capacity and approach.

Principal investigators for the Digital Society Project are Valeriya Mechkova, Daniel Pemstein, Brigitte Seim, Steven Wilson.

For more information, please visit www.digitalsocietyproject.org.

Instructions to the coders (as shown in the surveys)

Digital society: The following survey contains questions pertaining to the political environment of the Internet and social media. Please bear in mind the following definitions as you respond to questions on this survey:

The government and its agents include official government organs, such as bureaucracies, courts, intelligence services, and the military, but also unofficial agents, such as officially unaffiliated cyber-warfare operatives who perform services, even “off-book” work, on behalf of the government.

Major political parties include the group of political parties that hold a significant number of seats in national legislative body(-ies), or earn a significant number of votes in elections for the executive. When we ask you to consider “major political parties,” you do not need to consider parties that run in elections but receive only a small minority of seats or votes, or those that receive no seats at all.

We define the Internet as all information that people access over public and private digital

networks, worldwide. The Internet includes both publicly accessible digital spaces and private or gated information transmission platforms. The Internet does not include traditional media transmission mechanisms such as paper, television, traditional voice telephone, and radio.

Social media are a subset of Internet platforms that enable normal individuals to create and share content with networks of other people. Social media platforms are available to the public, although content on such networks may be shared privately within subgroups of users. Social media includes both publicly visible, or semi-public platforms, like Facebook, Flickr, Friendster, Google+, Instagram, Myspace, LinkedIn, Twitter, VKontakte, and Weibo and private social networking and messaging platforms like Signal, Slack, Snapchat, or WhatsApp.

Domestic online media is any media source originating in the country in question. For example, the New York Times' website is domestic online media in the United States, but not in India, even though it operates bureaus in India. Media includes any source reporting on current events or political issues, ranging from well-established brands to newsletters and websites run by an individual.

Cyber security threats include penetration of private digital networks, using means ranging from exploiting software vulnerabilities, password cracking, or social engineering (e.g., tricking individuals into revealing passwords or other information necessary to break into a digital system) to obtain information or disrupt an organization or individual's use of digital networks and tools. They also include unauthorized alterations of an individual or organization's digital presence, such as defacing websites and commandeering social media accounts. These threats range from unsophisticated (e.g., exploitation of failure to password protect private networks or use of common passwords by authorized users, and spear phishing) to moderate (e.g., embedding malicious code in emails or exploiting well-known software flaws that organizations have failed to patch), to sophisticated (e.g., exploiting unknown exploits in commonly used software or even embedding exploits into commercial systems unbeknownst to their creators).

Clarification: When we discuss shutting down online content, please consider instances where a website (or websites) have been taken entirely offline as well as instances where a website (or websites) have been slowed down or had access similarly intentionally inhibited, such that use of this website is challenging. In other words, both outright shutting down and more subtle measures that inhibit access should be considered when answering these questions.

Clarification: When we discuss "censorship" or "censoring" content online, we are not concerned with censorship of topics such as child pornography, highly classified information such as military or intelligence secrets, or defamatory speech, unless this sort of censorship is used as a pretext for censoring political information or opinions.

6.1.13.1 Use of social media to organize offline violence (v2smorgviol)

Long tag: vdem_cy_v2smorgviol

Original tag: v2smorgviol

Dataset citation: Coppedge et al. (2024), Pemstein et al. (2024)

Merge scores:

Variable citation: Boix et al. (2013, 2022b)

Merge scores:

Non-missing observations in original unit: Sum: 17631, Percent: 63.57

Non-missing observations in chosen unit: Sum: 17631, Percent: 58.82

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

VARIABLE TYPE: E
QUESTION: Is the country a democracy?
CLARIFICATION: This is the same measure as democracy, except it records an `quot;NAquot;` for countries occupied during an international war (*e.g.*, the Netherlands 1940-44) or experiencing state collapse during a civil war (*e.g.*, Lebanon 1976-89). The democracy variable instead fills in these years as continuations of the same regime type.
RESPONSES:
0: No
1: Yes
2: NA
SOURCE(S): Boix *et al.* (2013), Boix *et al.* (2022)
NOTES: This variable is taken from version 4 of the Boix-Miller-Rosato dataset. Last update, January 2022.
DATA RELEASE: 5-14.
CITATION: Boix *et al.* (2013).
YEARS: 1800-2020

6.1.16 Other Democracy Indices and Indicators - Freedom House

This section lists other indicators on democracy, that may help in evaluating the causes and effects of democracy or which may provide convergent validity tests for V-Dem data, divided into sections based on source.

6.1.16.1 Freedom House: Rule of Law (e_fh_rol)

Long tag: vdem_cy_e_fh_rol

Original tag: e_fh_rol

Dataset citation: Coppedge et al. (2024), Pemstein et al. (2024)

Variable citation: Teorell et al. (2019)

Merge scores:

Non-missing observations in original unit: Sum: 2934, Percent: 10.58

Non-missing observations in chosen unit: Sum: 2934, Percent: 9.79

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

VARIABLE TYPE: E

CLARIFICATION: The variable measures the independence of the judiciary; the extent to which rule of law prevails in civil and criminal matters; the existence of direct civil control over the police; the protection from political terror, unjustified imprisonment, exile and torture; absence of war and insurgencies; and the extent to which laws, policies and practices guarantee equal treatment of various segments of the population.

RESPONSES:

Countries are graded between 0 (worst) and 16 (best).

SOURCE(S): Freedom House (2022). Taken from Teorell et al (2018).

NOTES: This variable is rescaled between 0 and 1 for comparison with V-Dem democracy indices for the online visualisation tools on the website.

DATA RELEASE: 5-14.

CITATION: Freedom House (2022).

YEARS: 2005-2022

6.1.17 Other Democracy Indices and Indicators - World Bank Governance Indicators

This section lists other indicators on democracy, that may help in evaluating the causes and effects of democracy or which may provide convergent validity tests for V-Dem data, divided into sections based on source.

6.1.17.1 Political stability — estimate (e_wbgi_pve)

Long tag: vdem_cy_e_wbgi_pve

Original tag: e_wbgi_pve

Dataset citation: Coppedge et al. (2024), Pemstein et al. (2024)

Variable citation: Kaufmann & Kraay (2016)

Non-missing observations in original unit: Sum: 4169, Percent: 15.03

Non-missing observations in chosen unit: Sum: 4169, Percent: 13.91

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

VARIABLE TYPE: E

CLARIFICATION: Political Stability; combines several indicators which measure perceptions of the likelihood that the government in power will be destabilized or overthrown by possibly unconstitutional and/or violent means, including domestic violence and terrorism.

SOURCE(S): Kaufmann *et al.* (2016).

DATA RELEASE: 5-14.

CITATION: Kaufmann *et al.* (2016).

YEARS: 1996-2022

6.1.18 Other Democracy Indices and Indicators - Political Institutions and Political Events

This section lists other indicators on democracy, that may help in evaluating the causes and effects of democracy or which may provide convergent validity tests for V-Dem data, divided into sections based on source.

6.1.18.1 Coups (Przeworski et al.) (e_coups)

Long tag: vdem_cy_e_coups

Original tag: e_coups

Dataset citation: Coppedge et al. (2024), Pemstein et al. (2024)

Variable citation: Przeworski et al. (2013)

Merge scores:

Non-missing observations in original unit: Sum: 13813, Percent: 49.81

Non-missing observations in chosen unit: Sum: 13813, Percent: 46.08

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

VARIABLE TYPE: E

CLARIFICATION: Number of successful coups d'état during a given year. A coup is any event resulting in an irregular removal or resignation of the chief executive that involves a violent action or an explicit threat of resorting to it, by an armed organization. Assassinations of the chief executive are not considered coups unless the group responsible for the action takes over the office. Whenever the rules about the replacement of the chief executive are either not codified or unclear, the force criterion prevails. The definition excludes resignations under pressure of popular mobilization if no armed group (legal or not) is involved (resignation of Carlos Mesa in Bolivia). Similarly, irregular transfers of power among civilians that do not entail force (such as changes of communist leaders) are not considered coups. We place no restriction on whether the armed group causing the replacement is domestic or foreign, nor on the identity of the incoming ruler. In particular, any military intervention of foreign powers producing a replacement of the chief executive is coded as a coup, even if they restore a previously elected ruler (French troops overthrowing Bokassa in Central African Republic). As a general rule, any replacement of a military chief executive by another military man is considered a coup, unless the succession occurred according to pre-established rules (Figueirido replacing Geisel in Brazil). Specifically, resignations of the military chief executive caused by votes of non-confidence of irregular military bodies are considered coups (Galtieri replacing Viola in Argentina). The variable is compatible to other conventional sources such as Powell and Thyne (2011), Marshall and Marshall (2009), and Svolik and Akcinaroglu (2010) for the period 1950–2008, with some difference in the interpretation of specific events. Information for the pre-1950 era is more scarce and therefore the coding may be less reliable.

SOURCE(S): Przeworski *et al.* (2013).

NOTES: Where there is more than one observation per country-year, the maximum of the variable for this period is taken.

DATA RELEASE: 5-14.

CITATION: Przeworski *et al.* (2013).

YEARS: 1789-2008

6.1.19 Other Democracy Indices and Indicators - Others

This section lists other indicators on democracy, that may help in evaluating the causes and effects of democracy or which may provide convergent validity tests for V-Dem data, divided into sections based on source.

6.1.19.1 Democratic breakdown (Bernhard et al.) (e_bnr_dem)

Long tag: vdem_cy_e_bnr_dem

Original tag: e_bnr_dem

Dataset citation: Coppedge et al. (2024), Pemstein et al. (2024)

Variable citation: Bernhard et al. (2001), Teorell et al. (2022)

Merge scores:

Non-missing observations in original unit: Sum: 2868, Percent: 10.34

Non-missing observations in chosen unit: Sum: 2868, Percent: 9.57

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

VARIABLE TYPE: E

CLARIFICATION: Countries that meet the minimum conditions for democracy (see below) enter the dataset and are coded "0"; When countries cease to meet those minimum criteria they are coded "1" and exit from the dataset.

SCALE: Dichotomous.

SOURCE(S): Bernhard *et al.* (2001). Taken from Quality of Government Standard Dataset version Jan22 *et al.* (2022).

NOTES: If, after a democratic breakdown, a country again meets our minimum criteria it re-enters the data as a new democratic episode. The time frame onset in 1913 is a function of when the first country (Norway) meets the minimum conditions. All series terminate in either in a breakdown in various years or right censorship in 2005. The minimal conditions are based on Dahl's notion of polyarchy (competitiveness, inclusiveness) combined with Linz and Stepan's stateness criteria. Competitiveness: Like Przeworski *et al.* we include countries that hold elections for both the executive and legislature, and in which more than one party contests the elections. However, we exclude cases in which we detected outcome changing vote fraud, in which there was either extensive or extreme violence that inhibited voters' preference expression, or in which political parties representing a substantial portion of the population were banned. Inclusiveness: We only include competitive polities in which at least fifty percent of all adult citizens are enfranchised to vote in our set of democracies. Stateness: We also considered questions of sovereignty, not including colonial states, where founding elections were held prior to the granting of independence, and countries experiencing internal wars in which twenty percent or greater of the population or territory was out of control of the state.

DATA RELEASE: 5-14.

CITATION: Bernhard *et al.* (2001), Teorell *et al.* (2022).

YEARS: 1946-2005

6.1.20 Background Factors (E) - Demography

This section lists variables gathered from other sources that may help in evaluating the causes and effects of democracy. The variables are divided into sections based on theme.

6.1.20.1 Maternal mortality rate (e_pematmor)

Long tag: vdem_cy_e_pematmor

Original tag: e_pematmor

Dataset citation: Coppedge et al. (2024), Pemstein et al. (2024)

Variable citation: Gapminder (2018), drawing from various sources (unspecified)

Merge scores:

Non-missing observations in original unit: Sum: 2280, Percent: 8.22

Non-missing observations in chosen unit: Sum: 2280, Percent: 7.61

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

VARIABLE TYPE: E

QUESTION: What is the maternal mortality rate?

CLARIFICATION: The number of maternal deaths divided by the number of live births in a

given year, multiplied by 100000. Maternal death is defined as the death of a woman while pregnant or within 42 days after the termination of that pregnancy, regardless of the length and site of the pregnancy, from a cause related to or aggravated by the pregnancy.

SOURCE(S): Gapminder (gapminder.org), drawing from various sources (unspecified).

DATA RELEASE: 5-14.

CITATION: Gapminder (gapminder.org).

YEARS: 1800-2013

6.1.21 Background Factors (E) - Conflict

This section lists variables gathered from other sources that may help in evaluating the causes and effects of democracy. The variables are divided into sections based on theme.

6.1.21.1 Civil war (e_civil_war)

Long tag: vdem_cy_e_civil_war

Original tag: e_civil_war

Dataset citation: Coppedge et al. (2024), Pemstein et al. (2024)

Variable citation: Haber & Menaldo (2011)

Merge scores:

Non-missing observations in original unit: Sum: 13776, Percent: 49.67

Non-missing observations in chosen unit: Sum: 13776, Percent: 45.96

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

VARIABLE TYPE: E

QUESTION: Was there a civil war?

CLARIFICATION: Civil war — at least one intra-state war with at least 1,000 battle deaths for each country-year.

RESPONSES:

0: No

1: Yes

SOURCE(S): Haber and Menaldo (2011).

DATA RELEASE: 5-14.

CITATION: Haber and Menaldo (2011).

YEARS: 1816-2006

6.1.21.2 Armed conflict, international (e_miinteco)

Long tag: vdem_cy_e_miinteco

Original tag: e_miinteco

Dataset citation: Coppedge et al. (2024), Pemstein et al. (2024)

Variable citation: Brecke (2001)

Merge scores:

Non-missing observations in chosen unit: Sum: 21218, Percent: 70.79

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

VARIABLE TYPE: E

QUESTION: Did the country participate in an international armed conflict?

CLARIFICATION: Coded 1 if the country participated in an international armed conflict in a given year, 0 otherwise. The original source codebook (Brecke 2001) states that no war is coded as 0 and war is coded as 1. However, the data contains only 1's along with missing data (no 0's). Following the authors' instructions (personal communication), we re-code missing observations as non-conflict (0) for countries where at least one year in the original

times series (which runs from 1500 until present) was coded as 1.
 SOURCE(S): Clio Infra (clio-infra.eu), drawing on Brecke (2001).
 DATA RELEASE: 5-14.
 CITATION: Brecke (2001).
 YEARS: 1789-2000

6.1.21.3 Armed conflict, internal (e_miinterc)

Long tag: vdem_cy_e_miinterc

Original tag: e_miinterc

Dataset citation: Coppedge et al. (2024), Pemstein et al. (2024)

Variable citation: Brecke (2001)

Merge scores:

Non-missing observations in original unit: Sum: 21218, Percent: 76.51

Non-missing observations in chosen unit: Sum: 21218, Percent: 70.79

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

VARIABLE TYPE: E

QUESTION: Did the country experience an internal armed conflict?

CLARIFICATION: Coded 1 if the country suffered in an internal armed conflict in a given year, 0 otherwise. The original source codebook (Brecke 2001) states that no war is coded as 0 and war is coded as 1. However, the data contains only 1's along with missing data (no 0's). Following the authors' instructions (personal communication), we re-code missing observations as non-conflict (0) for countries where at least one year in the original times series (which runs from 1500 until present) was coded as 1.

SOURCE(S): Clio Infra (clio-infra.eu), drawing on Brecke (2001).

DATA RELEASE: 5-14.

CITATION: Brecke (2001).

YEARS: 1789-2000

6.1.21.4 Coups d'état (Powell and Thyne) (e_pt_coup)

Long tag: vdem_cy_e_pt_coup

Original tag: e_pt_coup

Dataset citation: Coppedge et al. (2024), Pemstein et al. (2024)

Variable citation: Powell & Thyne (2011)

Merge scores:

Non-missing observations in original unit: Sum: 10373, Percent: 37.4

Non-missing observations in chosen unit: Sum: 10373, Percent: 34.61

Lost observations in chosen unit: Sum: 0 Percent: 0

Description:

VARIABLE TYPE: E

QUESTION: How many successful coup d'état were recorded in this year?

CLARIFICATION: According to the source, how many successful coup attempts were recorded in this year? The maximum count of this derived variable is four and its minimum is zero. Coups d'état are defined as "overt attempts by the military or other elites within the state apparatus to unseat the sitting head of state using unconstitutional means (...) there is no minimal death threshold for defining a coup. A coup attempt is defined as successful if the coup perpetrators seize and hold power for at least seven days" (Powell & Thyne 2011:252).

SCALE: Numeric

SOURCE(S): Powell and Thyne (2011)

NOTES: This variable is derived from the sourced dataset. For every country-year we sum the number of recorded successful coup attempts. The variable e_pt_coup_attempts sums

the number of coup attempts.

DATA RELEASE: 9-14.

CITATION: Powell and Thyne (2011)

YEARS: 1950-2022

6.1.21.5 Number of coups attempts in a year (e_pt_coup_attempts)

Long tag: vdem_cy_e_pt_coup_attempts

Original tag: e_pt_coup_attempts

Dataset citation: Coppedge et al. (2024), Pemstein et al. (2024)

Variable citation: Powell & Thyne (2011)

Description:

VARIABLE TYPE: E

QUESTION: How many coup attempts were recorded in this year?

CLARIFICATION: According to the source, how many coup attempts were recorded in this year? The maximum value of this derived variable is four and its minimum value is zero. Coups d'état are defined as "overt attempts by the military or other elites within the state apparatus to unseat the sitting head of state using unconstitutional means (...) there is no minimal death threshold for defining a coup. A coup attempt is defined as successful if the coup perpetrators seize and hold power for at least seven days" (Powell & Thyne 2011:252).

SCALE: Numeric

SOURCE(S): Powell and Thyne (2011)

NOTES: This variable is derived from the sourced dataset. For every country-year we sum the number of recorded coup attempts, successful or not. The variable e_pt_coup sums the number of successful coups.

DATA RELEASE: 13-14.
